(57) **CLAIM**

The ornamental design for a display housing for a handheld inspection device, as shown and described.

DESCRIPTION

FIG. **1** is a front perspective view of an exemplary handheld inspection device that embodies a display housing in accordance with the principles of the present design;
FIG. **2** is a front perspective view of a first embodiment of the display housing for a handheld inspection device;
FIG. **3** is a front view of the first embodiment of the display housing for a handheld inspection device;
FIG. **4** is a rear view of the first embodiment of the display housing for a handheld inspection device;
FIG. **5** is a top view of the first embodiment of the display housing for a handheld inspection device;
FIG. **6** is a bottom view of the first embodiment of the display housing for a handheld inspection device;
FIG. **7** is a first side view of the first embodiment of the display housing for a handheld inspection device;
FIG. **8** is a second side view of the first embodiment of the display housing for a handheld inspection device;
FIG. **9** is a front perspective view of a second embodiment of the display housing for a handheld inspection device;

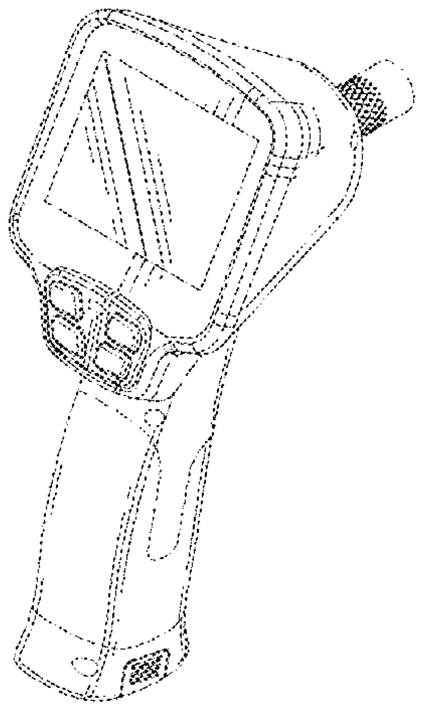

FIG. **10** is a front view of the second embodiment of the display housing for a handheld inspection device;
FIG. **11** is a rear view of the second embodiment of the display housing for a handheld inspection device;
FIG. **12** is a top view of the second embodiment of the display housing for a handheld inspection device;
FIG. **13** is a bottom view of the second embodiment of the display housing for a handheld inspection device;
FIG. **14** is a first side view of the second embodiment of the display housing for a handheld inspection device;
FIG. **15** is a second side view of the second embodiment of the display housing for a handheld inspection device;
FIG. **16** is a front perspective view of a third embodiment of the display housing for a handheld inspection device;
FIG. **17** is a front view of the third embodiment of the display housing for a handheld inspection device;
FIG. **18** is a rear view of the third embodiment of the display housing for a handheld inspection device;
FIG. **19** is a top view of the third embodiment of the display housing for a handheld inspection device;
FIG. **20** is a bottom view of the third embodiment of the display housing for a handheld inspection device;
FIG. **21** is a first side view of the third embodiment of the display housing for a handheld inspection device; and,
FIG. **22** is a second side view of the third embodiment of the display housing for a handheld inspection device. It is to be understood that the broken lines shown throughout the drawings are for illustrative purposes only and form no part of the present design.
