(57) CLAIM

The ornamental design for a nasal cleaning device, as shown and described.

#### DESCRIPTION

FIG. 1 is a top plan view of a a first embodiment of Applicant's nasal cleaning device; with a portion of the flexible tube and receptacle removed for ease of illustration;

FIG. 2 is a front elevational view of the nasal cleaning device of FIG. 1; with a portion of the flexible tube and the receptacle removed for ease of illustration;

FIG. 3 is a rear elevational of the nasal cleaning device of FIG. 1; with a portion of the flexible tube and the receptacle removed for ease of illustration;

FIG. 4 is a top plan view of the nasal cleaning device of FIG. 1 connected, by a flexible tube, to a receptacle;

FIG. 5 is a top plan view of a second embodiment of Applicant's nasal cleaning device; with the flexible tube and the receptacle removed for ease of illustration;

FIG. 6 is a front elevational view thereof;

FIG. 7 is a rear elevational view thereof; and,

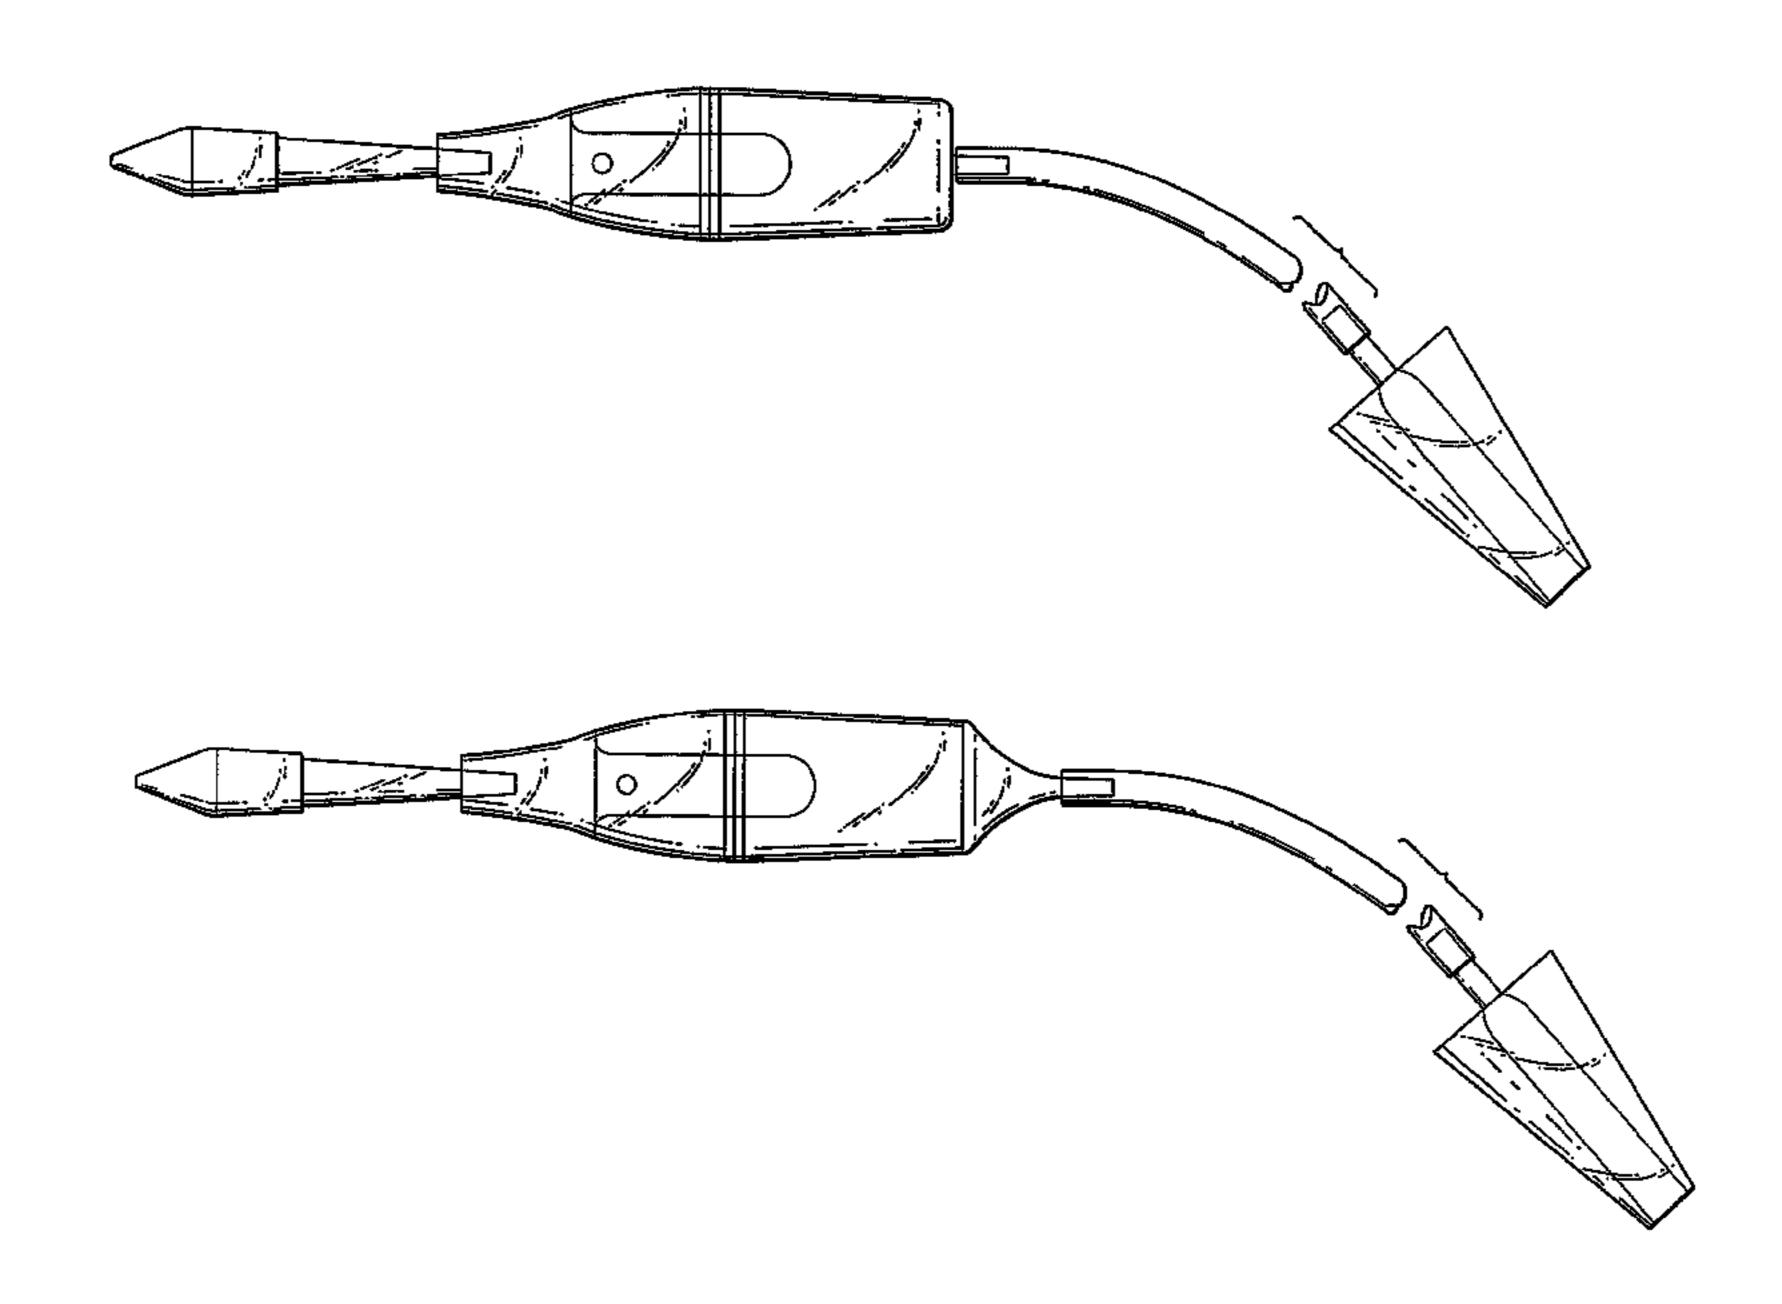

FIG. 8 is a top plan view of the nasal cleaning device of FIG. 5 connected, by a flexible tube, to a receptacle.

