(57) **CLAIM**

The ornamental design for a chair, as shown and described.

FIG. 1 is a top, front, and right side perspective view of a chair, according to the present invention; FIG. 2 is a top perspective view of the chair of FIG. 1; FIG. 3 is a front perspective view of the chair of FIG. 1; FIG. 4 is a left side perspective view of the chair of FIG. 1, the right side perspective view being a minor image; FIG. 5 is a rear perspective view of the chair of FIG. 1; FIG. 6 is a bottom perspective view of the chair of FIG. 1; and, FIG. 7 is a top, rear, and right side perspective view of the chair of FIG. 1.

The broken lines showing a head pad extending from the top surface of the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.

The broken lines showing an adjustable steering wheel platform assembly extending from the steering base of the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.

The broken lines showing an adjustable foot pedal platform assembly of the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.

The broken lines shown on both sides of the bottom of the steering base of the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.

The broken lines showing a support bar under the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.

The broken lines showing a guide assembly under the chair in the drawing views are included for the purpose of showing the environment of the chair and forms no part of the claimed design.
