(57) **CLAIM**

The ornamental design for an asymmetric coil spring, as shown and described.

DESCRIPTION

FIG. 1 shows a perspective view of an uncompressed asymmetric coil spring showing my new design. The coil spring includes an upper section and a lower section. The upper section has a generally conical shape whereby the diameter of the coil spring in the upper section increases from top to bottom of the upper section. The upper section includes four active convolutions. The lower section is generally cylindrical such that the diameter stays substantially the same along the length of the coil spring in the lower section. The full coil includes nine active convolutions.

FIG. 2 shows a top down view of the asymmetric coil spring shown in FIG. 1; and,

FIG. 3 shows a bottom down view of the asymmetric coil spring shown in FIG. 1.

UNITED STATES PATENT AND TRADEMARK OFFICE
Certificate

Patent No. D. 681,980 S

Patented: May 14, 2013

On petition requesting issuance of a certificate for correction of inventorship pursuant to 35 U.S.C. 256, it has been found that the above identified patent, through error and without any deceptive intent, improperly sets forth the inventorship.

Accordingly, it is hereby certified that the correct inventorship of this patent is: Michael S. DeFranks, Decatur, GA (US); and Rahul Kirtikar, Atlanta, GA (US).

Signed and Sealed this Third Day of September 2013.
