(57) **CLAIM**

The ornamental design for a combined trash and recycling bin, as shown.

DESCRIPTION

FIG. 1 is a front view of the combined trash and recycling bin with its rim and lid attached and in the closed position.

FIG. 2 is a rear view thereof.

FIG. 3 is a front view thereof with the lid in an open position.

FIG. 4 is a rear view thereof with the lid a closed position.

FIG. 5 is a left side view thereof.

FIG. 6 is a left side view thereof with the lid in an open position.

FIG. 7 is a top view thereof with the lid in a closed position with the front orientated towards the bottom of the page.

FIG. 8 is a top view thereof with the lid in an open position.

FIG. 9 is a perspective view thereof from above with the lid removed.

FIG. 10 is a perspective view thereof from below with the lid removed.

FIG. 11 is a front view thereof with the lid removed.

FIG. 12 is a side view thereof with the lid removed.

FIG. 13 is a perspective view of the rim from viewed below with the lid removed.

FIG. 14 is a left side view of the rim with the lid in an open position.

FIG. 15 is a side view of the rim with the lid in an open position.

FIG. 16 is a front view of the rim with the lid in an open position.

FIG. 17 is a front view of the rim with the lid in a closed position.

FIG. 18 is a rear view of the rim with the lid in an open position.

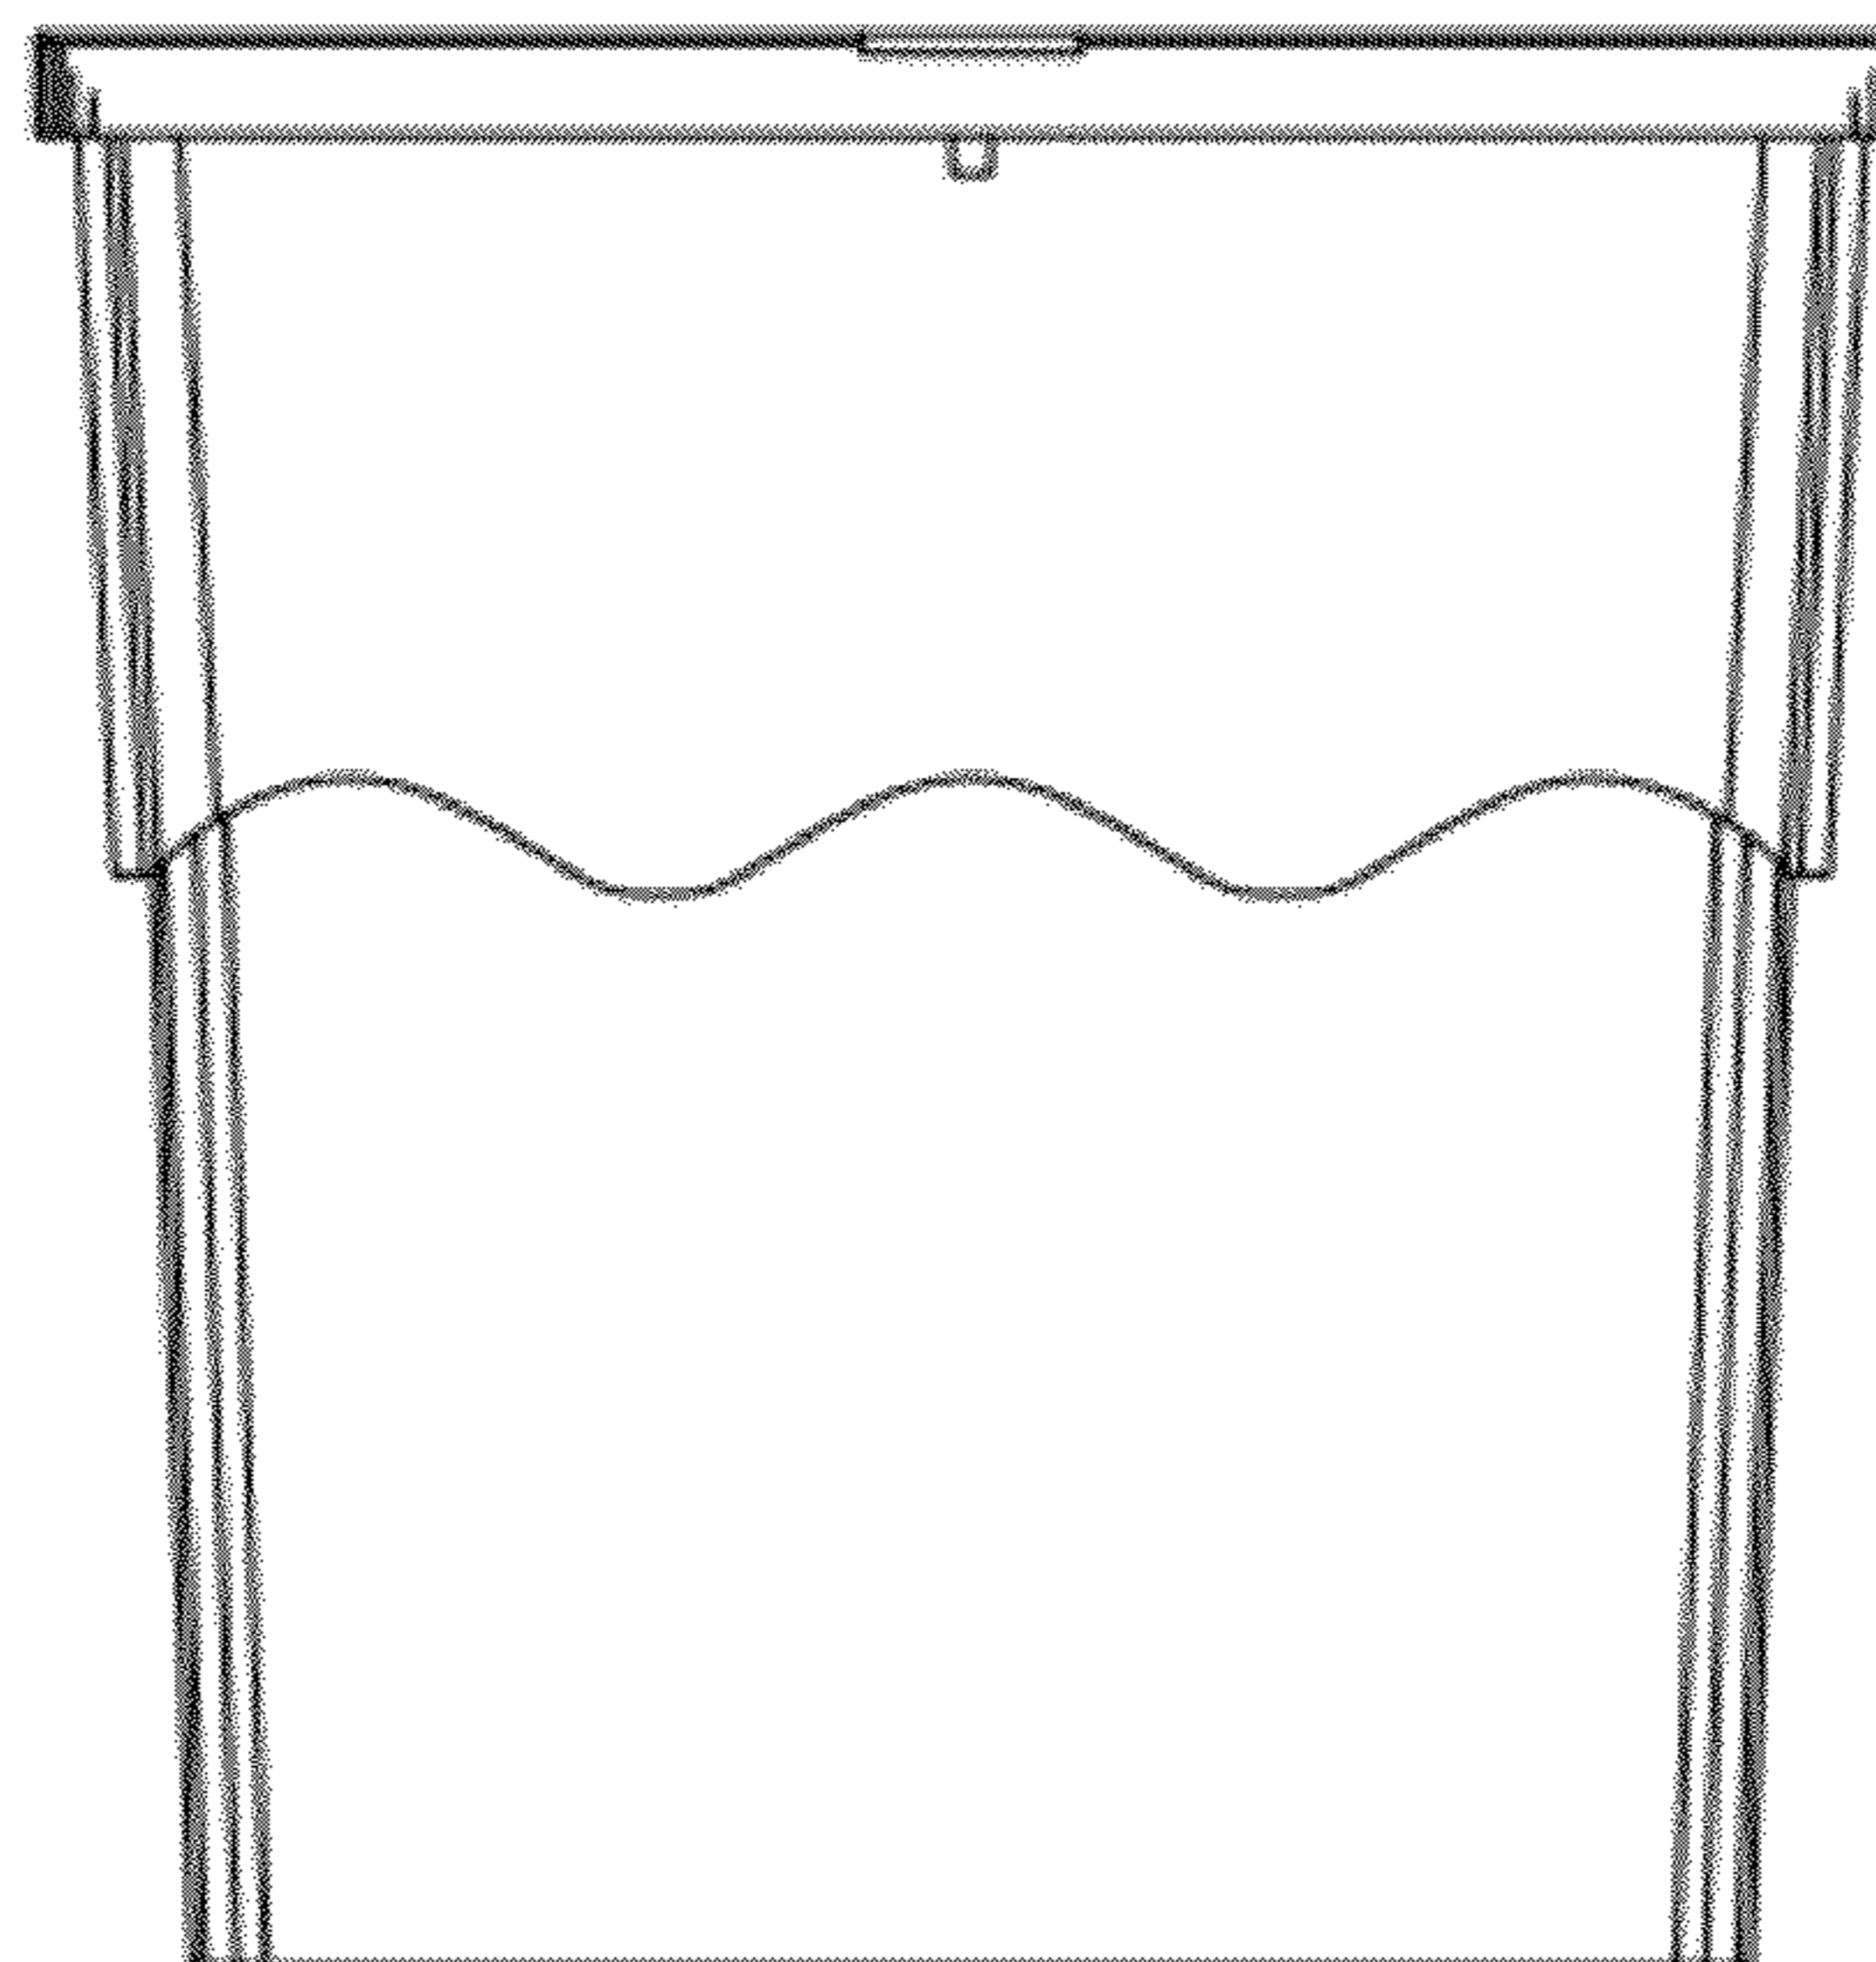

FIG. 19 is a rear view of the rim with the lid in a closed position; and,

FIG. 20 is an exploded perspective view of a second embodiment of the combined trash and recycling bin showing the lid, rim, and container with the lid in a closed position; the second embodiment has a smooth top surface on the lid.

The body of the bin, the rim and lid are shown separated in FIGS. 9 through 19 for convenience of illustration.

The only difference between the first and second embodiment is the smooth surface on the lid, it being understood that all the other elements of the second embodiment are the same as the first embodiment.
