(57) **CLAIM**

The ornamental design for a wall mounted lighting fixture, as shown and described.

DESCRIPTION

FIG. 1 is a front bottom perspective view of a wall mounted lighting fixture showing our new design; FIG. 2 is a rear bottom perspective view thereof; FIG. 3 is a front elevational view thereof; FIG. 4 is an end elevational view thereof, the other end being a mirror image; FIG. 5 is a rear elevational view thereof; FIG. 6 is a bottom plan view thereof; and FIG. 7 is a top plan view thereof; and, FIG. 8 is a front bottom perspective view of a wall mounted lighting fixture showing an alternative embodiment of our new design.

The wall mounted lighting fixture of the claimed design is comprised of repeating multifaceted elements as shown and can be of any length. The rear of the wall mounted lighting fixture contains mounting and possibly other environmental structure, which form no part of the claimed design.

The embodiment of the wall mounted lighting fixture shown in FIG. 8 is identical to the embodiment of the wall mounted lighting fixture shown in FIGS. 1-7, except for the number of repeating elements between he ends of the lighting fixture. The embodiment of the wall mounted lighting fixture shown in FIG. 8 is broken away to indicate an indeterminate number of repeating elements and therefore indeterminate length.

The broken lines immediately adjacent shaded areas represent the bounds of the claimed design while all other broken lines are directed to environmental structure and are for illustrative purposes only; the broken lines form no part of the claimed design.
