(57) **CLAIM**

The ornamental design for archery bow stabilizer, as shown and described.

DESCRIPTION

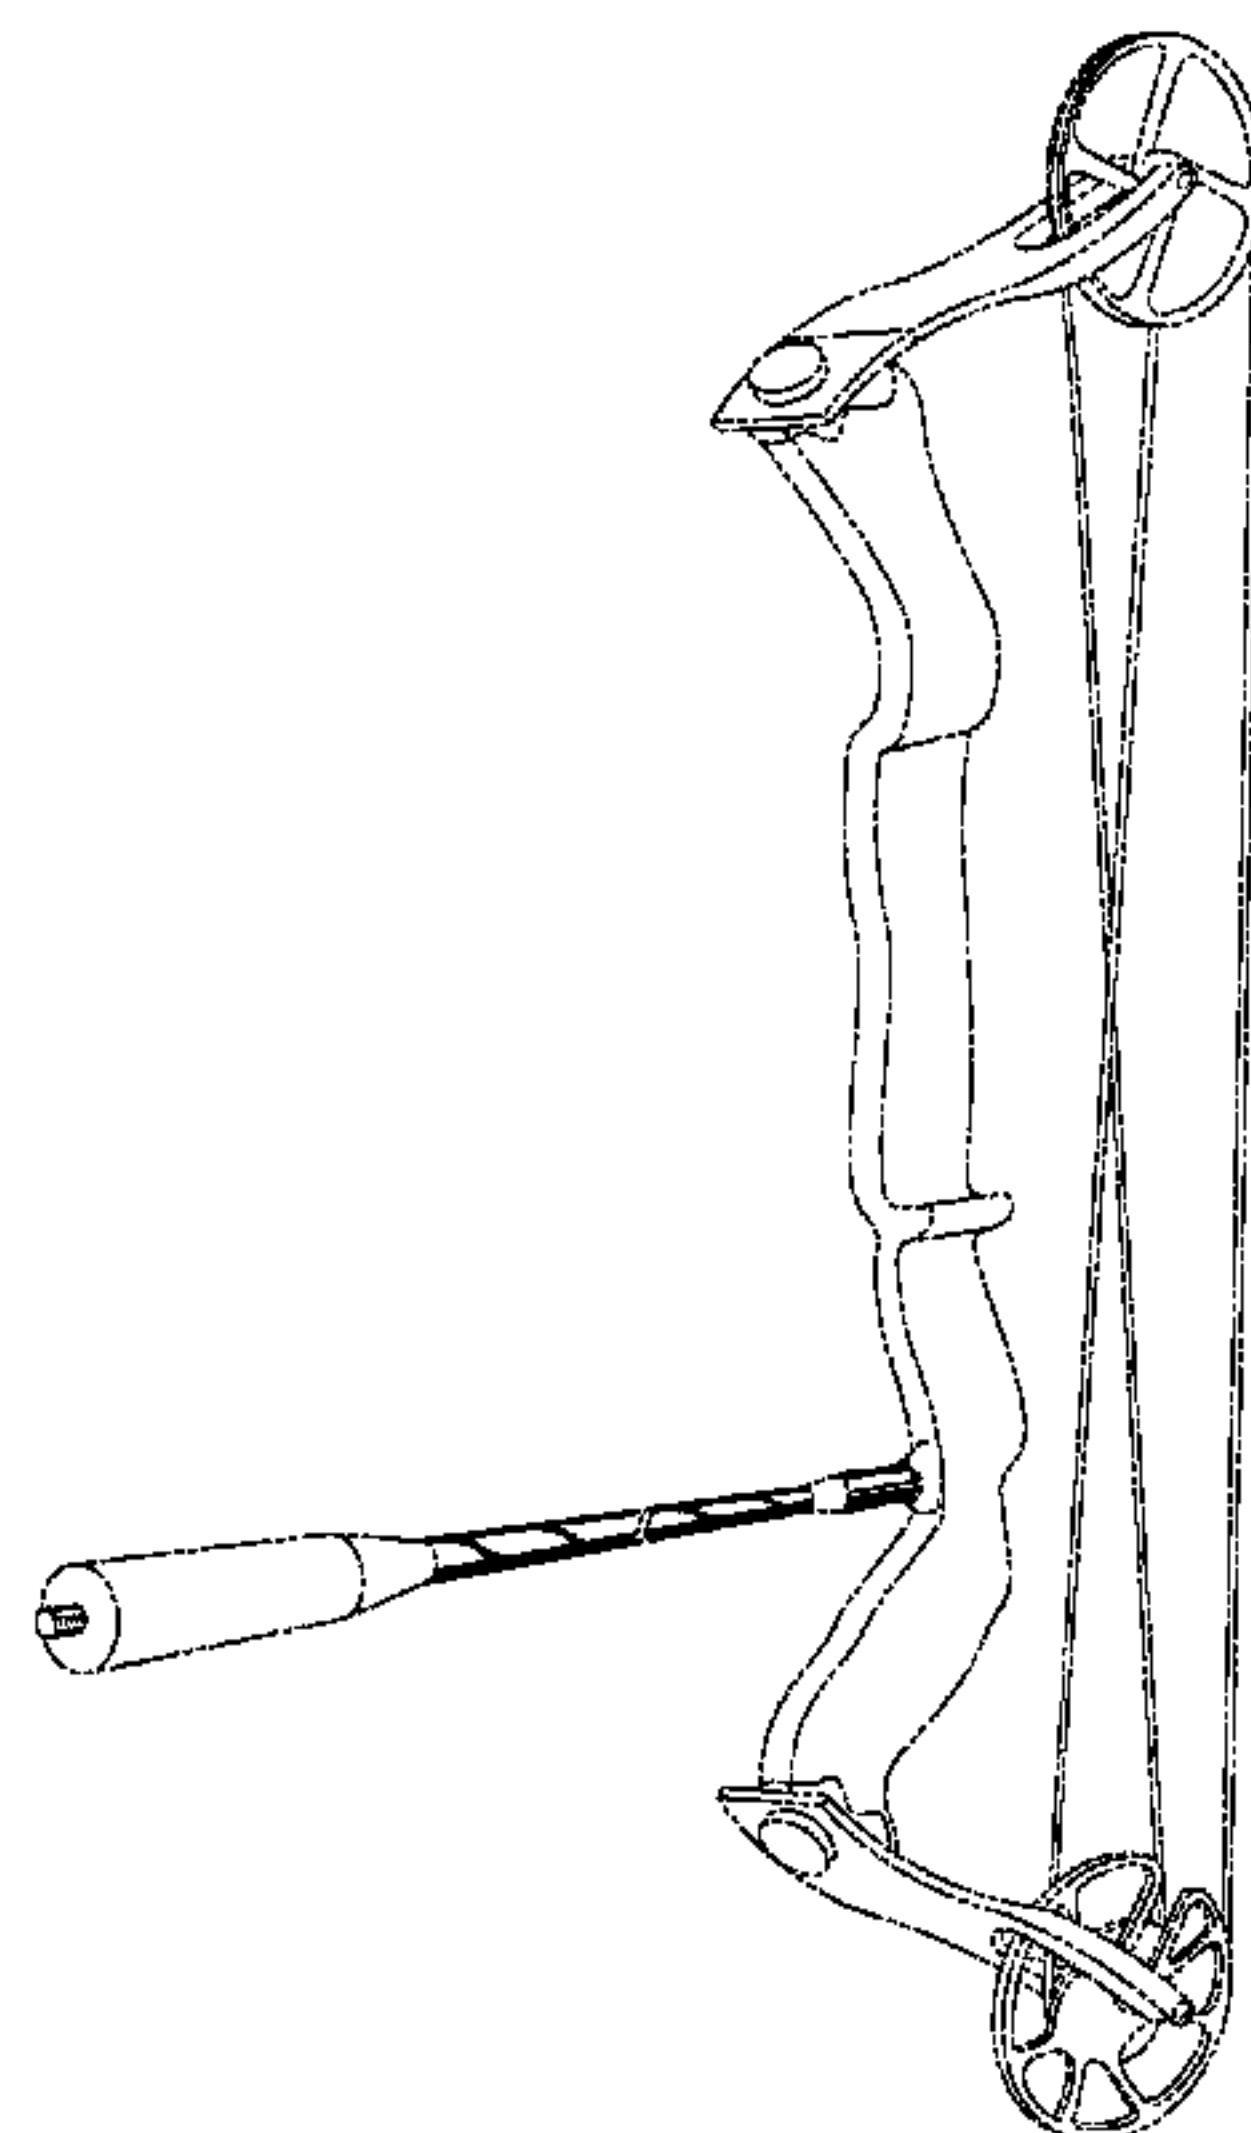

FIG. 1 is a perspective view of the archery bow stabilizer embodying the new design;

FIG. 2 is a right side view thereof, the left side view being a mirror image thereof; and,

FIG. 3 is a bottom view thereof, the top view being a mirror image thereof.

FIGS. 1-3 show features of an archery bow stabilizer and an archery bow in phantom lines. These features are shown for environmental purposes and do not form any part of the claimed design. Further, the phantom lines immediately adjacent the solid-line portions of the design form the boundary of the design, with the phantom lines forming no part of the claimed design. The generally coiled shading wrapping around the archery bow stabilizer in the claimed part of the design represents a material that is translucent, transparent and/or otherwise transmissive of visible light. The design is shown broken apart along its length to indicate that no specific length is claimed.
