(57) **CLAIM**

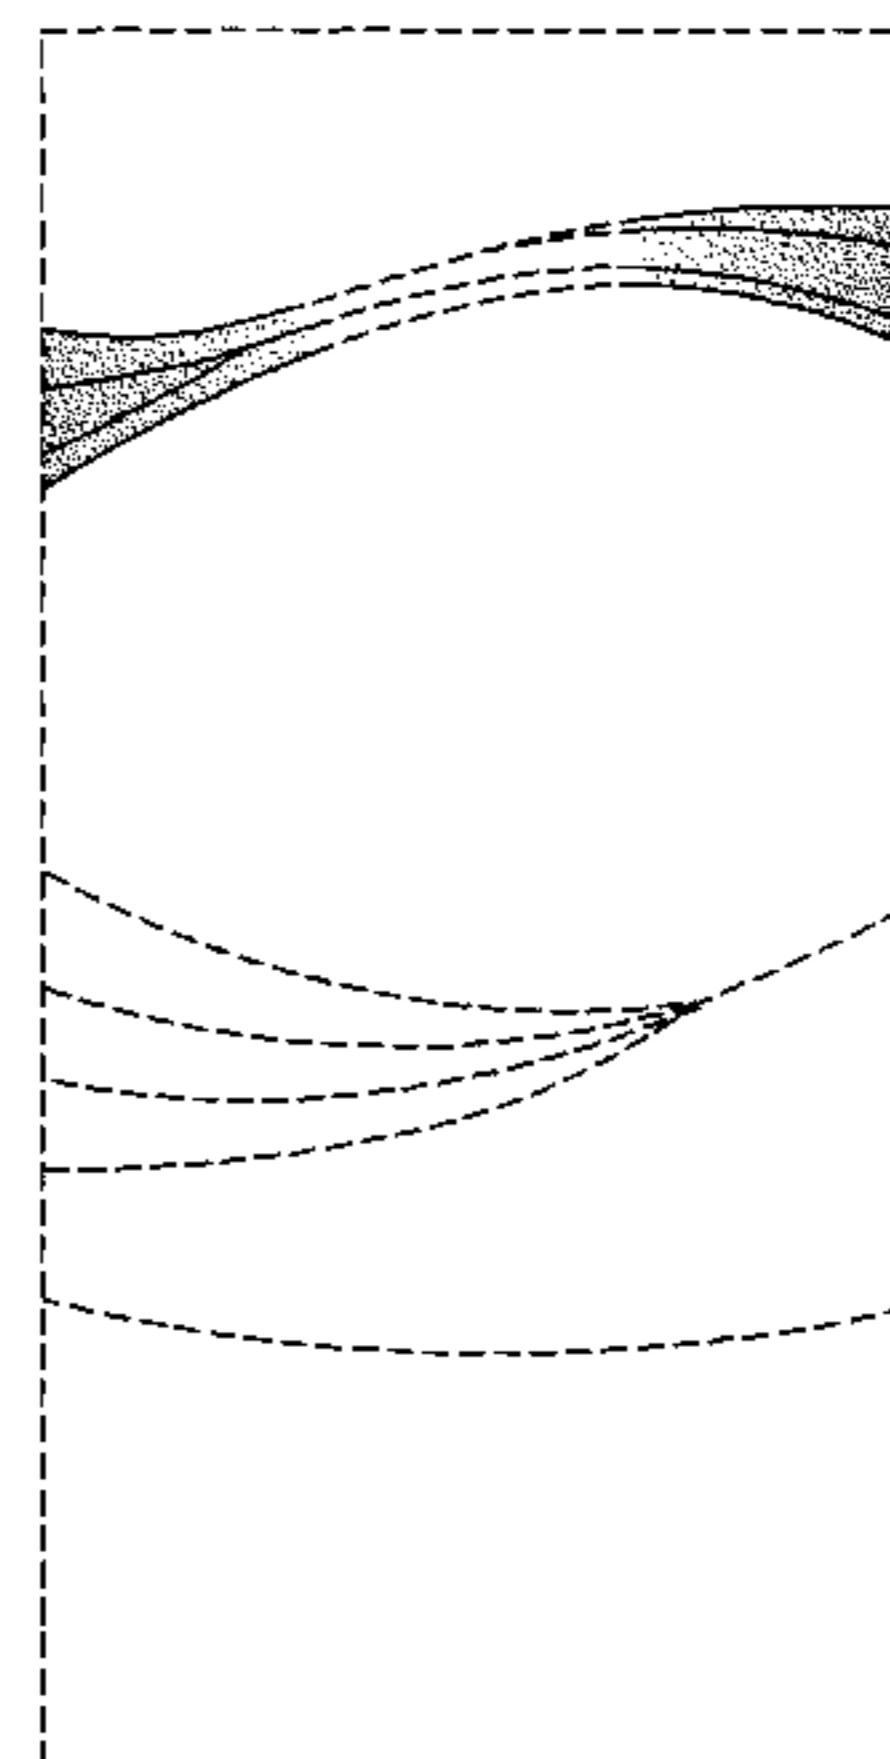

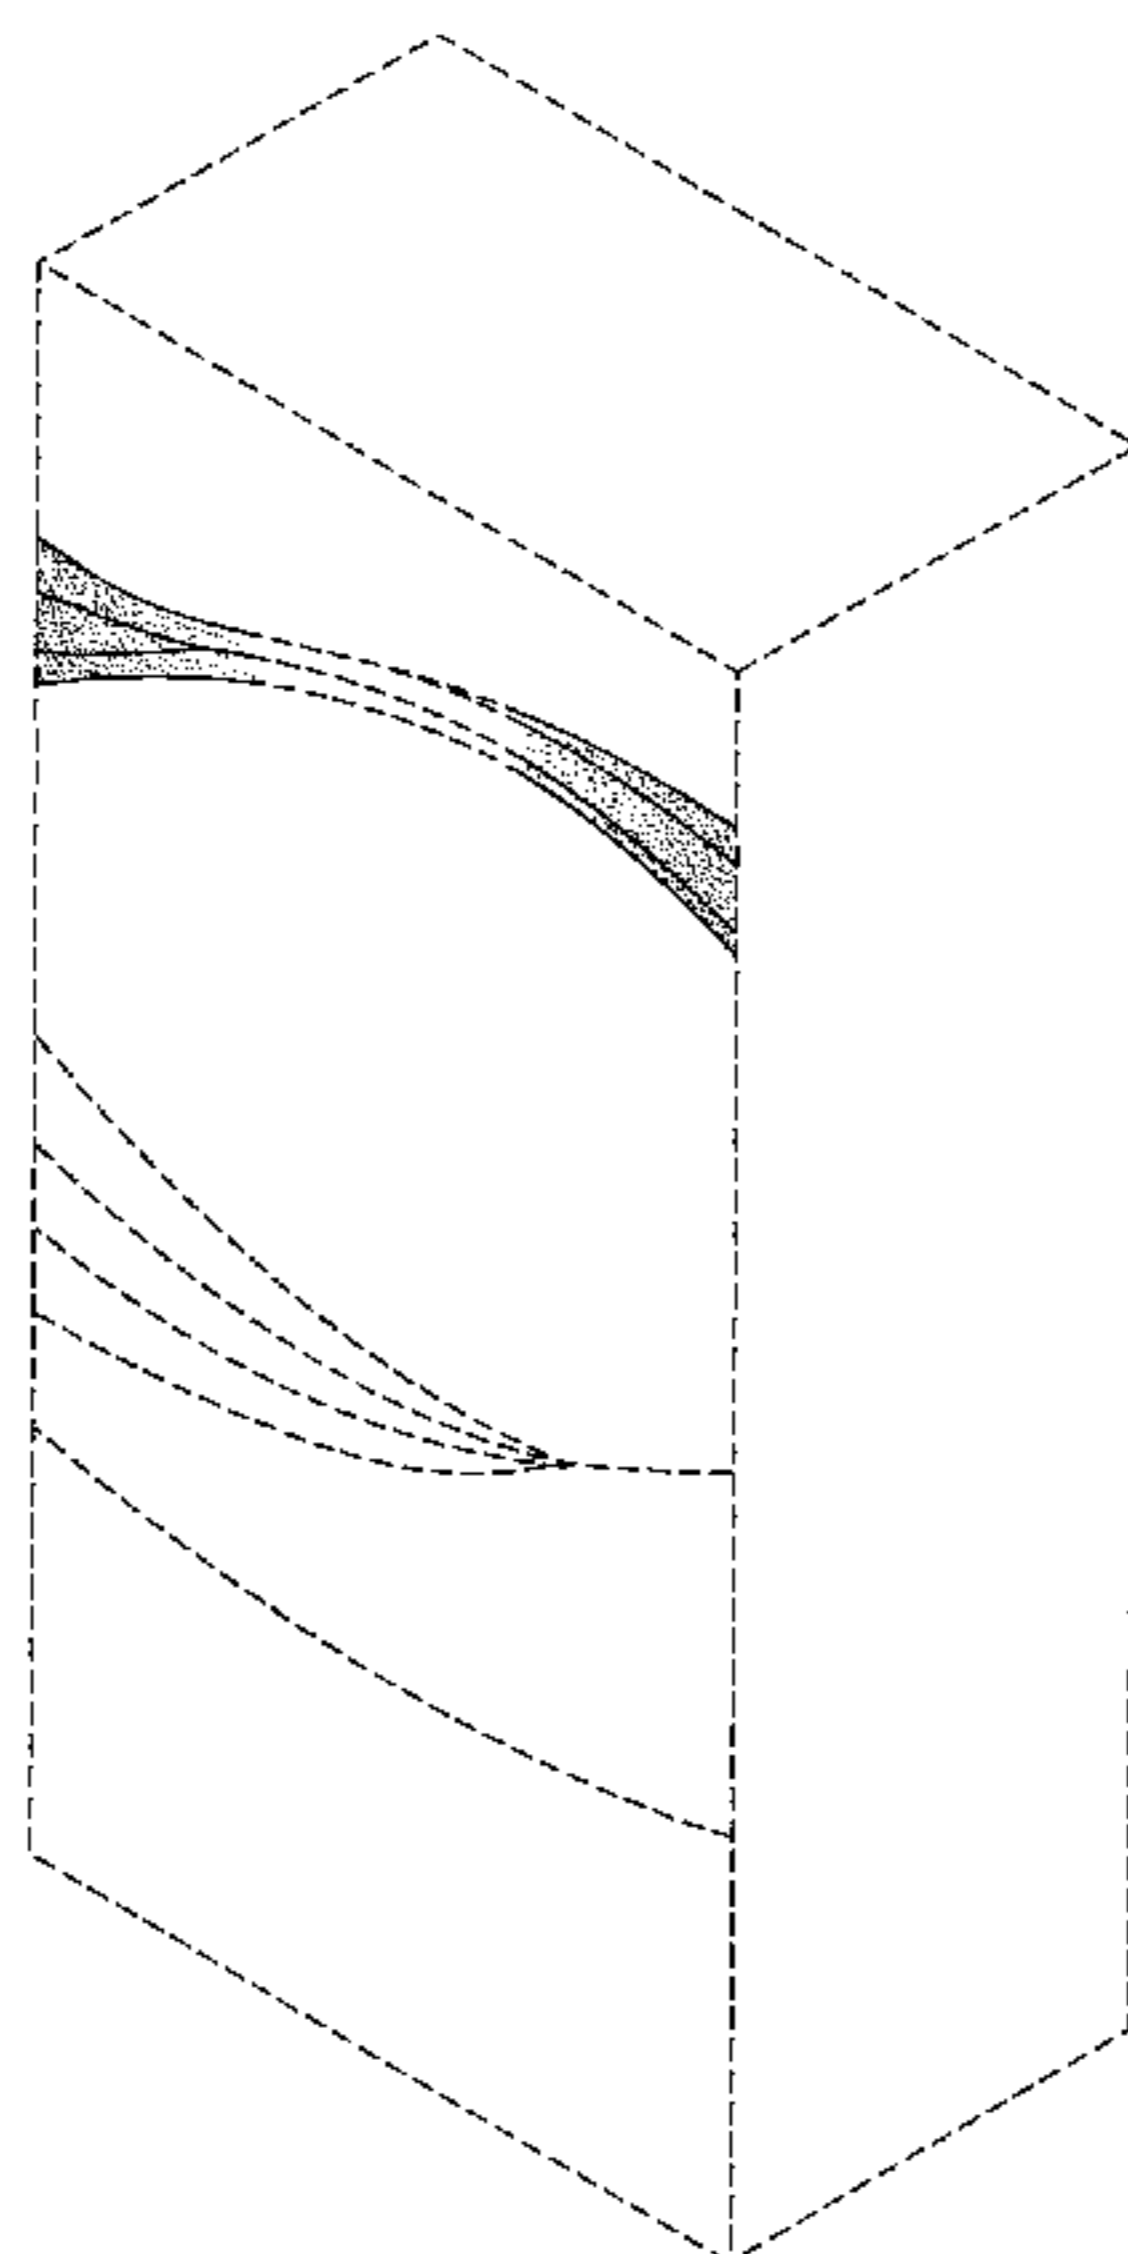

The ornamental design for an absorbent article package, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a second embodiment of an absorbent article package showing our new design; FIG. 2 is a front view of the absorbent article package shown in FIG. 1; FIG. 3 is a back side view of the absorbent article package shown in FIG. 1; FIG. 4 is a right side view of the absorbent article package shown in FIG. 1; FIG. 5 is a left view of the absorbent article package shown in FIG. 1; FIG. 6 is a bottom view of the absorbent article package shown in FIG. 1; and, FIG. 7 is a top view of the absorbent article package shown in FIG. 1.

The claim is directed to the stippled regions and the solid lines on the front of the design. It should be understood that the different features containing different stippling patterns are meant to visually distinguish the different features from one another in the design. By way of example, the different features may be visually distinct from one another via different colors and/or different shades of a color. The broken lines and the areas without stippling represent environmental subject matter that forms no part of the claimed design.
