(57) **CLAIM**

The ornamental design for a pair of motorcycle tank lift support members, substantially as shown and described.

FIG. 1 is a top, outside perspective view of one of the pair of motorcycle tank lift support members, it being understood that the top, outside perspective view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 2 is a outside view of one of the pair of motorcycle tank lift support members, it being understood that the outside view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 3 is an inside view of one of the pair of motorcycle tank lift support members, it being understood that the inside view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 4 is a top view of one of the pair of motorcycle tank lift support members, it being understood that the top view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 5 is a left side view of one of the pair of motorcycle tank lift support members, it being understood that the left side view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 6 is a right side view of one of the pair of motorcycle tank lift support members, it being understood that the right side view of the second of the pair of motorcycle tank lift support members is identical.

FIG. 7 is a bottom view of one of the pair of motorcycle tank lift support members, it being understood that the bottom view of the second of the pair of motorcycle tank lift support members is identical.

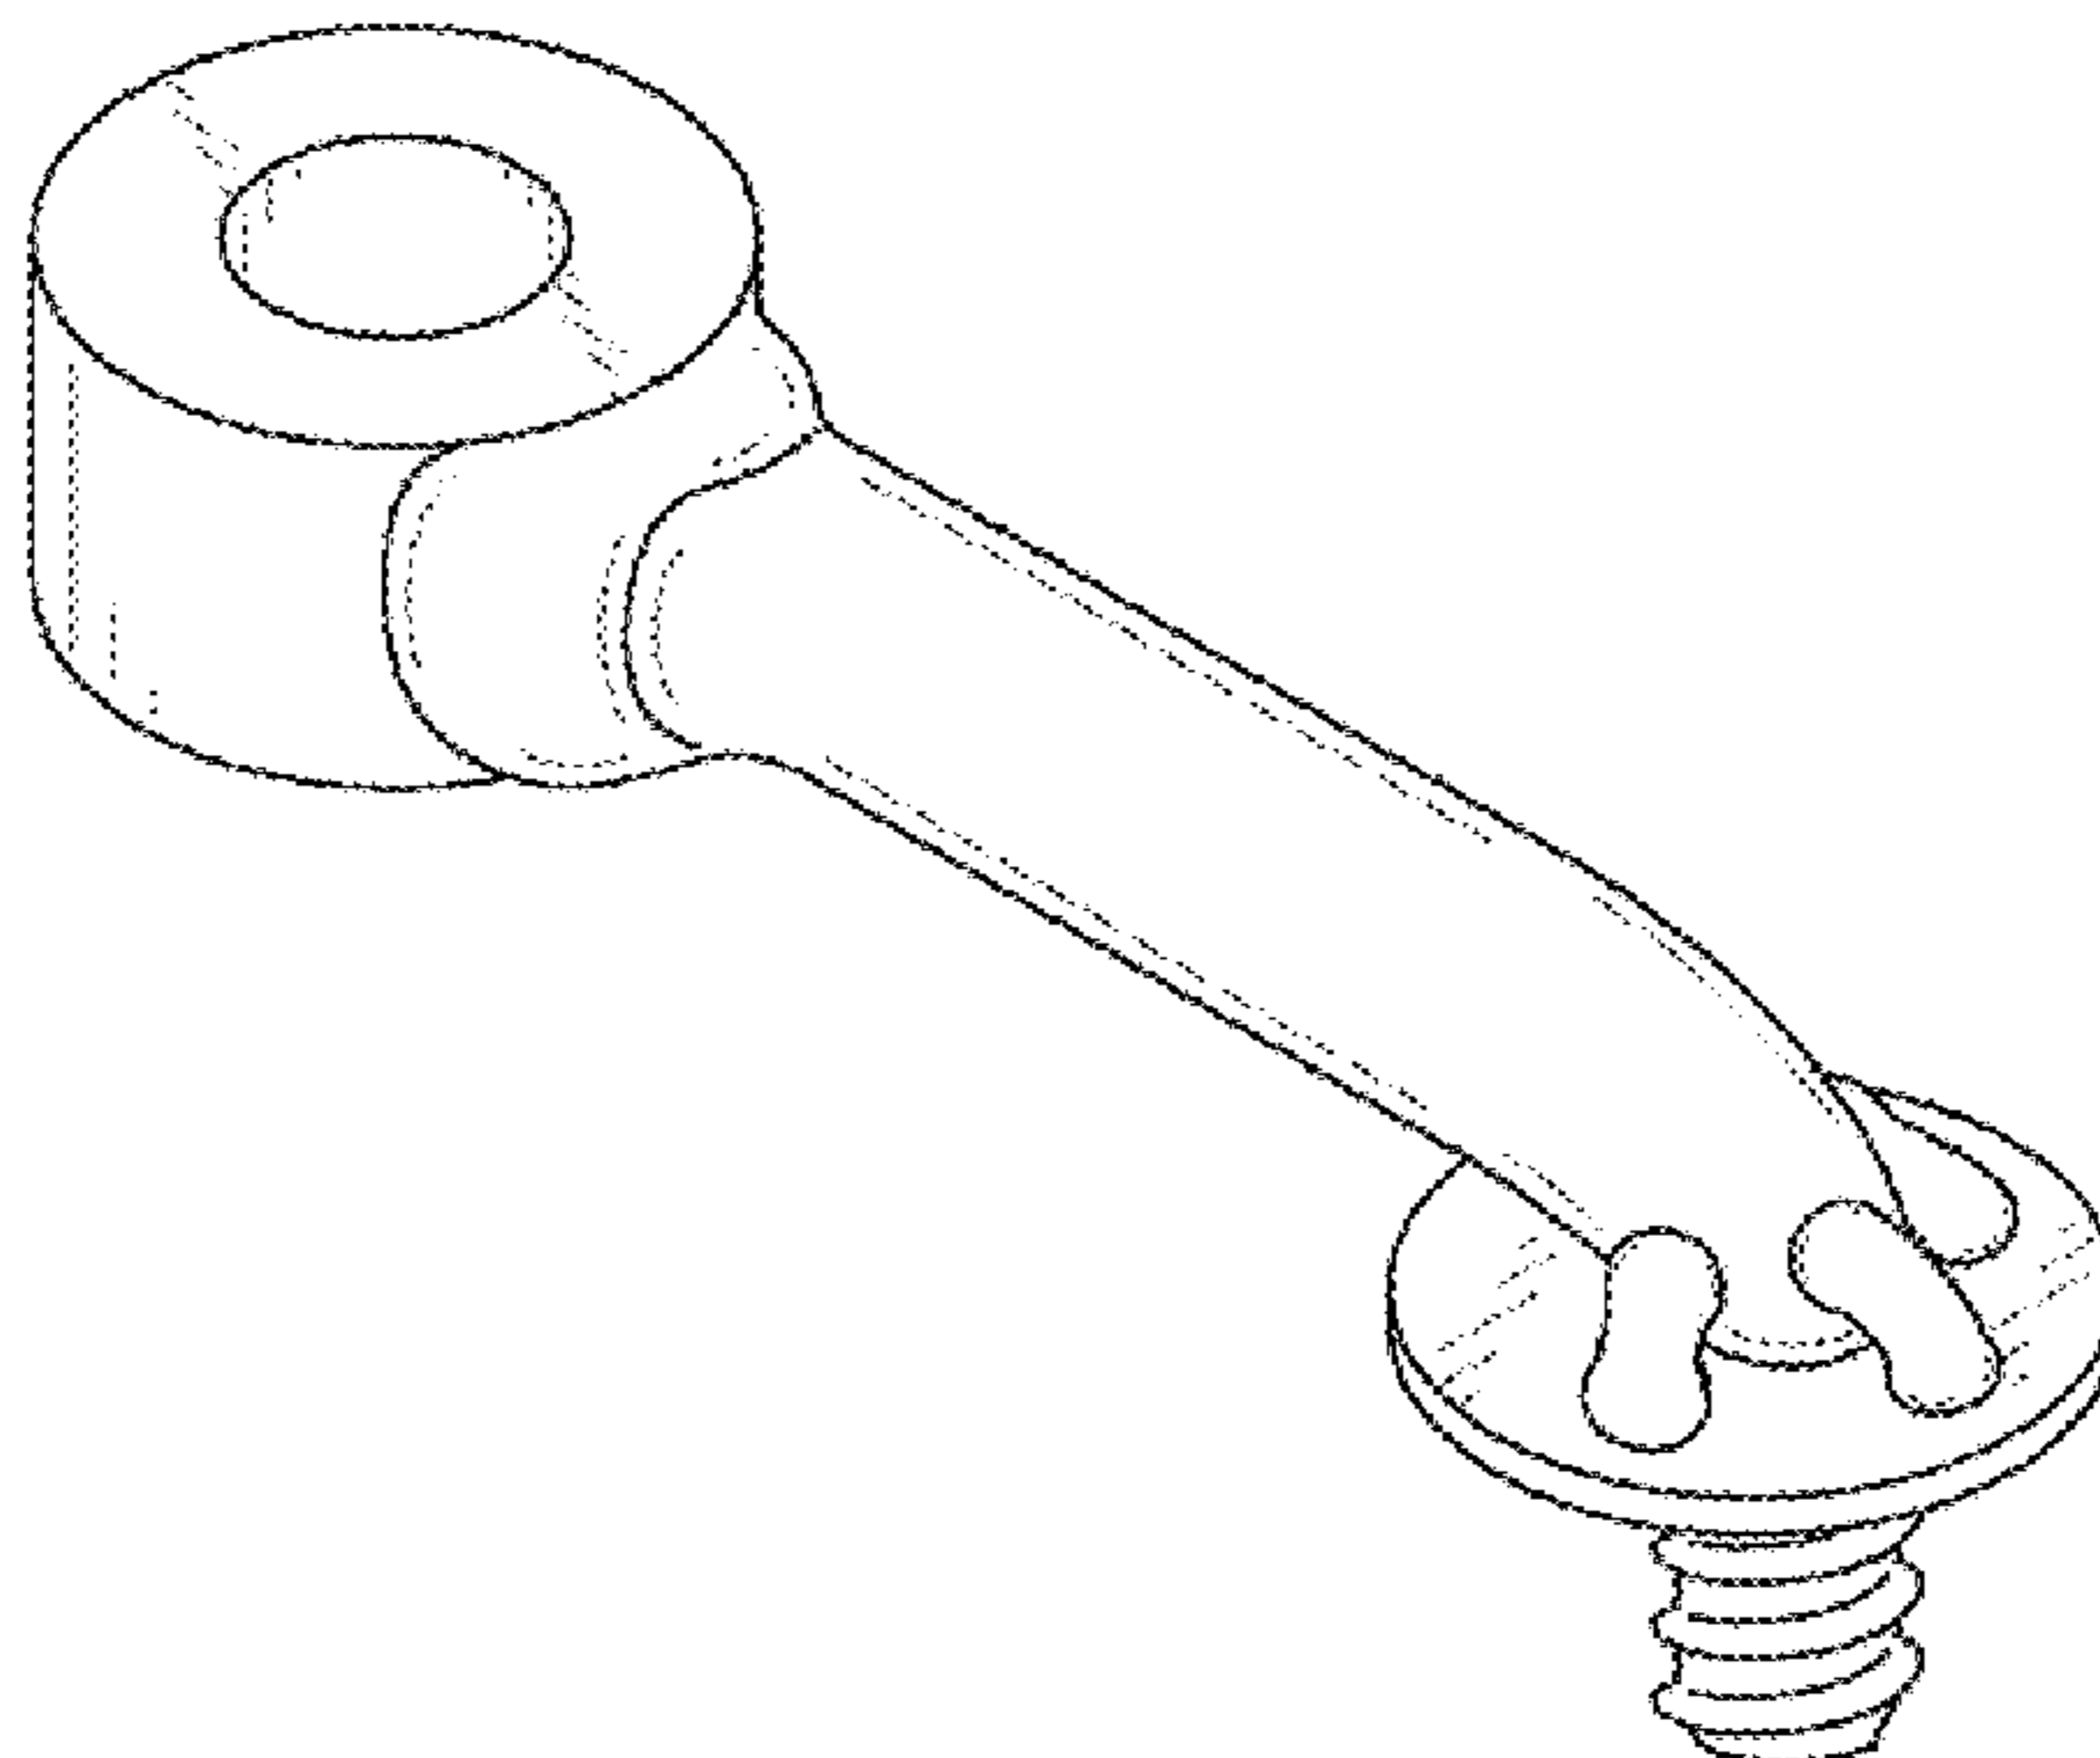

FIG. 8 depicts an outside view of one of the pair of motorcycle tank lift supports similar to FIG. 2, in an example of actual use; and,

FIG. 9 is an enlarged, detailed view of FIG. 8.

The broken lines showing a portion of a motorcycle are for illustrative purposes only and form no part of the claimed design.

The nature and use of this product is to lift motorcycle tanks.
