(57) **CLAIM**

The ornamental design for a trailer with pivoted cover members, as shown and described.

DESCRIPTION

FIG. 1 is a right side elevational view of a trailer with pivoted cover members being shown in a closed position showing my new design;

FIG. 2 is a right side elevational view of the trailer with the distal cover member being moved into a vertical opened position and the proximal cover member being moved into a horizontal opened position;

FIG. 3 is a left side elevational view thereof with the cover members in the closed position;

FIG. 4 is a left side elevational view thereof with the proximal cover member being moved into the vertical opened position; FIG. 5 is a front elevational view thereof with the cover members in the closed position;

FIG. 6 is a front elevational view thereof with the left cover member in a vertical opened position and the right cover member in the horizontal opened position;

FIG. 7 is a rear elevational view thereof with the cover members in the closed position;

FIG. 8 is a rear elevational view thereof with the left cover member in a vertical opened position and the right cover member in the horizontal opened position;

FIG. 9 is a top plan view thereof with the cover members in the closed position;

FIG. 10 is a top plan view thereof with the left cover member in a vertical opened position and the right cover member in the horizontal opened position;

FIG. 11 is a bottom plan view thereof with the cover members in the closed position;

FIG. 12 is a bottom planview thereof with the left cover member in a vertical opened position and the right cover member in the horizontal opened position;

FIG. 13 is a left front perspective view thereof with the cover members in the closed position;

FIG. 14 is a left front perspective view thereof with the left cover member in a vertical opened position and the right cover member in the closed position;

FIG. 15 is a left rear perspective view thereof with the cover members in the closed position; and,

FIG. 16 is a left rear perspective view thereof with the left cover member in a vertical opened position and the right cover member in the horizontal opened position.

The broken lines in the drawings show wheels, a frame and a hitch for a trailer and form no part of the claimed design.
