(57) **CLAIM**

The ornamental design for a set of frying and steaming devices, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first and second embodiment of a frying and steaming device showing my new design; FIG. 2 is a top plan view thereof, taken in the direction of arrow 2 in FIG. 20; FIG. 3 is a bottom plan view thereof, taken in the direction of arrow 3 in FIG. 20; FIG. 4 is a right side elevational view thereof, taken in the direction of arrow 4 in FIG. 20; FIG. 5 is a left side elevational view thereof, taken in the direction of arrow 5 in FIG. 20; FIG. 6 is a front elevational view thereof, taken in the direction of arrow 6 in FIG. 20; FIG. 7 is a rear elevational view thereof, taken in the direction of arrow 7 in FIG. 20; FIG. 8 is a bottom plan view identical to FIG. 3 including a dotted curve indicated by arrow 17; FIG. 9 is a perspective view of a third and fourth embodiment of a frying and steaming device showing my new design; FIG. 10 is a top plan view thereof, taken in the direction of arrow 10 in FIG. 21; FIG. 11 is a bottom plan view thereof, taken in the direction of arrow 11 in FIG. 21; FIG. 12 is a right side elevational view thereof, taken in the direction of arrow 12 in FIG. 21; FIG. 13 is a left side elevational view thereof, taken in the direction of arrow 13 in FIG. 21; FIG. 14 is a front elevational view thereof, taken in the direction of arrow 14 in FIG. 21; FIG. 15 is a rear elevational view thereof, taken in the direction of arrow 15 in FIG. 21;

FIG. 16 is a bottom plan view identical to FIG. 11 including a dotted curve indicated by arrow 17;

FIG. 17 is a enlarged plan view of the area enclosed in the dotted curve indicated by arrows 17 in FIGS. 8 and 16;

FIG. 18 is a cross sectional view taken in the direction of line 18-18 in FIG. 17 showing a first and third embodiment of the present invention having square spokes;

FIG. 19 is a cross sectional view taken in the direction of line 19-19 in FIG. 17 showing a second and fourth embodiment of the present invention having circular spokes;

FIG. 20 is a view identical to FIG. 1 with descriptive legend directional arrows included which are necessary for better understanding of the drawing in accordance with 37 CFR

1084(o) and appropriate with good engineering practices, so as to best indicate in what directions previous views are taken so that nothing regarding the design sought to be patented is ambiguous or left to conjecture; and,

FIG. 21 is a view identical to FIG. 9 with descriptive legend directional arrows included which are necessary for better understanding of the drawing in accordance with 37 CFR 1084(o) and appropriate with good engineering practices, so as to best indicate in what directions previous views are taken so that nothing regarding the design sought to be patented is ambiguous or left to conjecture.
