DESCRIPTION

FIG. 1 is a bottom view thereof, wherein the carry strap is placed in a planar manner with the first end and second end of the longitudinal strap being disconnected and the first end and second end of the lateral strap being disconnected; and FIG. 2 is a top view thereof, wherein the carry strap is placed in a planar manner with the first end and second end of the longitudinal strap being disconnected and the first end and second end of the lateral strap being disconnected; and FIG. 3 is a left planar side view thereof; and FIG. 4 is a right planar side view thereof; and FIG. 5 is a perspective view thereof, wherein the first end and second end of the longitudinal strap are operably coupled and the first end and the second end of the lateral strap are operably coupled; and, FIG. 6 is a perspective view thereof, wherein the beverage container carry strap is engaged with a container and the torso area of a user.

The broken lines showing parts of the beverage container carry strap are for the purpose of showing portions of the article and form no part of the claimed design. The broken lines showing of the person and the beverage bottle in FIG. 6 is included for the purpose of showing environment, and forms no part of the claimed design.
