(57) CLAIM

The ornamental design for an enclosure for information recorder and locator beacon, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an enclosure for information recorder and locator beacon showing our new design;

FIG. 2 is a top plan view thereof, the bottom plan view being a mirror image;

FIG. 3 is a left side elevational view thereof, the right side elevational view being a mirror image;

FIG. 4 is a rear elevational view;

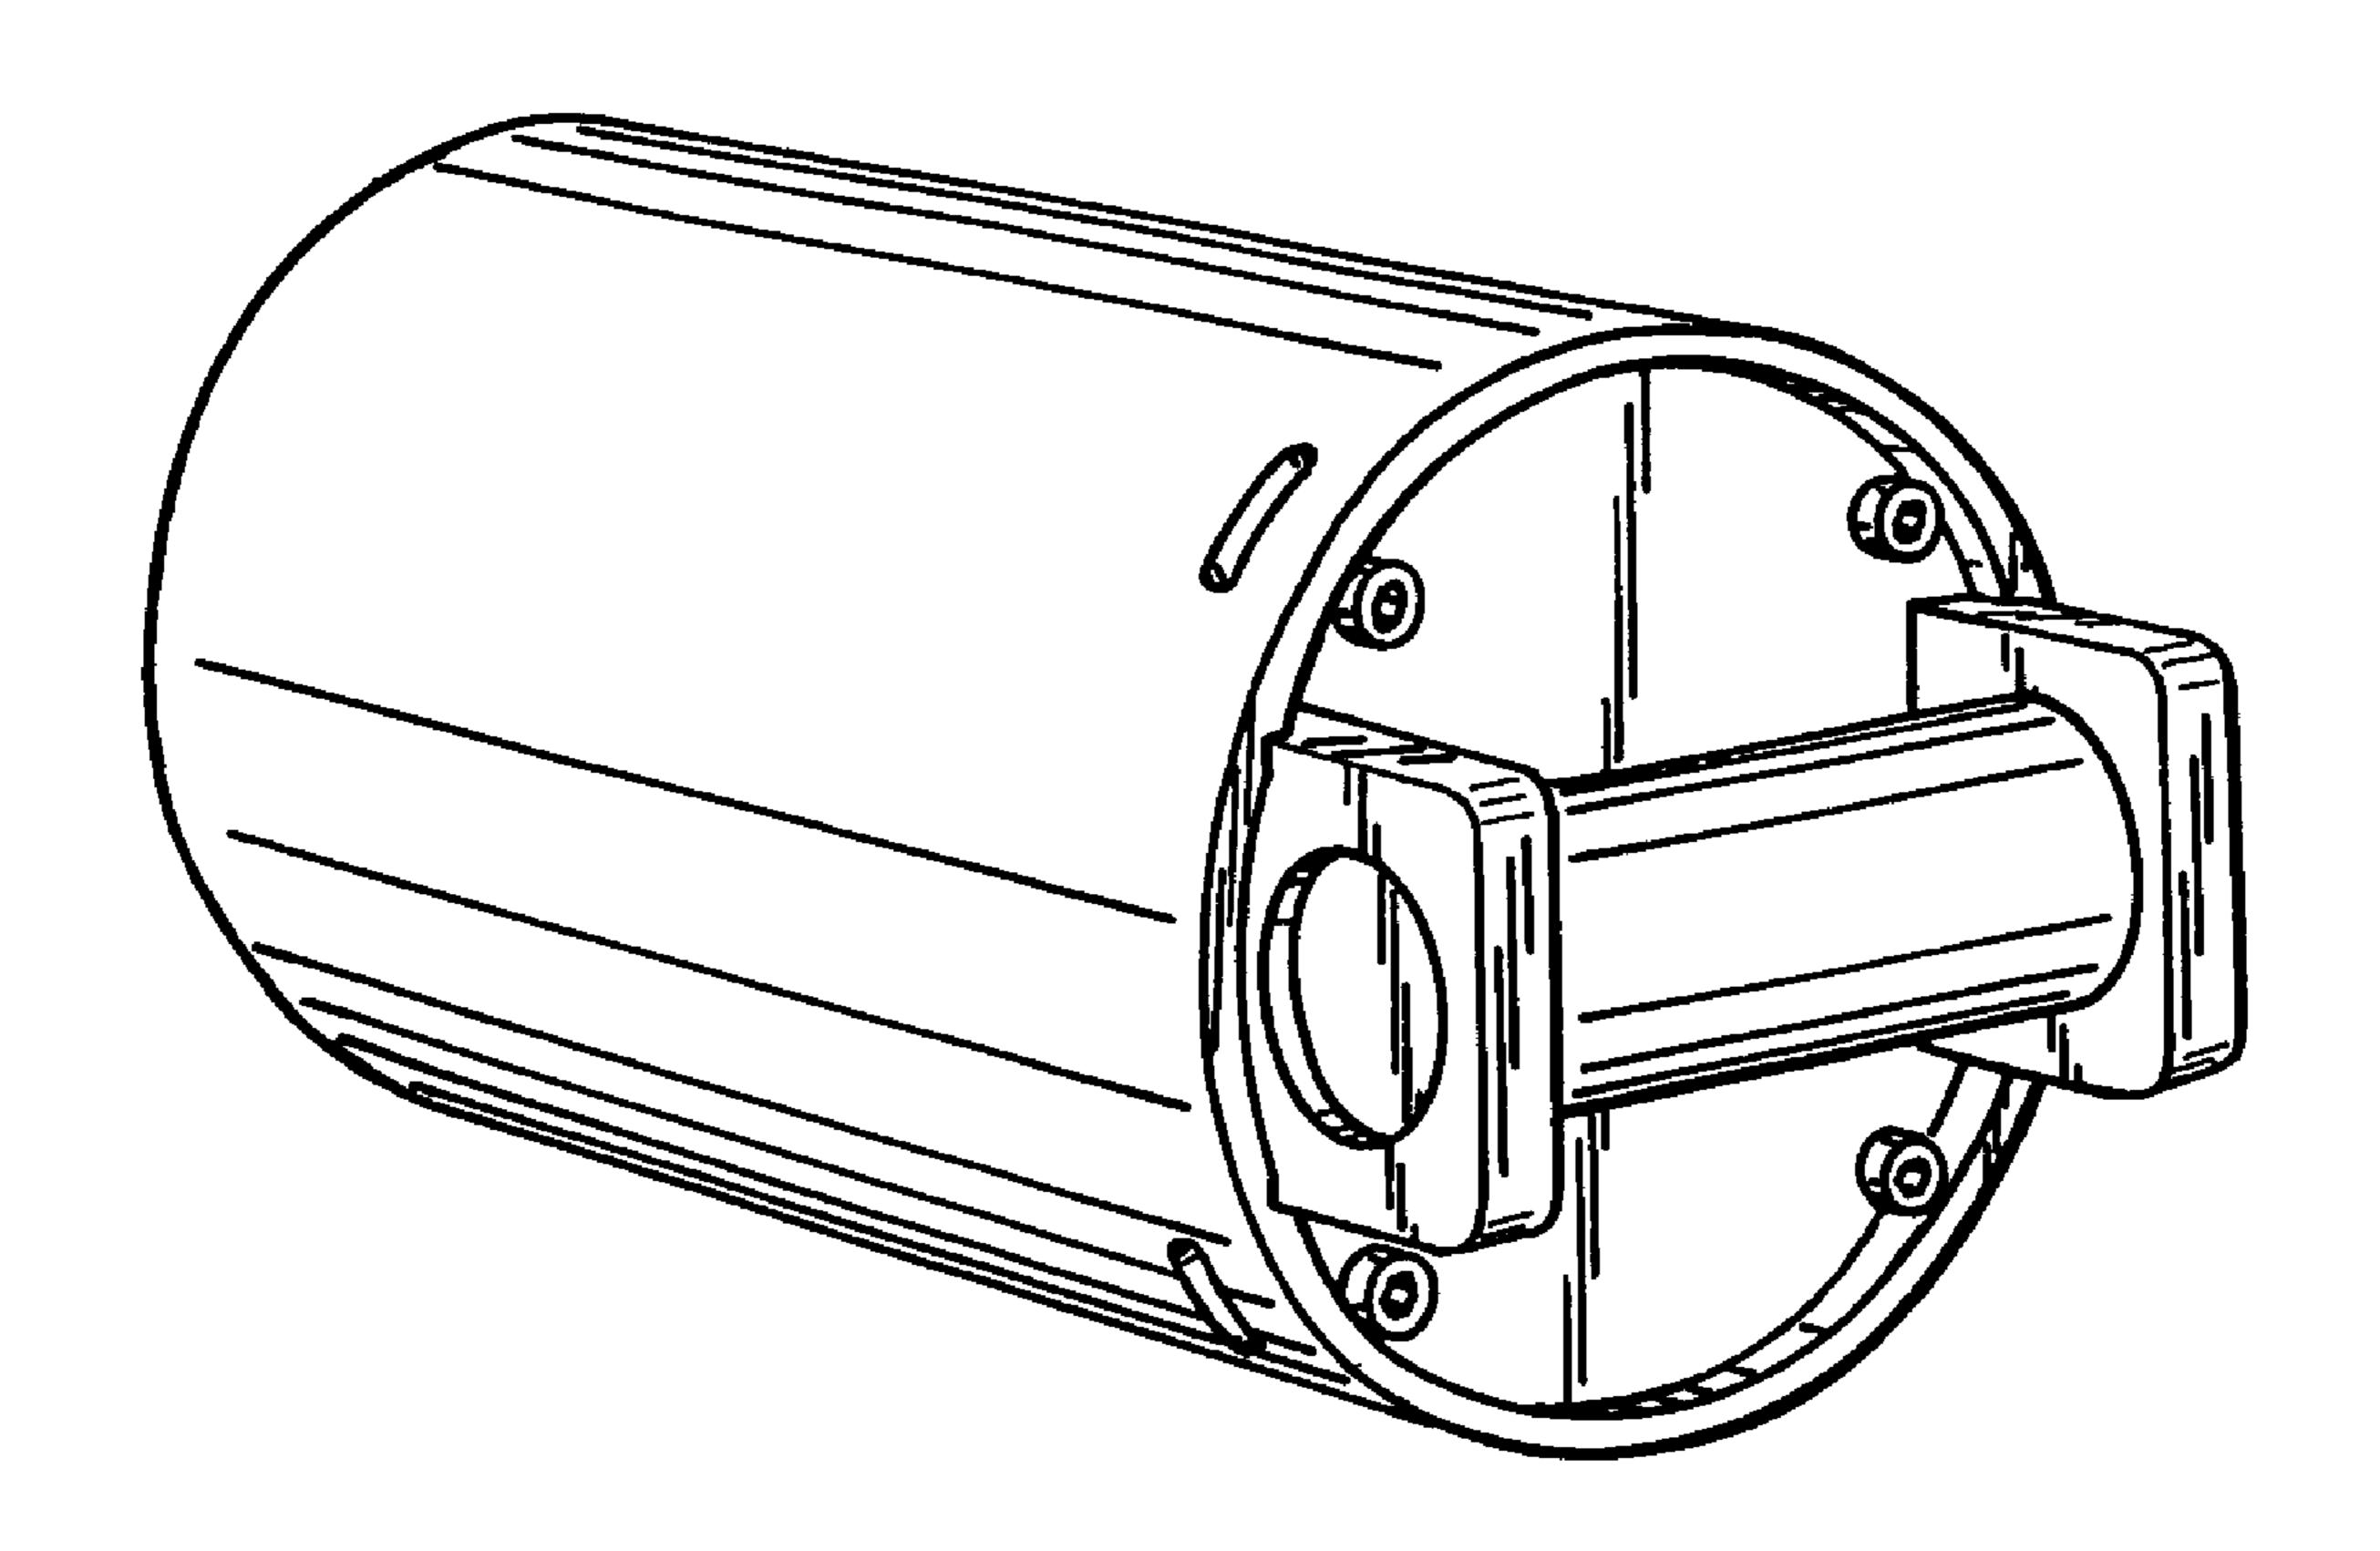

FIG. **5** is a front elevational view thereof;

