(57) **CLAIM**

I claim the ornamental design for a trim kit for building construction, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a trim kit for building construction according to a first embodiment of the present design;

FIG. 2 is a front elevation view of the trim kit for building construction shown in FIG. 1;

FIG. 3 is a top plan view of the trim kit for building construction shown in FIG. 1;

FIG. 4 is a bottom plan view of the trim kit for building construction shown in FIG. 1;

FIG. 5 is a right end elevation view of the trim kit for building construction shown in FIG. 1;

FIG. 6 is a left end elevation view of the trim kit for building construction shown in FIG. 1;

FIG. 7 is a front perspective view of a trim kit for building construction according to a second embodiment of the present design;

FIG. 8 is a front elevation view of the trim kit for building construction shown in FIG. 7;

FIG. 9 is a top plan view of the trim kit for building construction shown in FIG. 7;

FIG. 10 is a bottom plan view of the trim kit for building construction shown in FIG. 7;

FIG. 11 is a right end elevation view of the trim kit for building construction shown in FIG. 7;

FIG. 12 is a left end elevation view of the trim kit for building construction shown in FIG. 7;

FIG. 13 is a front perspective view of a Trim Kit for Building Construction according to a third embodiment of the present design, which is similar to the six paneled design shown in FIG. 1, but is different only in that it includes five panels;

FIG. 14 is a front perspective view of a trim kit for building construction according to a fourth embodiment of the present design, which is similar to the six paneled design shown in FIG. 7, but is different only in that it includes five panels;

FIG. 15 is a front perspective view of a trim kit for building construction according to a fifth embodiment of the present design, which is similar to the six paneled design shown in FIG. 1, but is different only in that it includes four panels;

FIG. 16 is a front perspective view of a trim kit for building construction according to a sixth embodiment of the present design, which is similar to the six paneled design shown in FIG. 7, but is different only in that it includes four panels;

FIG. 17 is a front perspective view of a trim kit for building construction according to a seventh embodiment of the present design, which is similar to the six paneled design shown in FIG. 1, but is different only in that it includes three panels; and,

FIG. 18 is a front perspective view of a trim kit for building construction according to an eighth embodiment of the present design, which is similar to the six paneled design shown in FIG. 7, but is different only in that it includes three panels.

The stippling in FIGS. 1-6, 13, 15, and 17 is provided to illustrate textured surfaces, while FIGS. 7-12, 14, 16, and 18 contain no stippling.

The broken lines are for illustrative purposes only and form no part of the claimed design.

1 Claim, 12 Drawing Sheets
