The ornamental design for a bottle transporter, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a bottle transporter showing our new design, the opposite side being a mirror image thereof;

FIG. 2 is a left side view, the opposite side being a mirror image thereof;

FIG. 3 is a top plan view, the opposite side would appear to be a mirror image thereof and is therefore omitted;

FIG. 4 is a top-down view of a bottle transporter in use, handles splayed open with a wine bottle within; and,

FIG. 5 is a perspective view of a bottle transporter in use, sealed with a wine bottle within.

The broken line showing of a bottle is included for the purpose of illustrating environmental structure and forms no part of the claimed design. The two strips of heavy stippling just below the oval handle opening represents an adhesive seal and forms part of the claimed design.
