(57) **CLAIM**

The ornamental design for a fishing lure, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a perspective view of a fishing lure configuration showing my new design; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 2 is a side elevation view of the fishing lure configuration of FIG. 1, the side elevation view of the opposing side being identical thereto; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 3 is a longitudinal section view shown along line 3—3 of the fishing lure configuration of FIG. 1; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 4 is a perspective view of an alternate fishing lure configuration showing my new design; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 5 is a side elevation view of the fishing lure configuration of FIG. 4, the side elevation view of the opposing side being identical thereto; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 6 is a longitudinal section view shown along line 6—6 of the fishing lure configuration of FIG. 4; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 7 is a perspective view of an alternate fishing lure configuration showing my new design; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 8 is a side elevation view of the fishing lure configuration of FIG. 7, the side elevation view of the opposing side being identical thereto; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 9 is a longitudinal section view shown along line 9—9 of the fishing lure configuration of FIG. 7; the broken lines depict environmental structure for illustrative purposes only and form no part of the claimed design; and

FIG. 10 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with color fluid shown on the inside of the lure. The broken lines shown in FIGS. 10-16 depict environmental structure for illustrative purposes only and form no part of the claimed design;

FIG. 11 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure;

FIG. 12 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure;

FIG. 13 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure;

FIG. 14 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure;

FIG. 15 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure; and,

FIG. 16 is a partial cross sectional view shown along line 9—9 of FIG. 7, illustrated with a different color fluid shown on the inside of the lure.

FIGS. 10-16 are shown broken away for convenience of illustration.

The design is embodied within a transparent or translucent fishing lure configuration containing colored liquid that is visible.