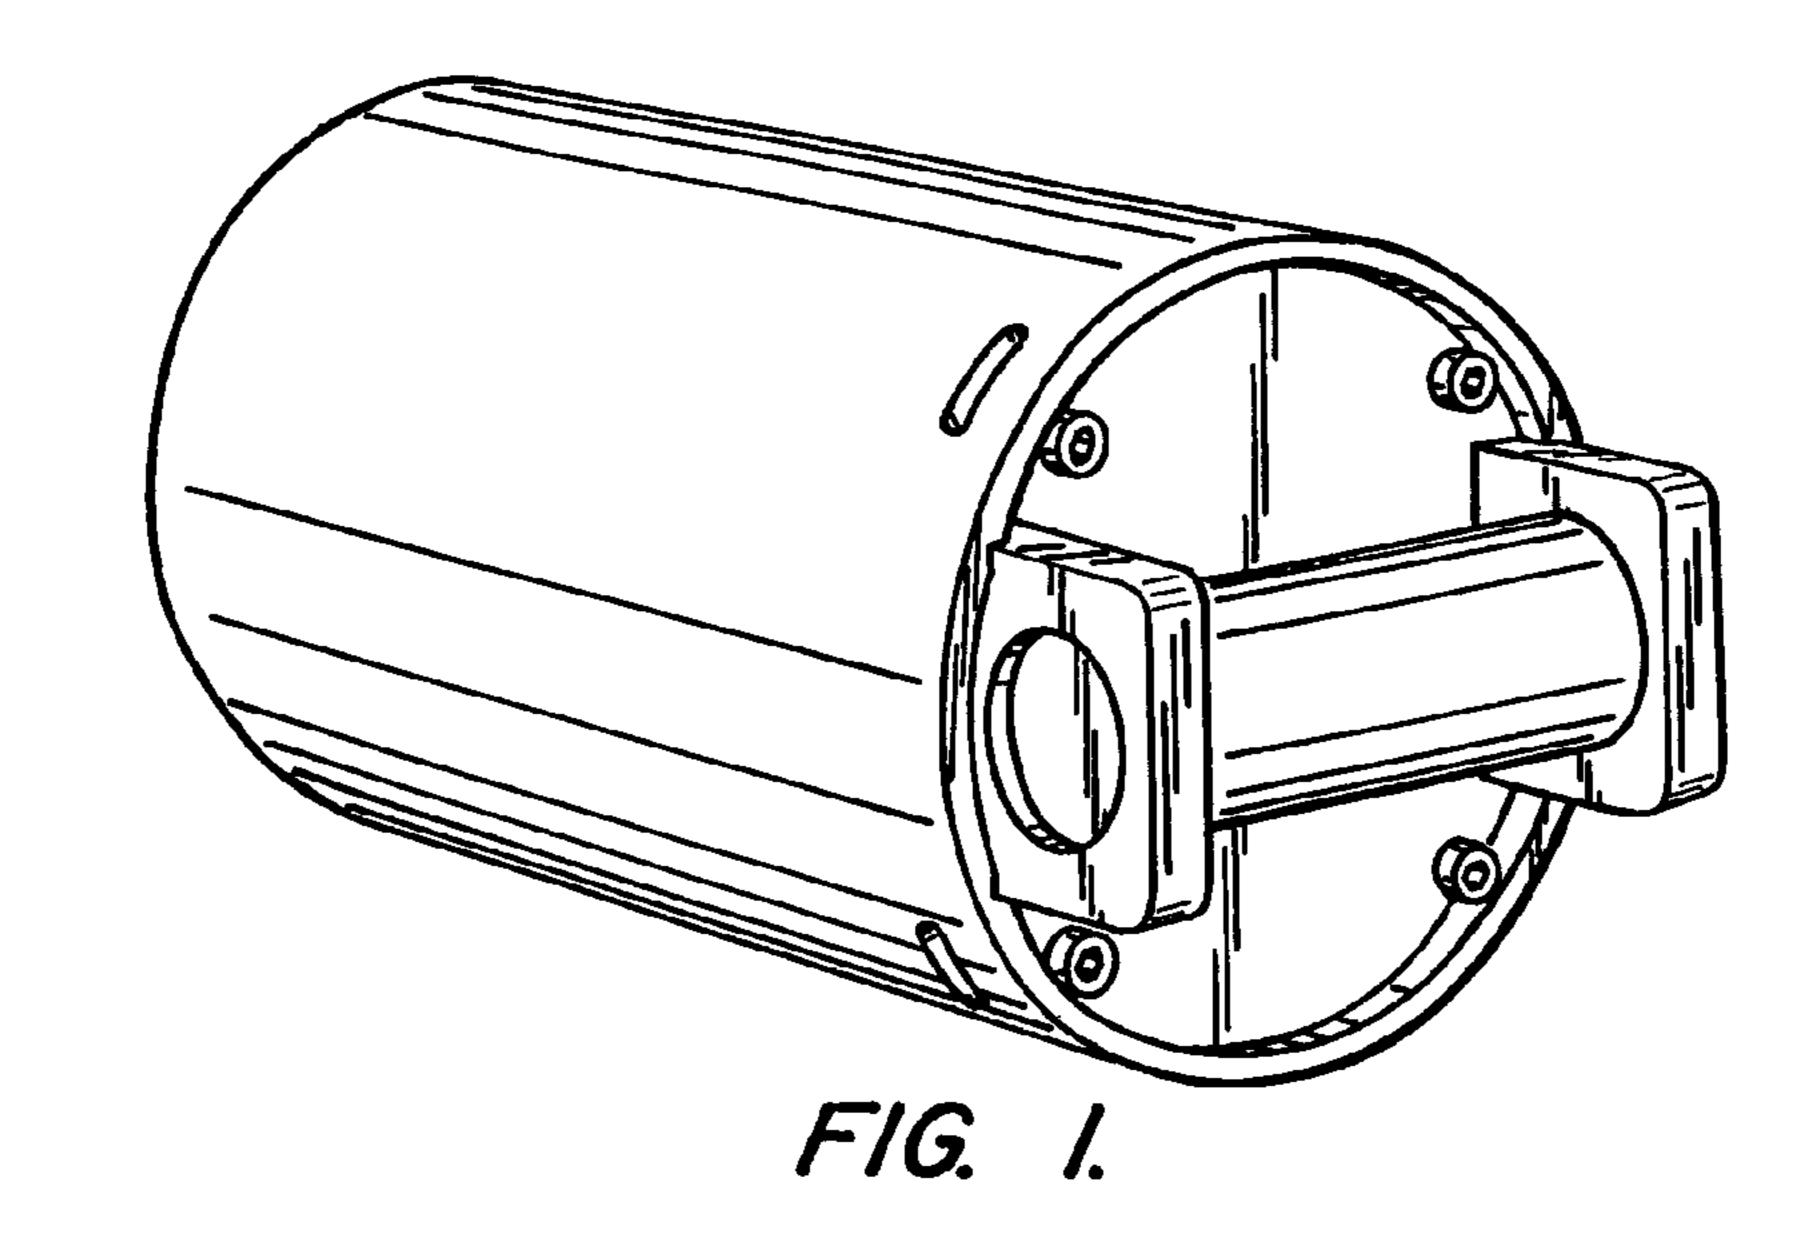

FIG. 6 is a perspective view of an alternative embodiment of the invention; and,

