(57) **CLAIM**

We claim the ornamental design for a compact ski carrier, as shown and described.

DESCRIPTION

FIG. 1: Perspective view of the compact ski device in the compact formation;

FIG. 2: Front face on view of the compact ski device in the compact formation;

FIG. 3: Top view of the compact ski device in the compact formation;

FIG. 4 End side view along the length of the compact ski device in the compact formation;

FIG. 5: Perspective view of the compact ski device in an intermediate transition formation in going from compact formation to expanded formation;

FIG. 6: Top view of the compact ski device in an intermediate transition formation in going from compact formation to expanded formation;

FIG. 7: Perspective view of the compact ski device in an intermediate expanded formation;

FIG. 8: End side view along the length of the compact ski device in an intermediate expanded formation;

FIG. 9: Front face on view of the compact ski device in an intermediate expanded formation;

FIG. 10: Top view of the compact ski device in an intermediate expanded formation;

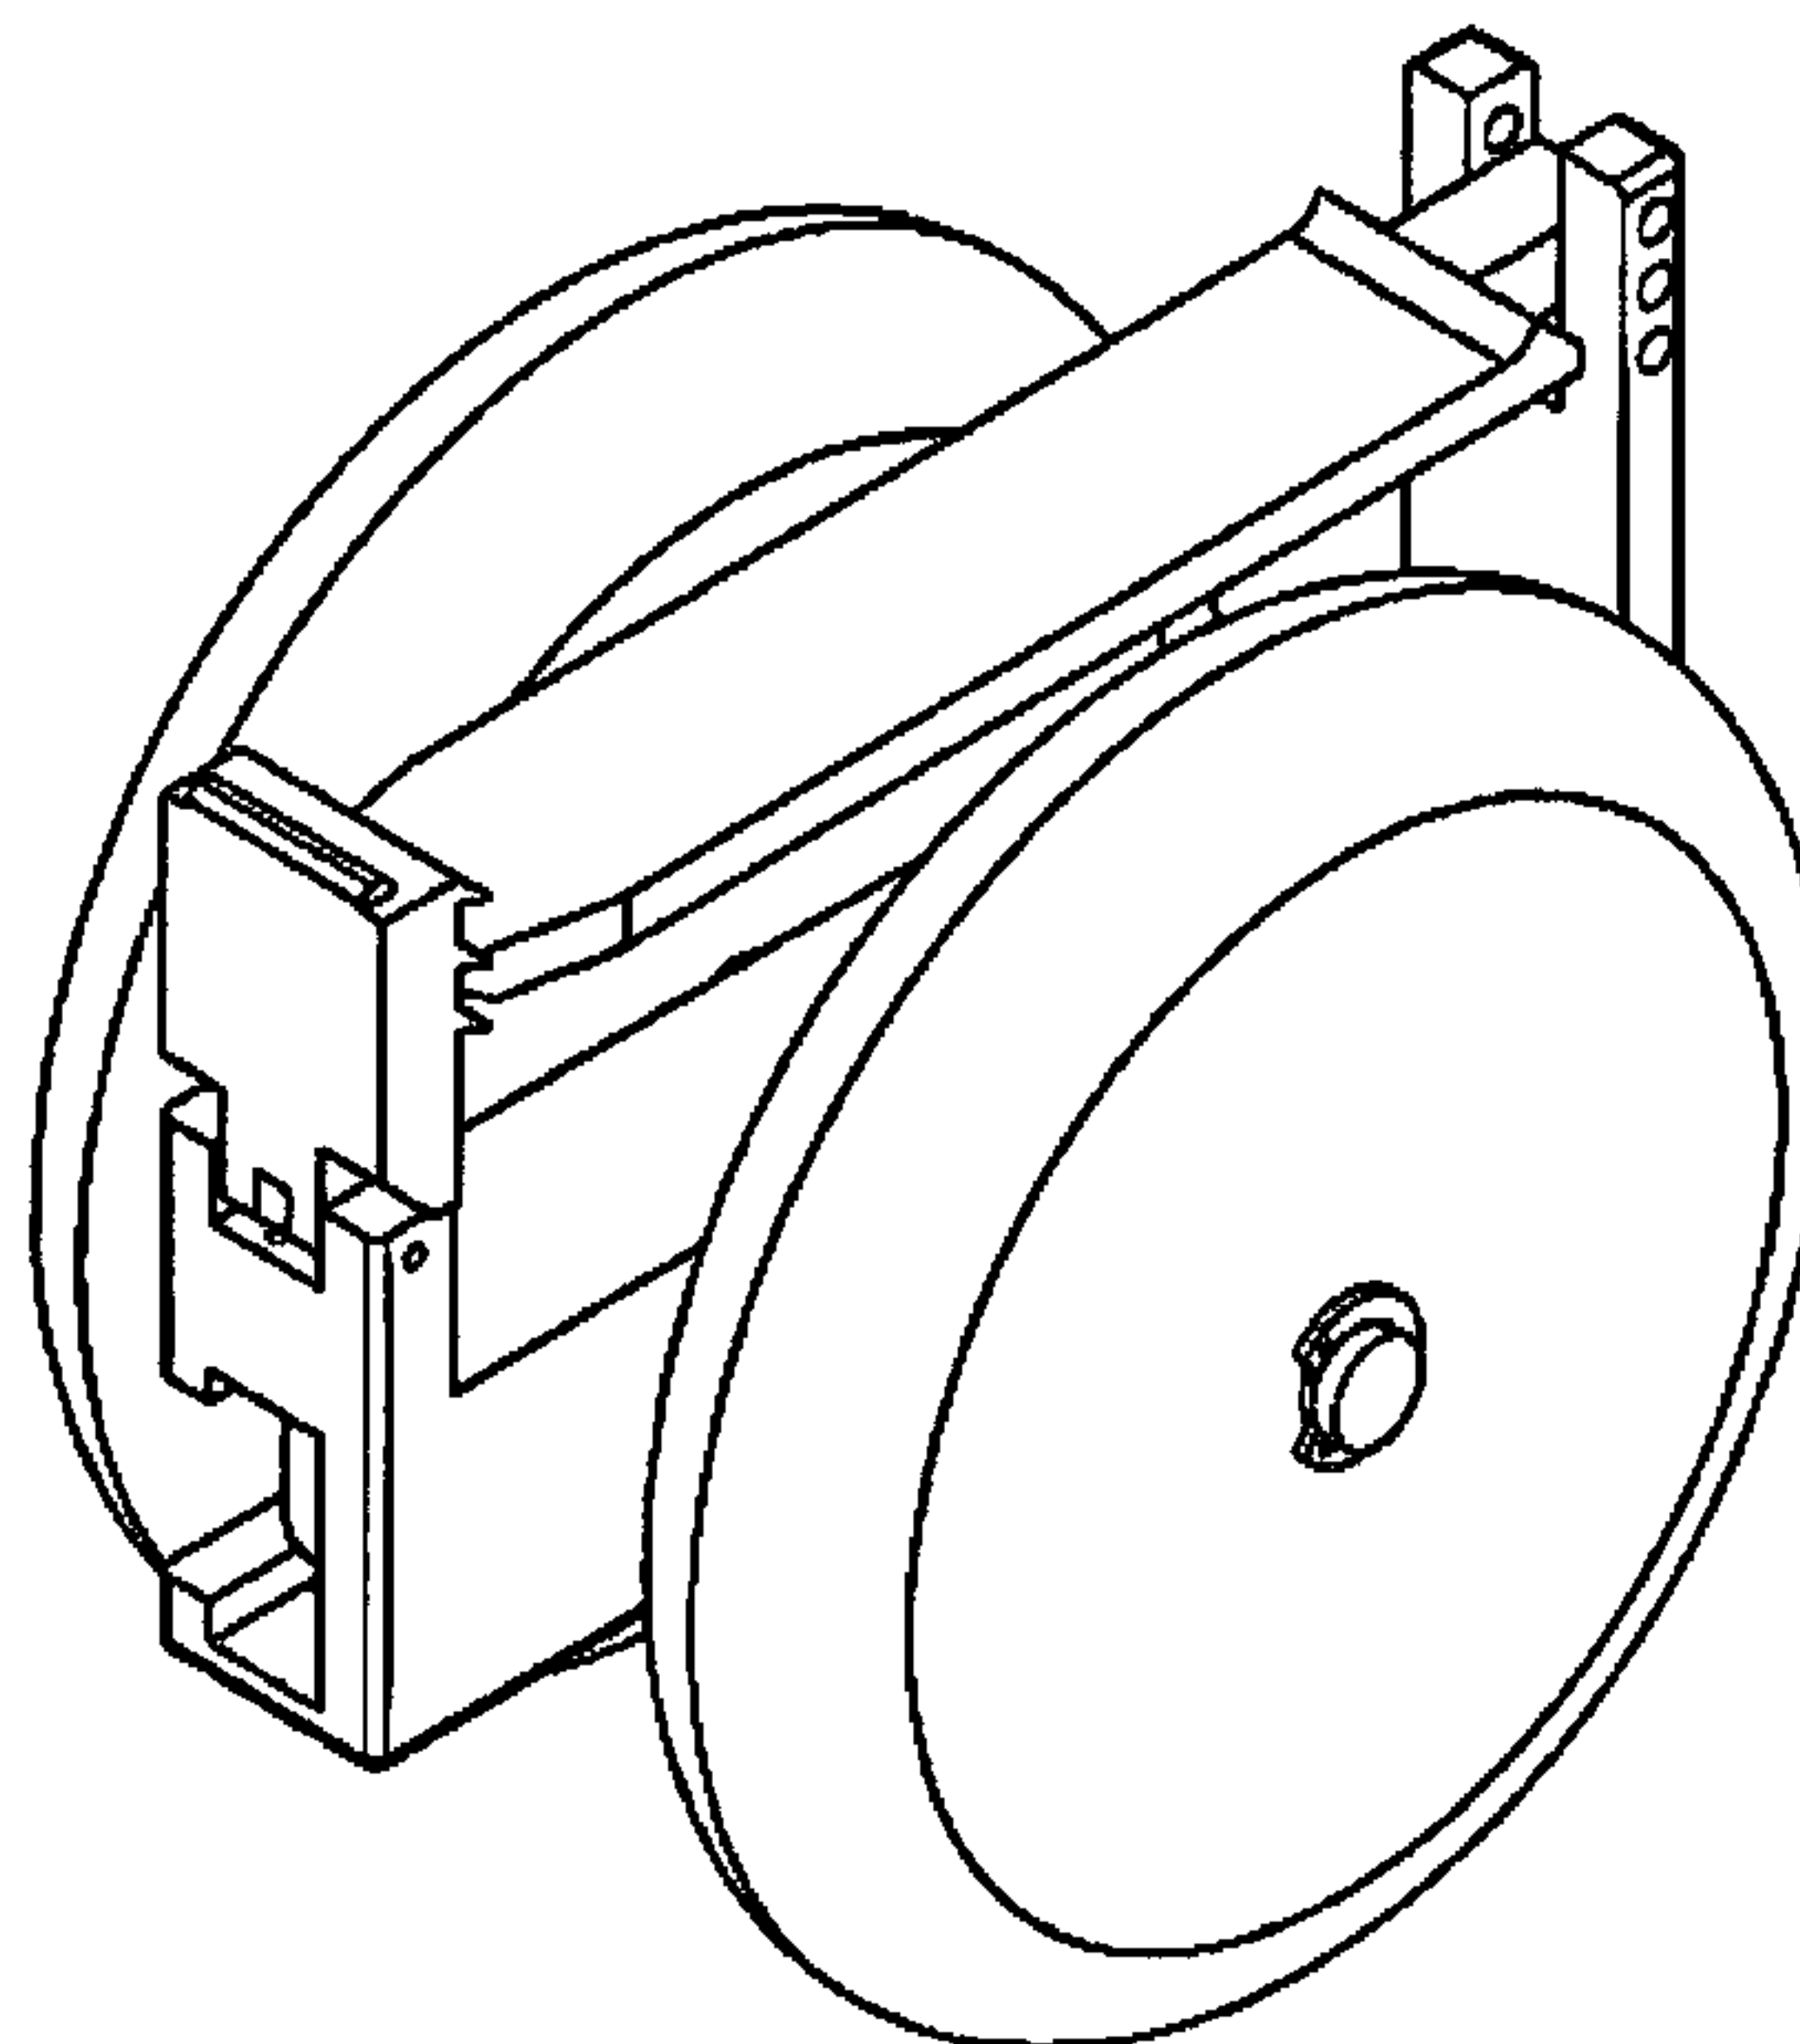

FIG. 11: Perspective view of the compact ski device in the expanded formation;

FIG. 12: Top view of the compact ski device in the expanded formation; and,

FIG. 13: Front face on view of the compact ski device in the expanded formation.

The claimed compact ski carrier is a compact collapsible wheeled assembly having compact, intermediate and expanded formations. The claimed compact ski carries in the expanded formation allows a skier to transport, wheel, push, pull and/or carry skis while the skis are being transported over ground. The claimed compact ski carrier also allows a user to store the compact ski carrier device in its compact formation for ease of storage for example while skiing. The intermediate formation of the claimed device allows a user to interchange between the compact and the expanded formation.
