(57) **CLAIM**

The ornamental design for a connector for tubing, as shown and described.

DESCRIPTION

FIG. 1 is a left perspective view from the back and bottom sides of a first embodiment of a connector for tubing.

FIG. 2 is a right perspective view from the back and bottom sides of the connector for tubing shown in FIG. 1.

FIG. 3 is a right side view of the connector for tubing shown in FIG. 1.

FIG. 4 is a front view of the connector for tubing shown in FIG. 1.

FIG. 5 is a left side view of the connector for tubing shown in FIG. 1; and,

FIG. 6 is a bottom view of the connector for tubing shown in FIG. 1.

The designations of the views below as top, bottom, right side, left side, front, and back are for ease of discussion only and are not intended to limit the connector for tubing to one particular orientation. Broken lines are used in the drawings to show features of the invention that are included for the purpose of illustrating portions of the article, but form no part of the claimed design.