Applicant's nasal cleaning devise includes a probe with a tip for insertion into the nose of the patient, and a hollow body or receptacle for receiving the mucus collected from the nose of the patient.

The tube portion is shown broken in the middle, along the length in FIGS. 4 and 8, to indicate indeterminate length, with the understanding that the "indeterminate" portion of the nasal cleaning device forms no part of the claimed design. Patentability is based only on those portions of the nasal cleaning device shown in solid lines.

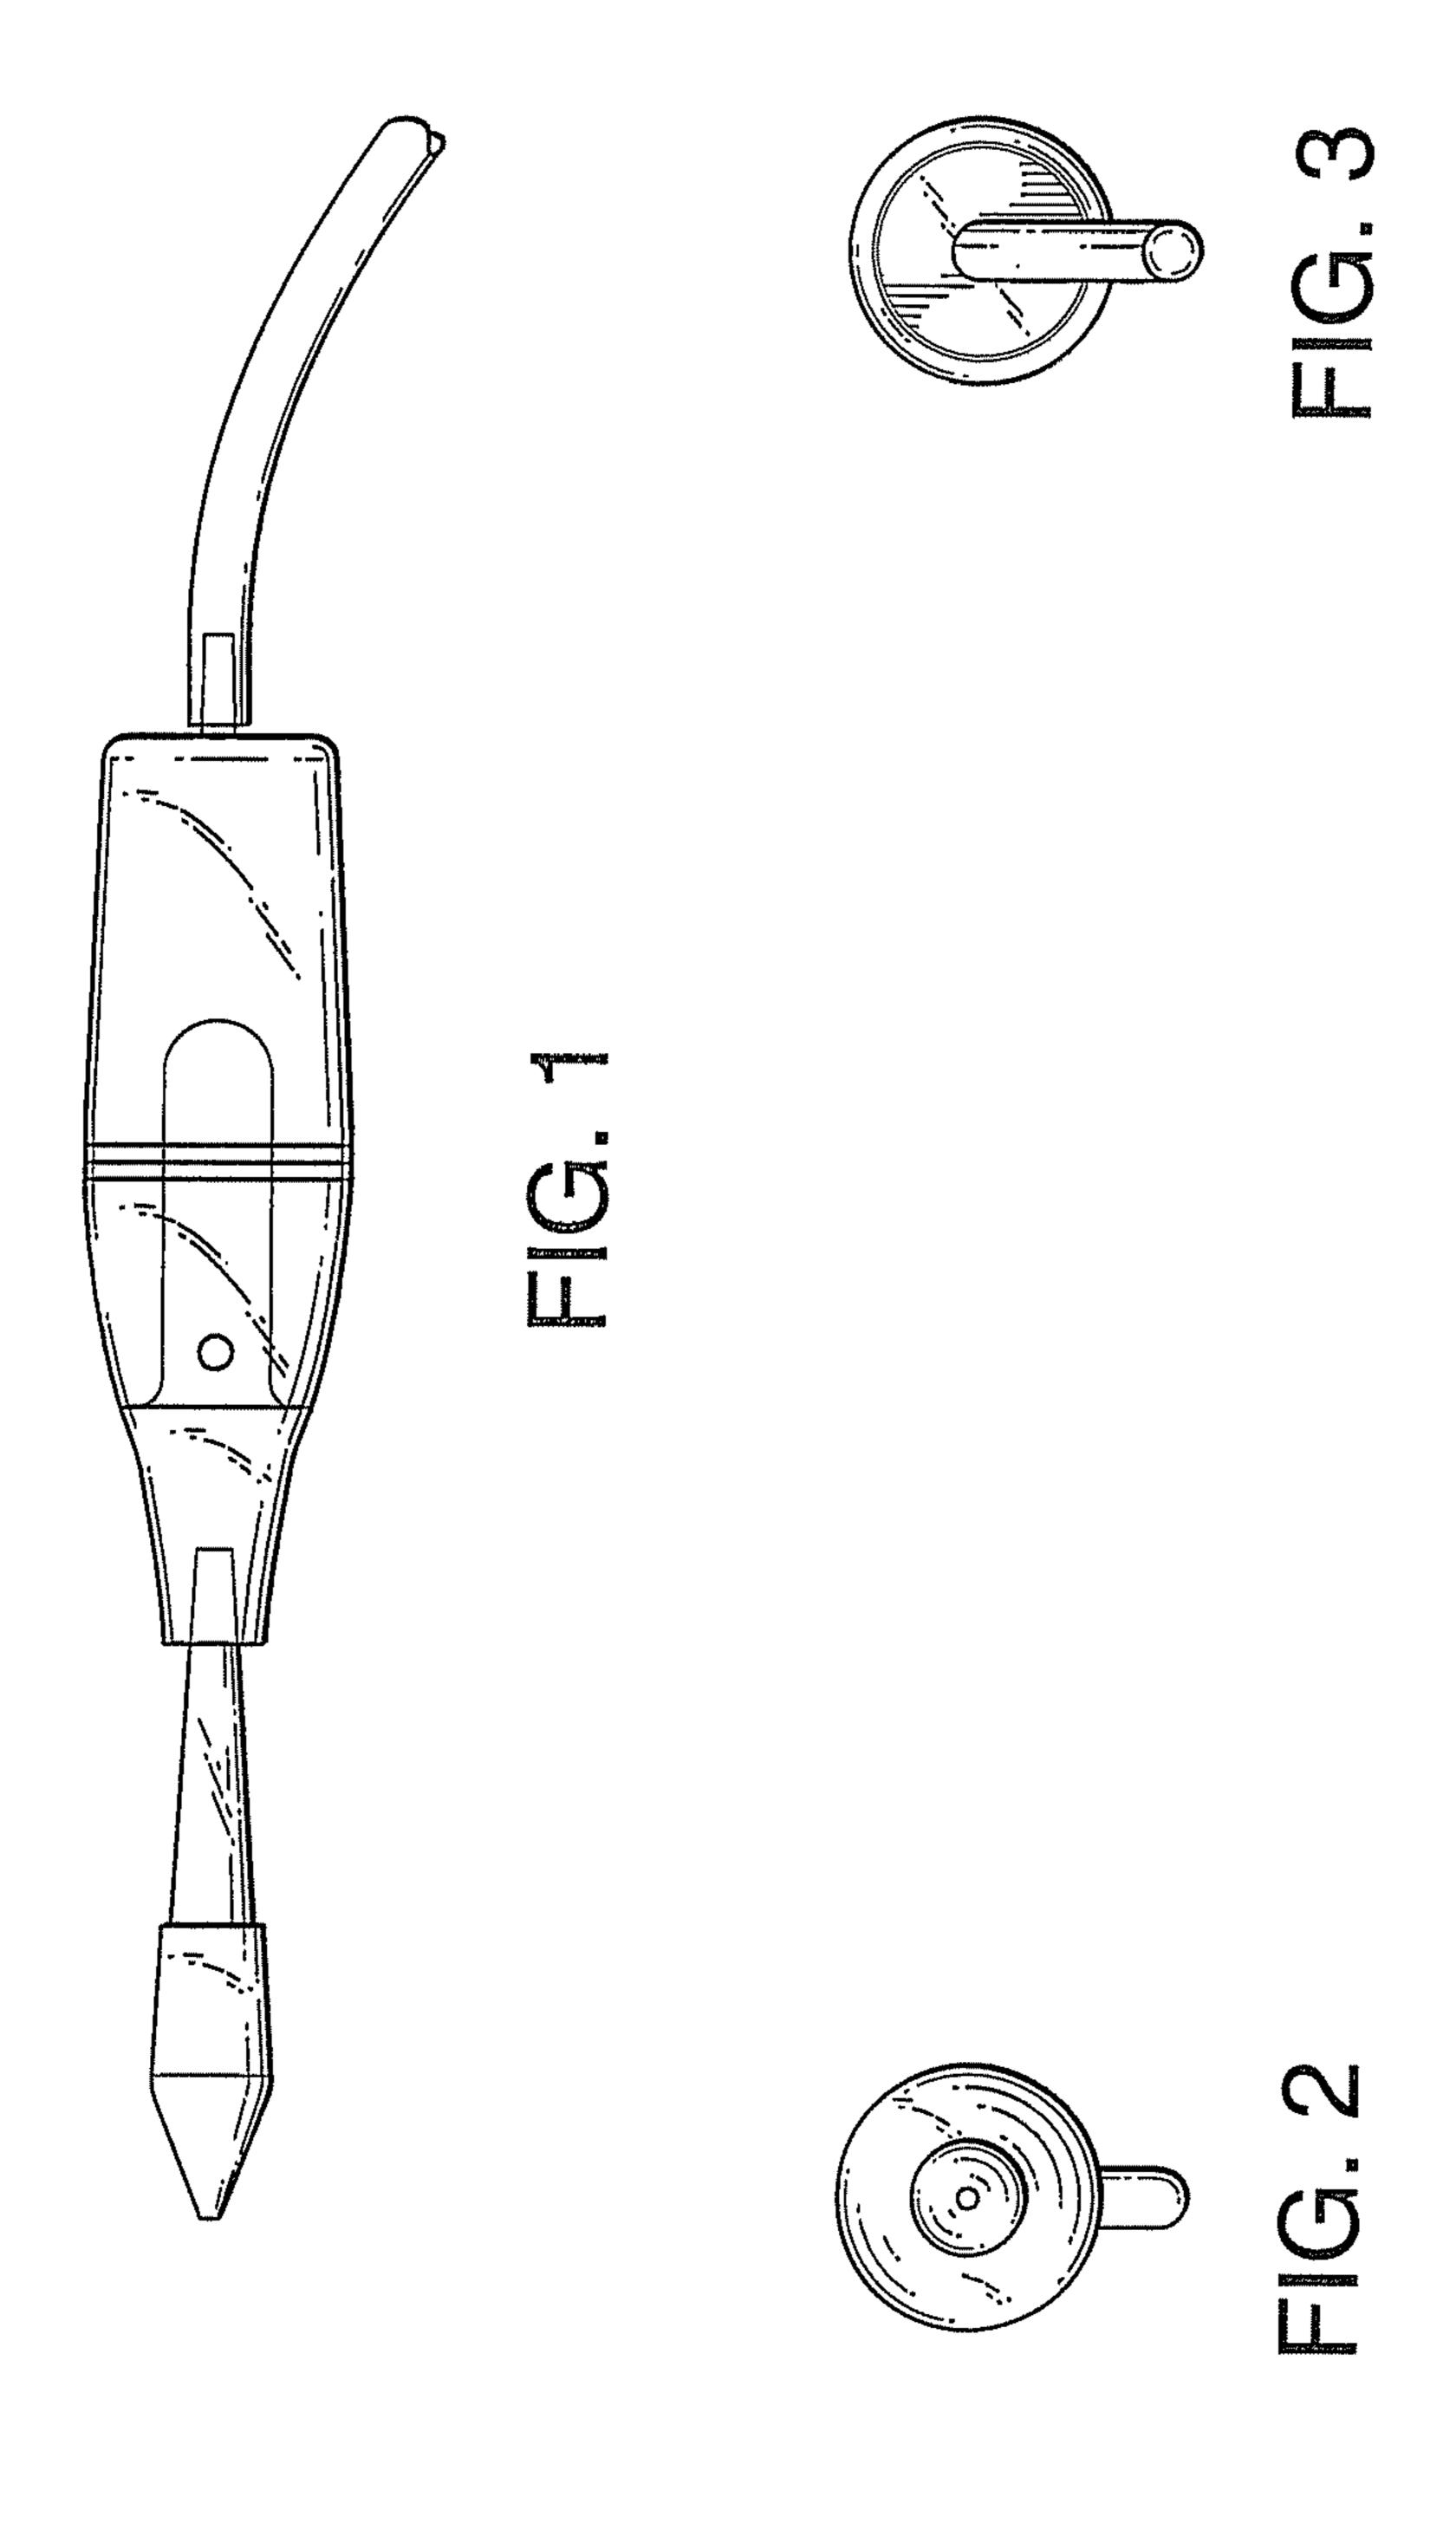

The broken line in FIG. 3 is included for the purpose of illustrating portions of the nasal cleaning device that forms no part of the claimed design.
