(57) **CLAIM**

The ornamental design for a conductive sheet with connection portion, as shown and described.

DESCRIPTION

The sole FIGURE is a front view of a conductive sheet with connection portion showing my new design.

The claim is directed to the solid lines in the drawing.

The evenly spaced broken lines represent portions of the design that are not claimed. The dot-dash-dot broken lines represent environmental subject matter that forms no part of the claim.

A rear view thereof is omitted because the rear view is symmetrical with the front view.

The conductive sheet is usable as part of a touch panel (e.g., a resistive film type or projected capacitive type touch panel), etc.
