(57) **CLAIM**

The ornamental design for a solar-powered electronic reader cover, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a solar-powered electronic reader cover according to the present invention. FIG. 2 is a rear perspective view of a solar-powered electronic reader cover according to the present invention. FIG. 3 is a front elevation view of a solar-powered electronic reader cover according to the present invention. FIG. 4 is a right side elevation view of a solar-powered electronic reader cover according to the present invention. FIG. 5 is a left side elevation view of a solar-powered electronic reader cover according to the present invention. FIG. 6 is a front perspective view of a solar-powered electronic reader cover according to the present invention in an opened position; and, FIG. 7 is a top plan view of a solar-powered electronic reader cover according to the present invention in an opened position. The broken lines showing environmental structure represent unclaimed subject matter and form no part of the claimed design.
