(57) **CLAIM**

The ornamental design for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire showing our new design,
it being understood that the pattern repeats uniformly
throughout the circumference of the tread;
FIG. 2 is a front elevational view thereof;
FIG. 3 is a right side elevational view thereof; the opposite
side elevational view being identical thereto;
FIG. 4 is an enlarged fragmentary front elevational view
thereof;
FIG. 5 is a perspective view of a second embodiment of a tire
showing our new design, it being understood that the pattern
repeats uniformly throughout the circumference of the tread
and that the opposite side view is identical thereto; and,
FIG. 6 is a front elevational view of a second embodiment, it
being understood that an enlarged fragmentary view thereof
would be substantially identical to that shown in FIG. 4, with
the exception of the inclusion of the sidewall in solid lines.
In the drawings, the broken lines showing of the sidewall,
inner bead and the peripheral boundary between the tire tread
and the sidewall in FIGS. 1 through 4 depict environmental
subject matter and form no part of the claimed design.
