(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the front view of the display screen with graphical user interface in a first appearance state;

FIG. 2 is the front view of the display screen with graphical user interface in a second appearance state;

FIG. 3 is the front view of the display screen with graphical user interface in a third appearance state;

FIG. 4 is the front view of the display screen with graphical user interface in a fourth appearance state;

FIG. 5 is the front view of the display screen with graphical user interface in a fifth appearance state;

FIG. 6 is the front view of the display screen with graphical user interface in a sixth appearance state;

FIG. 7 is the front view of the display screen with graphical user interface in a seventh appearance state. FIG. 7 is also the front view of the display screen with graphical user interface in a first appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter;

FIG. 8 is the front view of the display screen with graphical user interface in a second appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter;

FIG. 9 is the front view of the display screen with graphical user interface in a third appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter;

FIG. 10 is the front view of the display screen with graphical user interface in a fourth appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter;

FIG. 11 is the front view of the display screen with graphical user interface in a fifth appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter;

FIG. 12 is the front view of the display screen with graphical user interface in a sixth appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter; and,

FIG. 13 is the front view of the display screen with graphical user interface in a seventh appearance state, wherein the display screen with graphical user interface is illustrated with alternative unclaimed subject matter.

The broken line showing of the electronic device and display screen illustrates unclaimed environment and forms no part of the claimed design. The broken line showing of the portions of the graphical user inference illustrates unclaimed portions of the design and forms no part of the claimed design.

The appearance of the graphical user interface sequentially transitions between the images shown in FIGS. 1-7 and FIGS. 7-13. The process or period in which one image transitions to another image forms no part of the claimed design.
