(57) **CLAIM**

The ornamental design for a communications system for a helmet, as shown and described.

DESCRIPTION

FIG. 1 is a side elevational view of a communications system for a helmet in an assembled position showing our new design;

FIG. 2 is a top plan view of the communications system of FIG. 1;

FIG. 3 is a side perspective view of the assembled communications system showing a communications module, a base and audio components thereof;

FIG. 4 is a front and bottom perspective view of the assembled communications system secured to the helmet;

FIG. 5 is a top and side perspective view of FIG. 1, a communications system for a helmet, the communications module is shown separately for purposes of illustration;

FIG. 6 is a top exploded perspective view of FIG. 1, a communication system for a helmet, the base and communication module is shown separately for purposes of illustration;

FIG. 7 is a right side elevation view of the communications module of the system of FIG. 1;

FIG. 8 is a left side elevation view of communications module of the system of FIG. 1;

FIG. 9 is a top plan view of the communications module of the system of FIG. 1;

FIG. 10 is a bottom plan view of the communications module of FIG. 1;

FIG. 11 is a first end elevation view of the communications module of FIG. 1;

FIG. 12 is a second end elevation view of the communications module of FIG. 1;

FIG. 13 is a side elevational view of FIG. 1, a communication system for a helmet, the base is shown separately for purposes of illustration;

FIG. 14 is a bottom plan view of the base of FIG. 1;

FIG. 15 is a top plan view of the base of FIG. 1;

FIG. 16 is a bottom plan view of the communications system in the assembled position; and,

FIG. 17 is a left side elevation view of the communications system in the assembled position.

The broken lines shown in FIGS. 1-17 are for illustrative purposes only and form no part of the claimed design.
