(57) **CLAIM**

The ornamental design for a pair of fold-over socks, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a person wearing one of the pair of fold-over socks on a right foot with the toes of their

foot covered by a closable toe portion, and having a first attachment member located on an upper portion of the closable toe portion and a second attachment member located on an upper portion of the sock;

FIG. 2 is perspective view of a person wearing one of the pair of fold-over socks on a right foot with the toes of their foot exposed by the closable toe portion being folded over and overlap the upper portion of the sock and secure the first and second attachment members;

FIG. 3 is a perspective view of a person wearing one of the pair of fold-over socks on a left foot with the toes of their foot covered by a closable toe portion, and having a first attachment member located on an upper portion of the closable toe portion and a second attachment member located on an upper portion of the sock;

FIG. 4 is perspective view of a person wearing one of the pair of fold-over socks on a left foot with the toes of their foot exposed by the closable toe portion being folded over and overlap the upper portion of the sock and secure the first and second attachment members;

FIG. 5 is a left side elevational view of one of the pair of fold-over sock shown in FIG. 1 depicting the closable toe portion overlapping the upper portion of the sock;

FIG. 6 is a right side elevational view of one of the pair of fold-over sock shown in FIG. 3 depicting the closable toe portion overlapping the upper portion of the sock;

FIG. 7 is a front elevational view of one of the pair of fold-over sock shown in FIG. 1 depicting the closable toe portion overlapping the upper portion of the sock; and,

FIG. 8 is a front view elevational view of one of the pair of fold-over sock shown in FIG. 3 depicting the closable top portion overlapping the upper portion of the sock.

The broken line showing of a leg in FIGS. 1-4 is included for the purpose of showing environmental structure associated with the use of the pair of fold-over socks and forms no part of the claimed design.

The zigzag lines shown in FIGS. 7 and 8 represent stitching.
