The ornamental design for a multi-band antenna, as shown and described.

DESCRIPTION

The FIGURE is a front elevation view of a multi-band antenna showing our new design.

The design is so thin that it is barely discernable in top, bottom, and side views. All elements of the design are flat and coplanar. The contiguous shaded areas are the only areas that are claimed.

The broken line portion of the figure is included to show unclaimed subject matter only and forms no part of the claimed design.