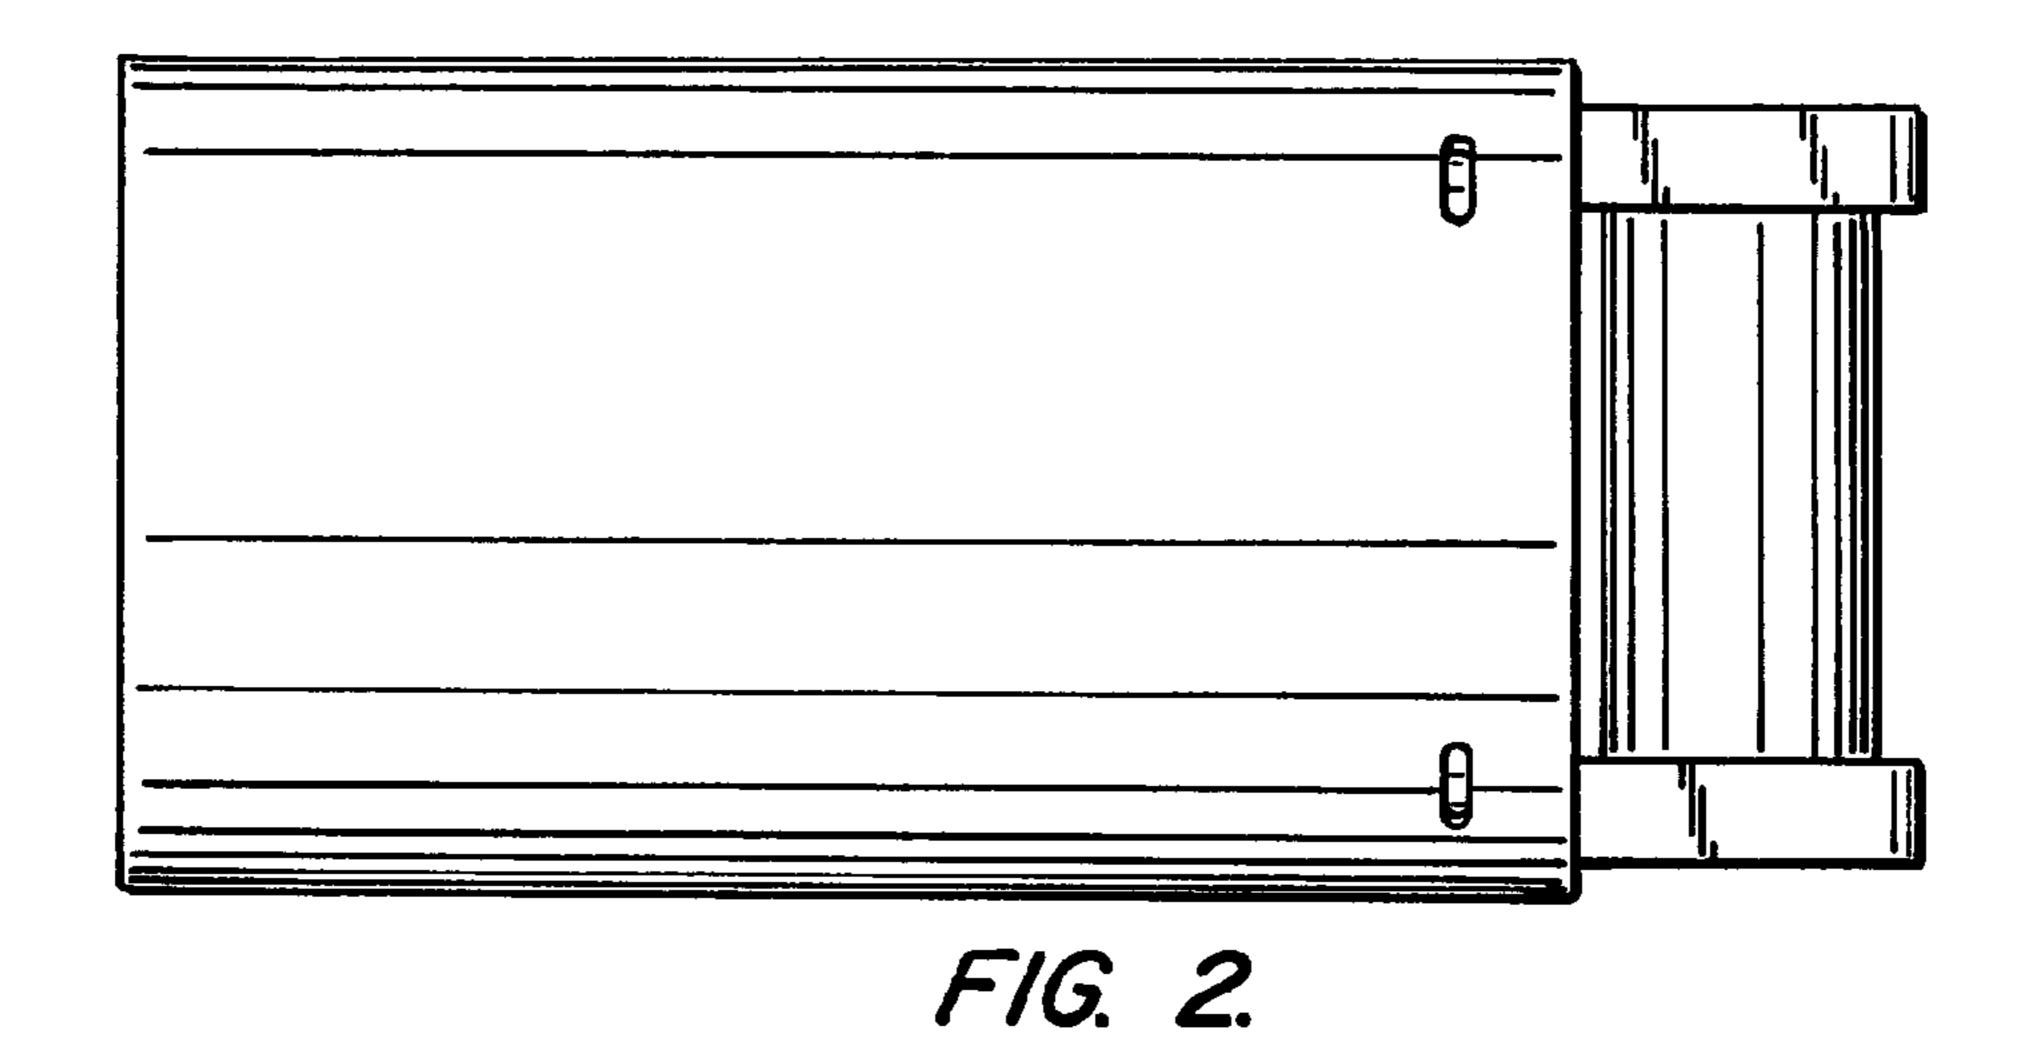

FIG. 7 is a right side elevational view thereof, the left side elevational view being a mirror image.

