The ornamental design for a face/makeup and hair protector for protecting clothing garments, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a face/makeup and hair protector for protecting clothing garments showing my new design;

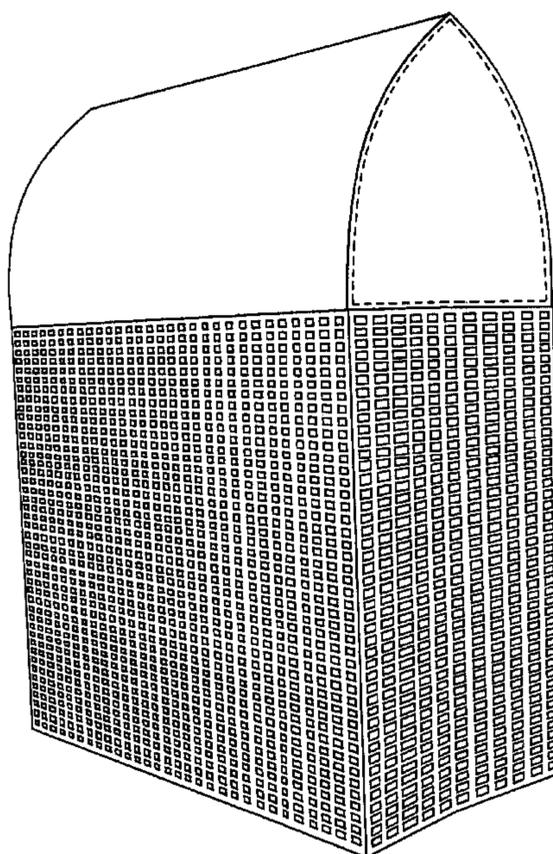

FIG. 2 is a front view of the face/makeup and hair protector for protecting clothing garments; with broken lines in this Figure showing the environment in which the design is associated, namely over the head, face and shoulders of a person, the back side being a mirror image thereof;

FIG. 3 is a side view (closed) of the face/makeup and hair protector for protecting clothing garments; the other side being a mirror image thereof; and,

FIG. 4 is a side view (open) of the face/makeup and hair protector for protecting clothing garments; the other side being a mirror image thereof.

The open screen patterns on the opposite sides of FIGS. 1 and 2 that may be visible through the holes in those views have been omitted for clarity and ease of illustration. The broken lines following the gothic arch shaped area at the top of the protector represent an internal boundary of the design, with the line itself and the area within, forming no part of the claim.
