(57) **CLAIM**

I claim the ornamental design for the comforter with pouch, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a comforter with pouch according to the present invention with the pouch flap closed and the fabric closure passed through the opening in the pouch flap.

FIG. 2 is a back perspective view of the embodiment of FIG. 1.

FIG. 3 is an enlarged front view of the embodiment of FIG. 1 with the pouch flap opened.

FIG. 4 is a reduced scale front view of the embodiment of FIG. 1 with the comforter fabric strips extended from the pouch.

FIG. 5 is a back view of the embodiment of FIG. 1 with the comforter fabric strips extended.

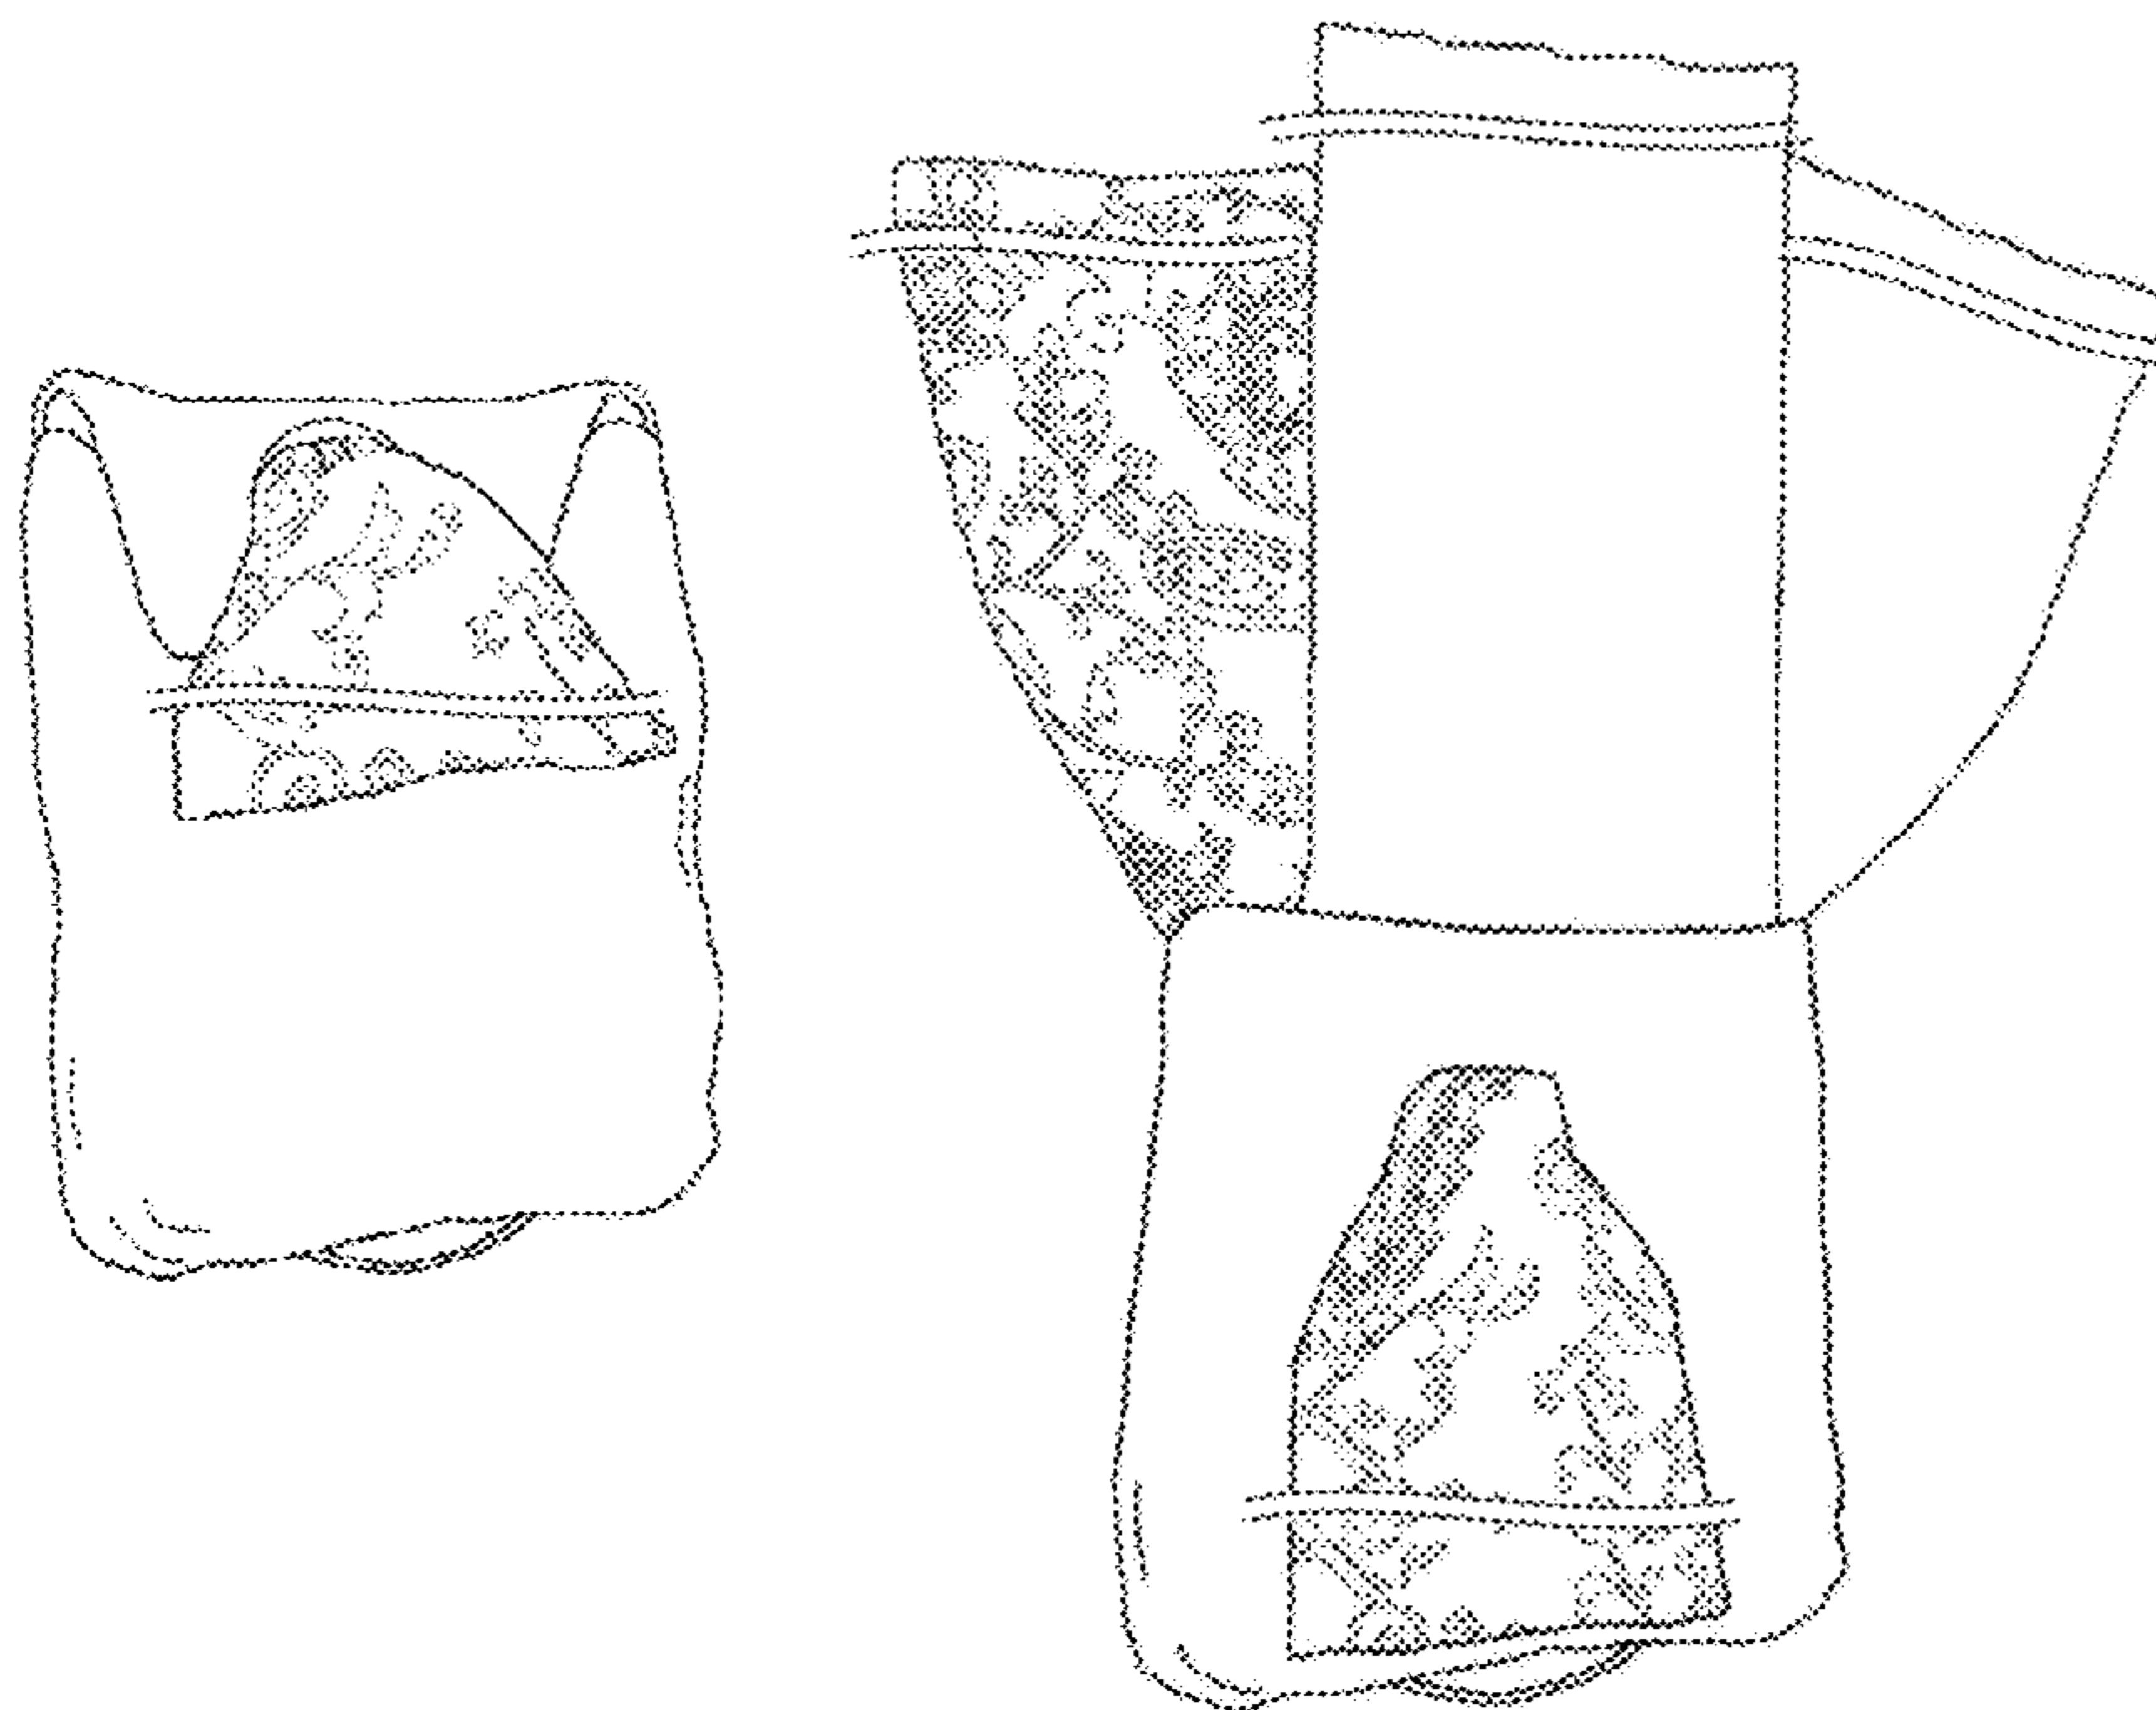

FIG. 6 is a side view of the embodiment of FIG. 1. The other side view would be a mirror image of the illustrated side view; and,

FIG. 7 is a bottom view of the embodiment of FIG. 1.

The broken lines showing the decorative pattern on the fabric strips and the fabric closure and the text on the bottom label are for illustrative purposes only and form no part of the claimed design. The fabric strips and the fabric closure shown in FIGS. 1, and 3-7 are shown with broken away portions to indicate that the fabric strips and the fabric closure are of no specific length.

The article in which the present design is embodied is a comforter with pouch for use by a baby or child for stimulation and security. The comforter with pouch consists of a fabric pouch with a plurality of fabric strips attached to the interior of the pouch so that the fabric strips can be folded completely within the pouch or unfolded to extend outside the mouth of the pouch.
