(57) **CLAIM**

We claim the ornamental design for a flexible garment for supporting a small portable electronic device, as shown and described.

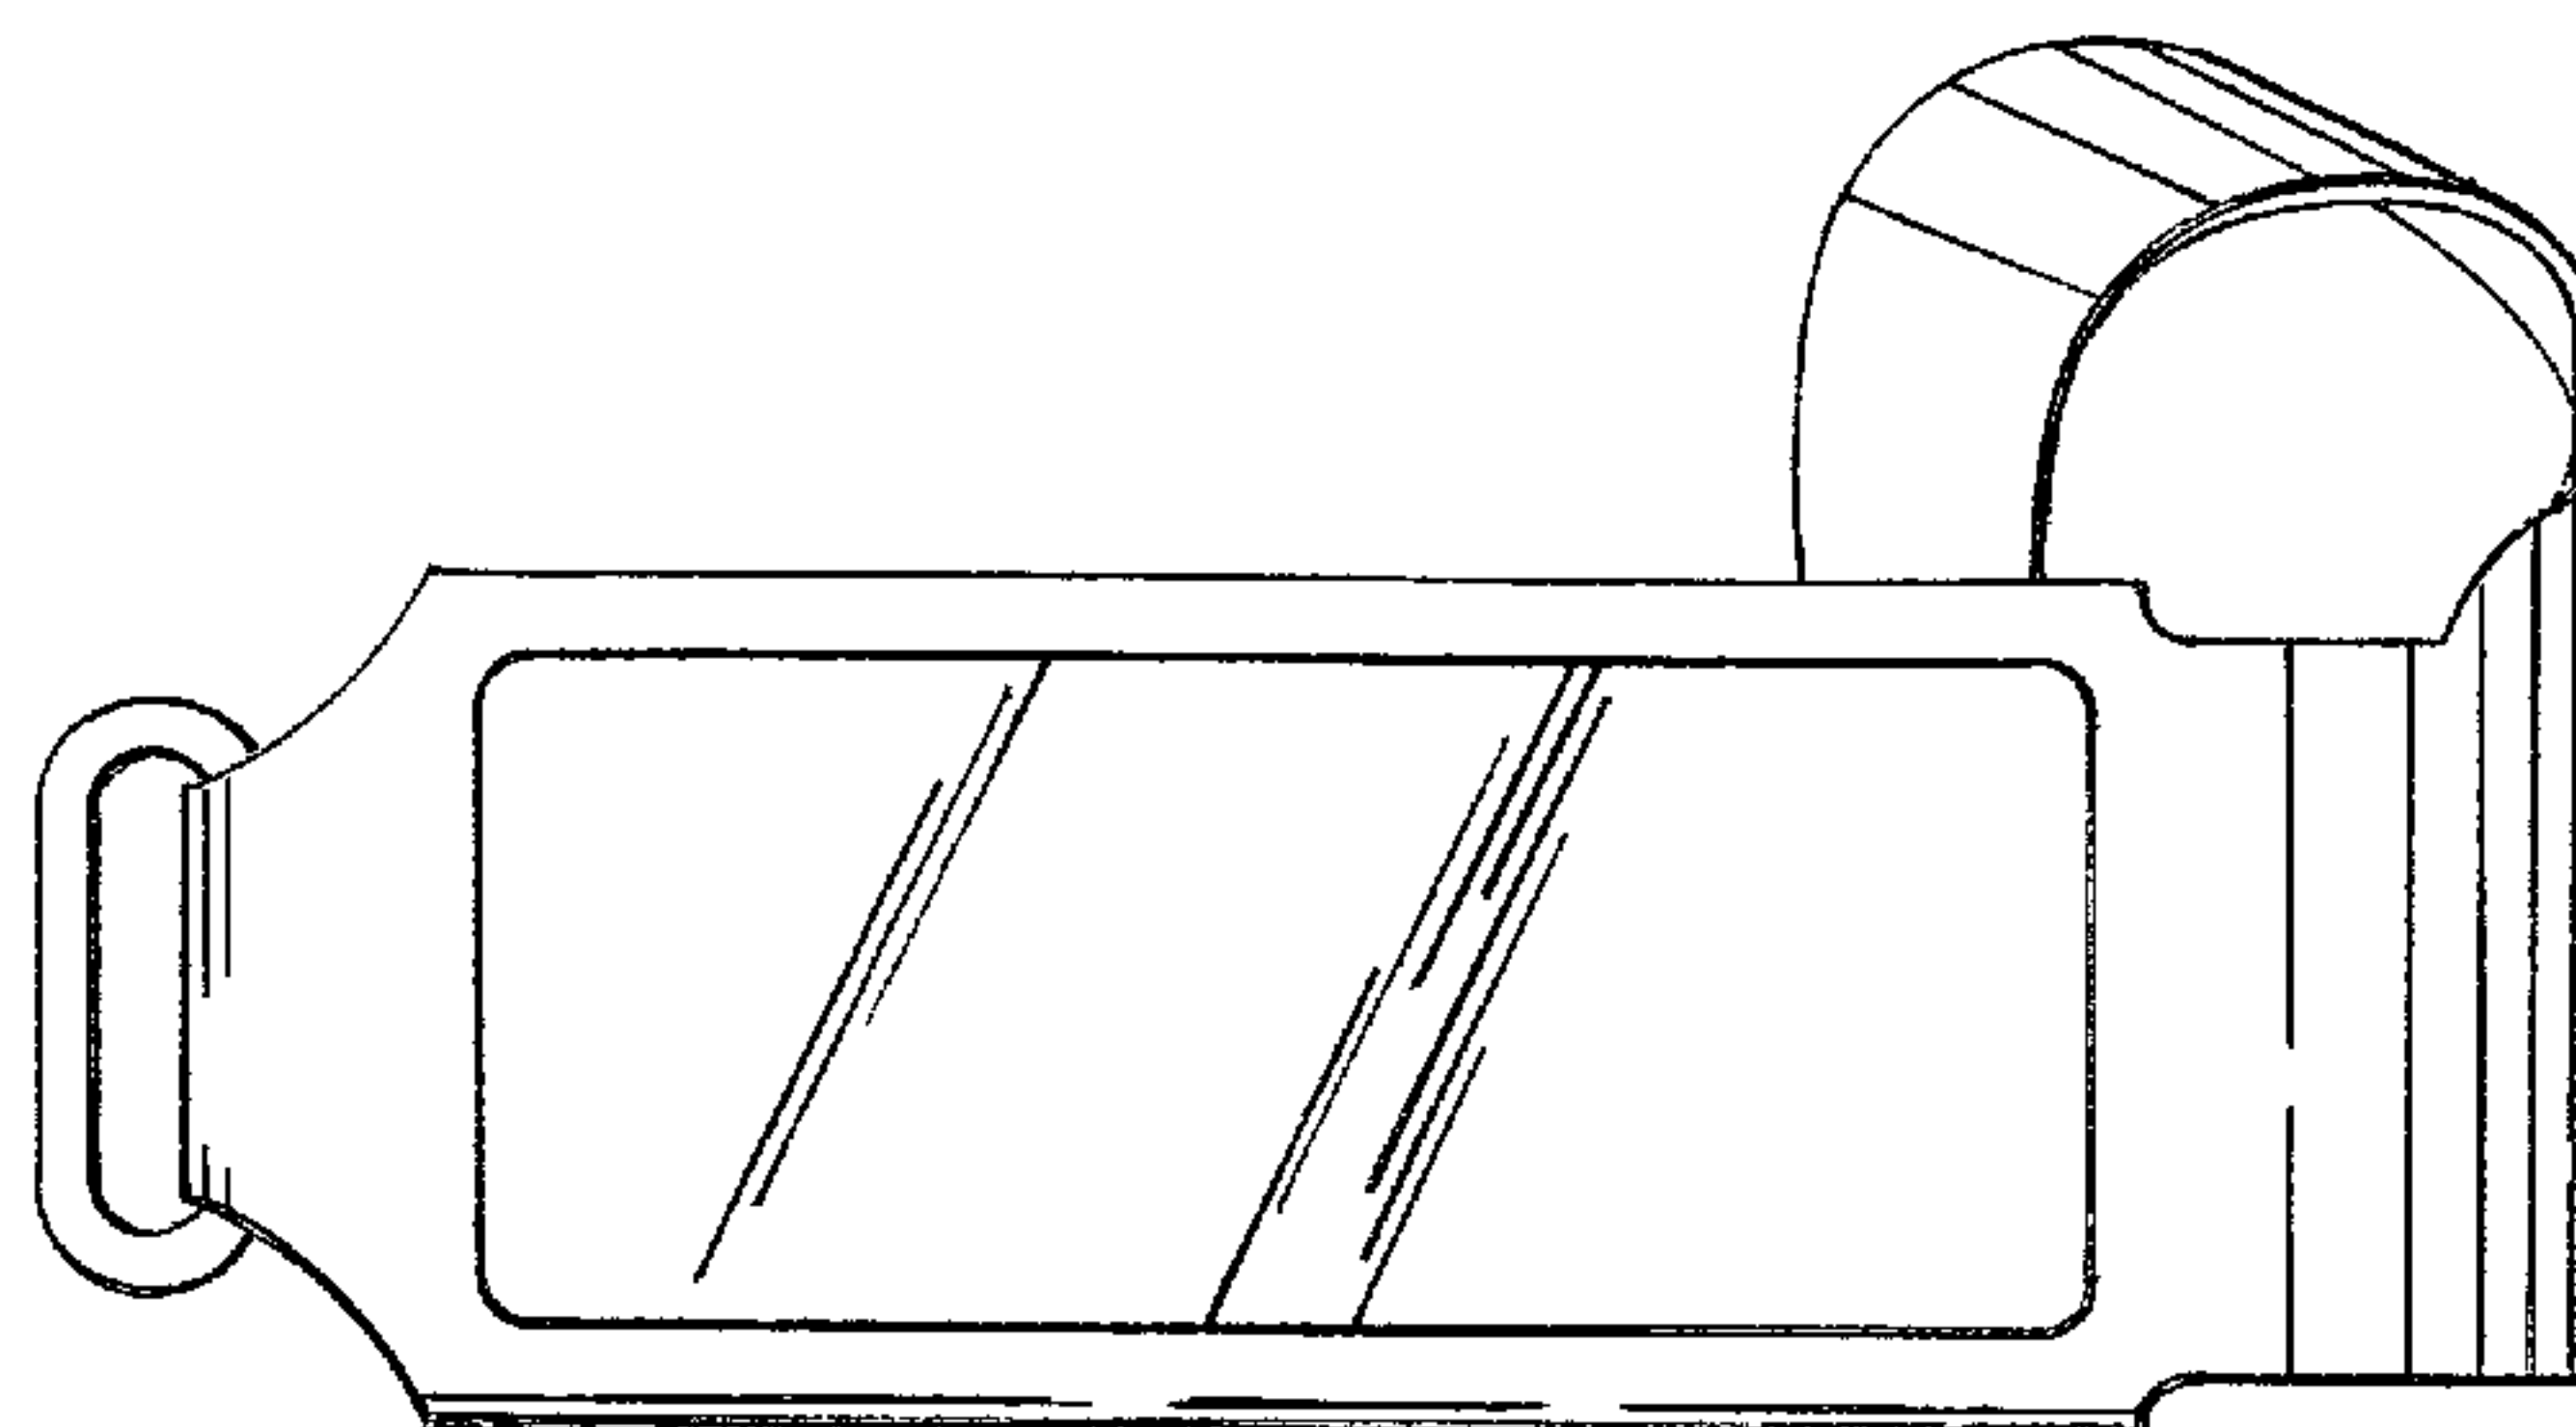

**DESCRIPTION**

FIG. 1 is a front view of our new design, and includes a depiction of a transparent pocket portion for containing a small portable electronic device;  
FIG. 2 is a right side view thereof;  
FIG. 3 is a rear view thereof, with a strap portion thereof removed to indicate indefinite length;  
FIG. 4 is a left side view thereof;  
FIG. 5 is a top view thereof; and,  
FIG. 6 is a bottom view thereof.

Portions broken away or not shown form no part of the claimed design. No appearance feature of any part of the garment located behind a transparent window shown in with FIG. 1.

Because the garment is flexible, those skilled in the art will appreciate that configurations exhibited by the garment are likely to vary depending, at least in part, on how the garment is worn, positioned or supported.
