(57) **CLAIM**

The ornamental design for a global navigation satellite system apparatus display screen with user interface for an application launcher, as shown and described.

**DESCRIPTION**

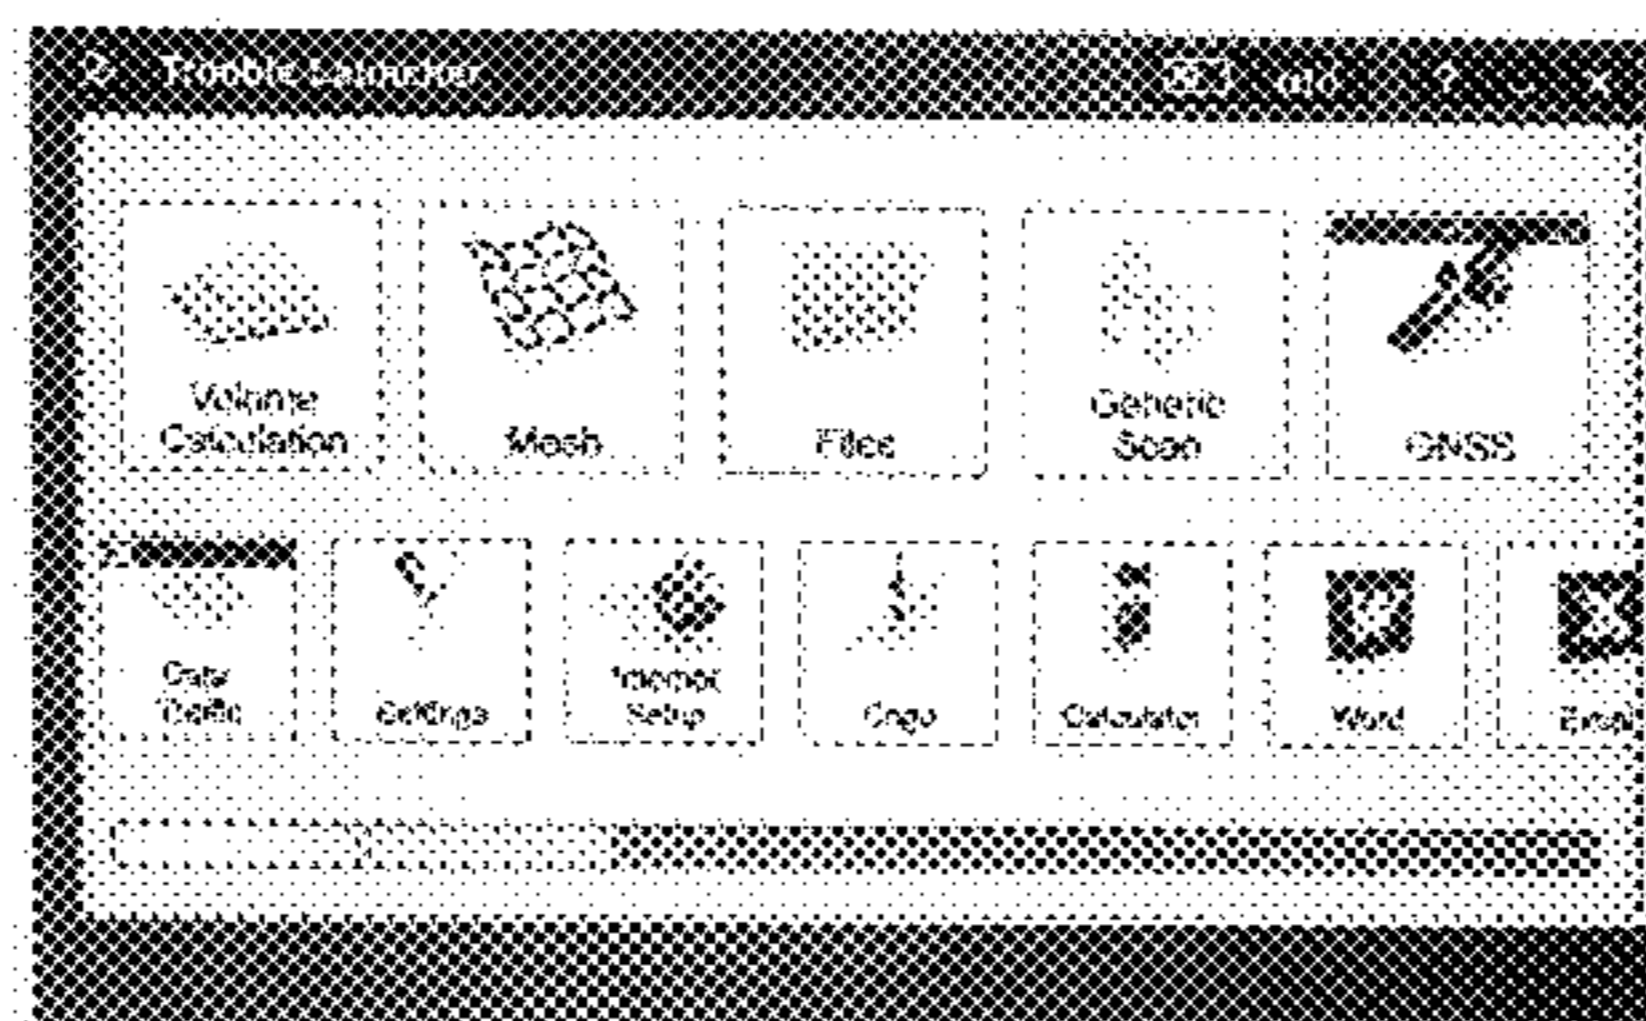

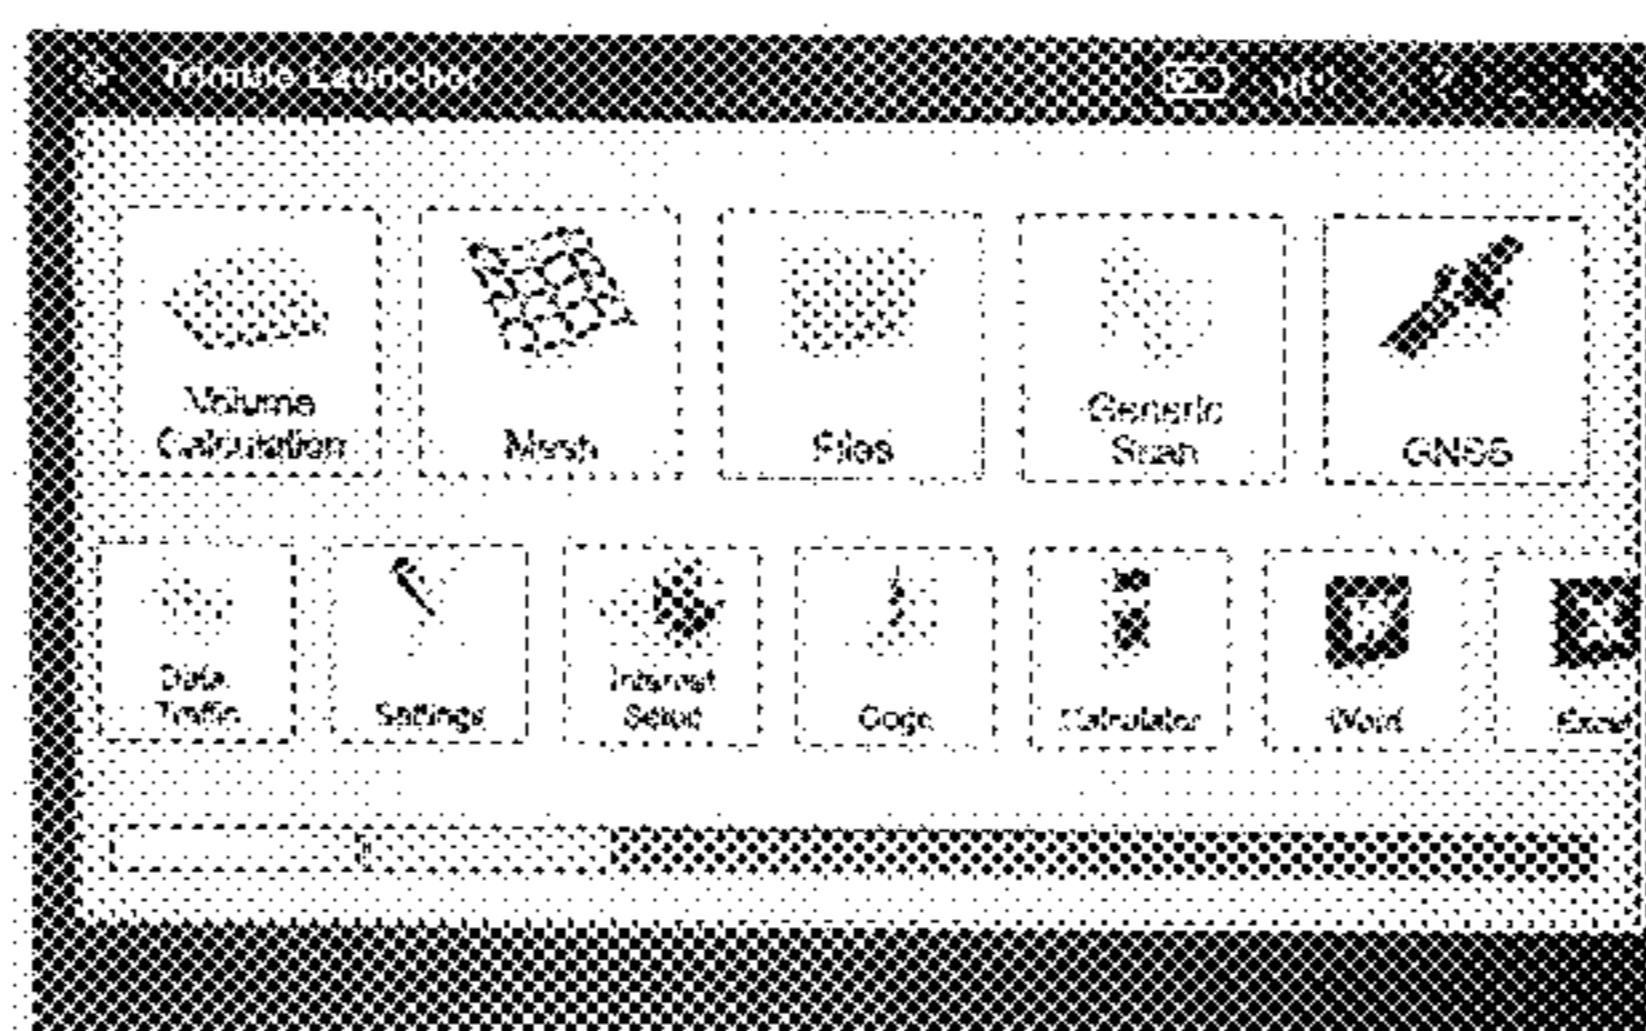

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a view of a first embodiment of a global navigation satellite system apparatus display screen with user interface for an application launcher before selection of an application showing our new design; and,

FIG. 2 is a view of a second embodiment of a global navigation satellite system apparatus display screen with user interface for an application launcher after selection of an application showing our new design.

The perimeters of the global navigation satellite system apparatus display screen and the user interface for application launcher are understood to be flush.
