(57) **CLAIM**  
 The ornamental design for a metal sheet material, as shown and described.

**DESCRIPTION**

FIG. 1 is an enlarged detail of a top view of the metal sheet material shown in FIG. 4;

FIG. 2 is an enlarged detail of a bottom view of the metal sheet material shown in FIG. 5;

FIG. 3 is an enlarged detail of a perspective top view of the metal sheet material shown in FIG. 6;

FIG. 4 is a top view of my design, shown with perspective lines;

FIG. 5 is a bottom view of my design, shown with perspective lines;

FIG. 6 is a perspective top view of my design, shown with perspective lines;

FIG. 7 is a top view according to FIG. 4, shown without perspective lines;

FIG. 8 is a bottom view according to FIG. 5, shown without perspective lines; and,

FIG. 9 is a perspective top view according to FIG. 6, shown without perspective lines.

The evenly-spaced broken lines represent the boundary of the claim and form no part of the claimed design.

The dot-dash-dot lines shown in FIGS. 4-6 represent the boundaries of the details shown in FIGS. 1-3, respectively, and form no part of the claimed design.

The thickness of the metal sheet material forms no part of the claimed design.

The metal sheet material can be used as a covering material for an automobile part, such as e.g., a hood or bonnet, a door, a roof, a floor, a trunk lid, a bumper, a crumple or crush zone (box), a door beam, etc., or as an interior or exterior covering material for building construction materials, such as e.g., a wall, a pipe, etc., or as a covering material for a container configured to hold one or more items, such as e.g., food or medicine.

The metal sheet material may comprise iron, aluminum and/or alloys thereof, such as, e.g., steel.
