(57) **CLAIM**

The ornamental design for a notebook cover, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a first configuration of a notebook cover showing the outside surfaces thereof in an open state, shown with removable shutting parts attached, according to my invention;

FIG. 2 is a rear elevational view thereof, showing the inside surfaces thereof of the notebook cover in an open state;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a right side elevational view thereof;

FIG. 6 is a left side elevational view thereof;

FIG. 7 is an enlarged cross-sectional view taken along line 7-7 of FIG. 1;

FIG. 8 is a cross-sectional view taken along line 8-8 of FIG. 1;

FIG. 9 is a cross-sectional view taken along line 9-9 of FIG. 1;

FIG. 10 is an enlarged cross-sectional view taken along line 10-10 of FIG. 1;

FIG. 11 is a cross-sectional view taken along line 11-11 of FIG. 1;

FIG. 12 is an enlarged view of a section taken along line 12-12 of FIG. 1;

FIG. 13 is an enlarged view of a section taken along line 13-13 of FIG. 5;

FIG. 14 is a perspective view thereof showing the outside surfaces of the notebook cover in an open state, thereof;

FIG. 15 is a perspective view thereof showing the inside of the notebook cover in an open state, thereof;

FIG. 16 is a perspective view of a position of the outside cover thereof in a closed state;

FIG. 17 is a perspective view of the notebook cover showing the outside surfaces of the notebook cover thereof, in an open state, with removable shutting parts detached;

FIG. 18 is a front elevational view of the notebook cover showing the outside surfaces of the notebook cover thereof, in an open state;

FIG. 19 is a rear elevational view thereof showing the inside surfaces of the notebook cover thereof, in an open state;

FIG. 20 is a top plan view thereof, without the removable shutting parts;

FIG. 21 is a right side elevational view thereof, without the removable shutting parts;

FIG. 22 is a front elevational view of a removable shutting part thereof;

FIG. 23 is a rear elevational view thereof;

FIG. 24 is a top plan view thereof, the bottom plan view being a mirror image thereof;

FIG. 25 is a right side elevational view thereof, the left side elevational view being a mirror image thereof;

FIG. 26 is a front elevational view of the notebook cover showing the outside surfaces of the notebook cover thereof, in an open state with removable shutting parts attached;

FIG. 27 is a perspective view of a second configuration of the notebook cover thereof, in a closed state, with removable shutting parts attached;

FIG. 28 is a front elevational view of a third configuration showing the outside surfaces of the notebook cover in an open condition with removable shutting parts attached;

FIG. 29 is a perspective view of a fourth configuration showing the outside surfaces of the notebook cover thereof, in an open state, with removable shutting parts attached;

FIG. 30 is a front elevational view of a fifth configuration showing the outside surfaces of the notebook cover thereof, in an open state, with removable shutting parts attached; and,

FIG. 31 is a front elevational view of a sixth configuration showing the outside surfaces of the notebook cover thereof, in an open state, with removable shutting parts attached.

The broken lines illustrate environmental structure and form no part of the claimed design.
