(57) **CLAIM**

The ornamental design for a rack mount networking device with cable management features, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a rack mount networking device with cable management features;

FIG. 2 is a top perspective view of a handle of the rack mount networking device of FIG. 1 shown enlarged and separated from the other identical handle for ease of illustration, where both latches on the handle are shown in a closed position of use;

FIG. 3 is a front of FIG. 2;

FIG. 4 is a back view of FIG. 2;

FIG. 5 is a side view of FIG. 2;

FIG. 6 is another side view of FIG. 2;

FIG. 7 is a top view of FIG. 2;

FIG. 8 is a bottom view of FIG. 2;

FIG. 9 is a top perspective view of the rack mount networking device with cable management features where the upper latch on each handle is shown in an open position of use;

FIG. 10 is a top perspective of a handle of the rack mount networking device of FIG. 9 shown enlarged and separated from the other identical handle for ease of illustration, where one latch on the handle is shown in an open position of use;

FIG. 11 is a front view of FIG. 10;

FIG. 12 is a back view of FIG. 10;

FIG. 13 is a side view of FIG. 10;

FIG. 14 is another side view of FIG. 10;

FIG. 15 is a top view of FIG. 10;

FIG. 16 is a bottom view FIG. 10;

FIG. 17 is a top perspective view of the rack mount networking device with cable management features where the lower latch on each handle is shown in an open position of use;

FIG. 18 is a top perspective view of a handle of the rack mount networking device of FIG. 17 shown enlarged and separated from the other identical handle for ease of illustration, where the lower latch on the handle is shown in an open position of use;

FIG. 19 is a front FIG. 18;

FIG. 20 is a back view FIG. 18;

FIG. 21 is a side view of FIG. 18;

FIG. 22 is another side view of FIG. 18;

FIG. 23 is a top view FIG. 18;

FIG. 24 is a bottom view of FIG. 18;

FIG. 25 is a top perspective view of the rack mount networking device with cable management features where the upper and lower latches on each handle are shown in an open position of use;

FIG. 26 is a top perspective view of a handle of the rack mount networking device of FIG. 25 shown enlarged and separated from the other identical handle for ease of illustration, where the upper and lower latches on the handle are shown in an open position of use;

FIG. 27 is a front view of FIG. 26;

FIG. 28 is a back view of FIG. 26;

FIG. 29 is a side view FIG. 26;

FIG. 30 is another side view of FIG. 26;

FIG. 31 is a top view of FIG. 26; and,

FIG. 32 is a bottom of FIG. 26.

The broken lines shown on the invention illustrate a boundary of the claim and, further, the broken lines representing a structure upon which the invention is mounted are shown for illustrative purposes only. The broken lines form no part of the claimed design.
