(57) **CLAIM**

The ornamental design for a display panel or screen with computer generated image, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a first image of a display panel or screen with computer generated image showing our new design, wherein the pointer is at a first position;

FIG. 2 is a front elevational view of a second image of a display panel or screen with computer generated image, wherein the pointer is at a second position;

FIG. 3 is a front elevational view of a third image of a display panel or screen with computer generated image showing our new design, wherein the pointer is at a third position; and,

FIG. 4 is a front elevational view of a fourth image of a display panel or screen with computer generated image, wherein the pointer is at a fourth position.

The claimed design is an integral and active component in the operation of a computer-programmed device displaying the design.

The appearance of the transitional image sequentially transitions between or among the images shown in FIGS. 1-4. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken line showing of a display panel or screen and the elements thereof illustrate the unclaimed environment of the claimed design and form no part thereof.