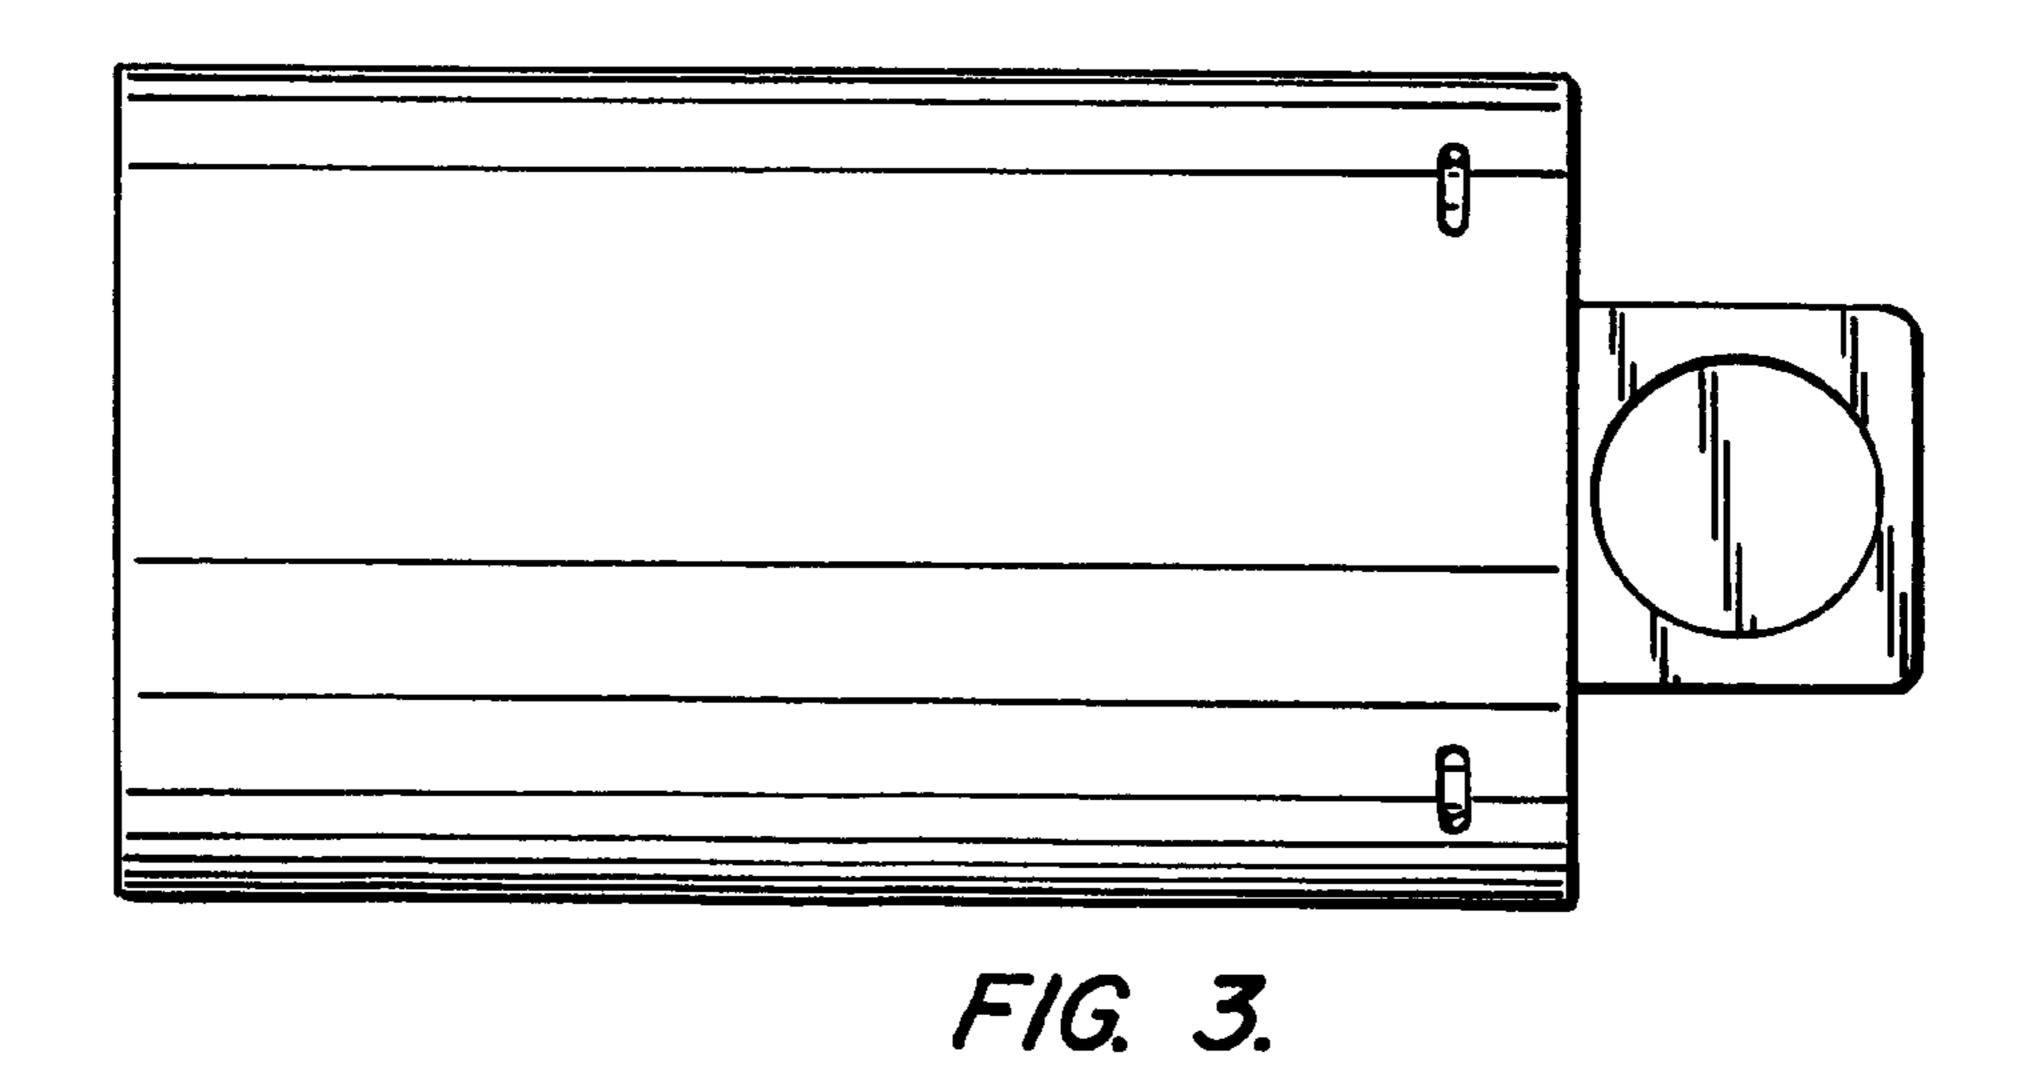

Enclosure for Information Recorder and Locator Beacon can be used to protect flight data and cockpit voice recordings from physical damage due to a crash or other incident and to send out a locator beacon signal to searchers.
