(57) **CLAIM**

The ornamental designs for crusher block assembly for particulate size reduction system, as shown and described in the attached specification.

DESCRIPTION

FIG. 1 is a top view of a first embodiment of a crusher block assembly for particulate size reduction system in accordance with the present disclosure which is joined directly to a crusher block shown in broken lines;

FIG. 2 is a cross-sectional side elevation view of the crusher block assembly for particulate size reduction system of FIG. 1 in accordance with the present disclosure wherein the crusher block and grid are shown in broken lines;

FIG. 3 is a perspective view of the crusher block assembly for particulate size reduction system of FIG. 1 in accordance with the present disclosure; and,

FIGS. 4-5 are a cross-sectional side elevation and top view, respectively, of a second exemplary embodiment of a crusher block assembly for particulate size reduction system, which show an exemplary crusher block in broken lines.

The broken lines in the Figures are for illustrative purposes only, to show the crusher block assembly in its environment, and form no part of the claimed design.
