The ornamental design for a holder for a mobile communications device, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a holder for a mobile communications device incorporating the subject design.

FIG. 2 is a front view thereof.

FIG. 3 is a rear view thereof.

FIG. 4 is a first side view thereof, the opposite side being a mirror image thereof.

FIG. 5 is a top view thereof.

FIG. 6 is a bottom view thereof; and,

FIG. 7 is a cross-sectional view thereof, taken along a plane which is perpendicular to the longitudinal axis of the holder and which bisects the holder.

The broken lines that are shown only in FIG. 1 depict an unclaimed mobile communications device within the holder and unclaimed environment surrounding the holder. These broken lines form no part of the claimed design. The broken lines on the surfaces of the holder for a mobile communications device, shown in FIGS. 1-7, depict stitching, which is also not part of the claimed design. Moreover, the four lines in “dash-dot-dot” format surrounding the broken line environment in FIG. 1 indicate the boundaries of FIG. 1 and form no part of the claimed design.
