(57) **CLAIM**

The ornamental design for a combined pet toy and treat dispenser, as shown and described.

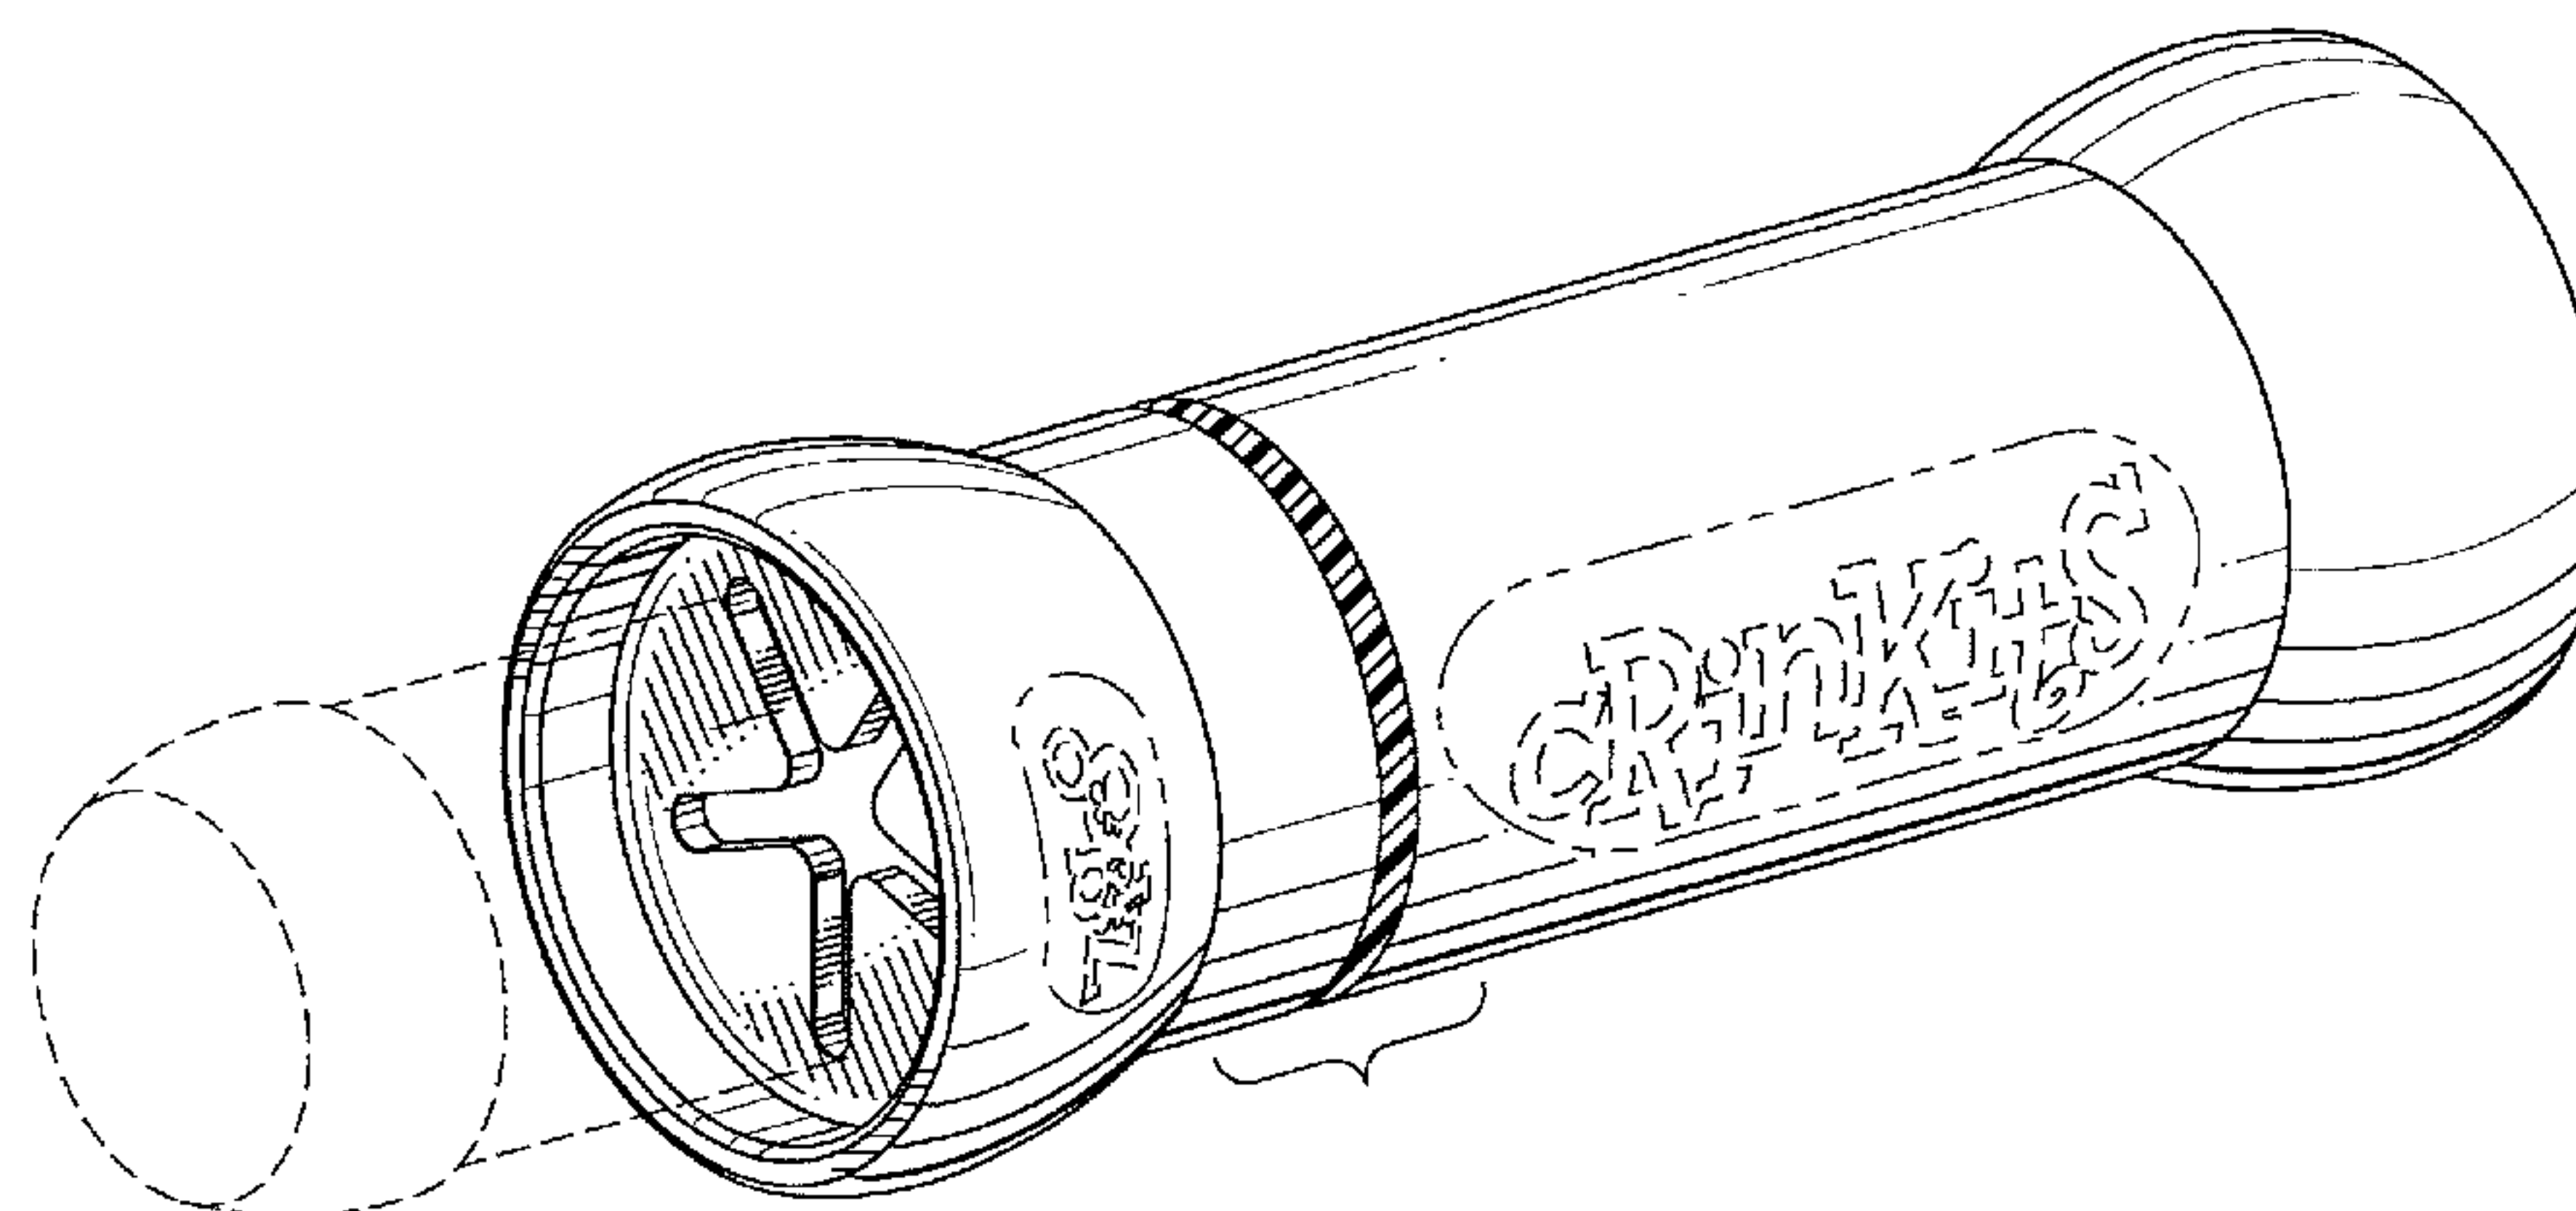

DESCRIPTION

FIG. 1 is a perspective view of a combined pet toy and treat dispenser showing my new design, shown with an empty plastic water bottle positioned adjacent an opening in the toy; FIG. 2 is a perspective view thereof, showing the empty plastic water bottle partially inserted within the toy; FIG. 3 is a front view thereof, the rear, top, and bottom views are identical to the front view without the indicia; FIG. 4 is a side view thereof; and, FIG. 5 is a side view thereof, showing the opposite side from that shown in FIG. 4.

The broken lines in the drawings showing the bottle and indicia are included for purposes of illustrating environmental features that form no part of the claimed design. The broken lines in the drawings surrounding the indicia are included for purposes of illustrating boundary lines indicating that the boundaries containing the indicia are portions of the article that form no part of the claimed design.

The separation and a bracket in FIGS. 1-3 indicate, for ease of illustration, that the precise length of the combined pet toy and treat dispenser is not claimed.
