(57) **CLAIM**

The ornamental design for an optical instrument, as shown and described.

DESCRIPTION

FIG. **1** is a left side elevational view of an optical instrument according to a first embodiment of the present invention.

FIG. **2** is a right side elevational view of the optical instrument of FIG. **1**.

FIG. **3** is a front elevational view of the optical instrument of FIG. **1**.

FIG. **4** is a rear elevational view of the optical instrument of FIG. **1**.

FIG. **5** is a top plan view of the optical instrument of FIG. **1**.

FIG. **6** is a bottom plan view of the optical instrument of FIG. **1**.

FIG. **7** is a three quarter view of the optical instrument of FIG. **1**.

FIG. **8** is a left side elevational view of an optical instrument according to a second embodiment of the present invention.

FIG. **9** is a right side elevational view of the optical instrument of FIG. **8**.

FIG. **10** is a front elevational view of the optical instrument of FIG. **8**.

FIG. **11** is a rear elevational view of the optical instrument of FIG. **8**.

FIG. **12** is a top plan view of the optical instrument of FIG. **8**.

FIG. **13** is a bottom plan view of the optical instrument of FIG. **8**; and,

FIG. **14** is a three quarter view of the optical instrument of FIG. **8**.

The broken line immediately adjacent the shaded areas represent the bounds of the claimed design while all other broken lines are directed to environment and are for illustrative purpose only; the broken lines form no part of the claimed design.
