(57) **CLAIM**

The ornamental design for a portion of a display screen with  
icon, as shown and described.

**DESCRIPTION**

Concurrently filed design applications including at least the  
first two above-named applicants are directed to other icons  
envisioned to be shown on a display screen under the control  
of a microprocessor.

The FIGURE is a front view of a portion of a display screen  
with icon showing our new design.

The broken line showing a portion of the display screen is for  
illustrative purposes only and forms no part of the claimed  
design.

One interpretation of the icon is that it shows a walnut.
