(57) **CLAIM**

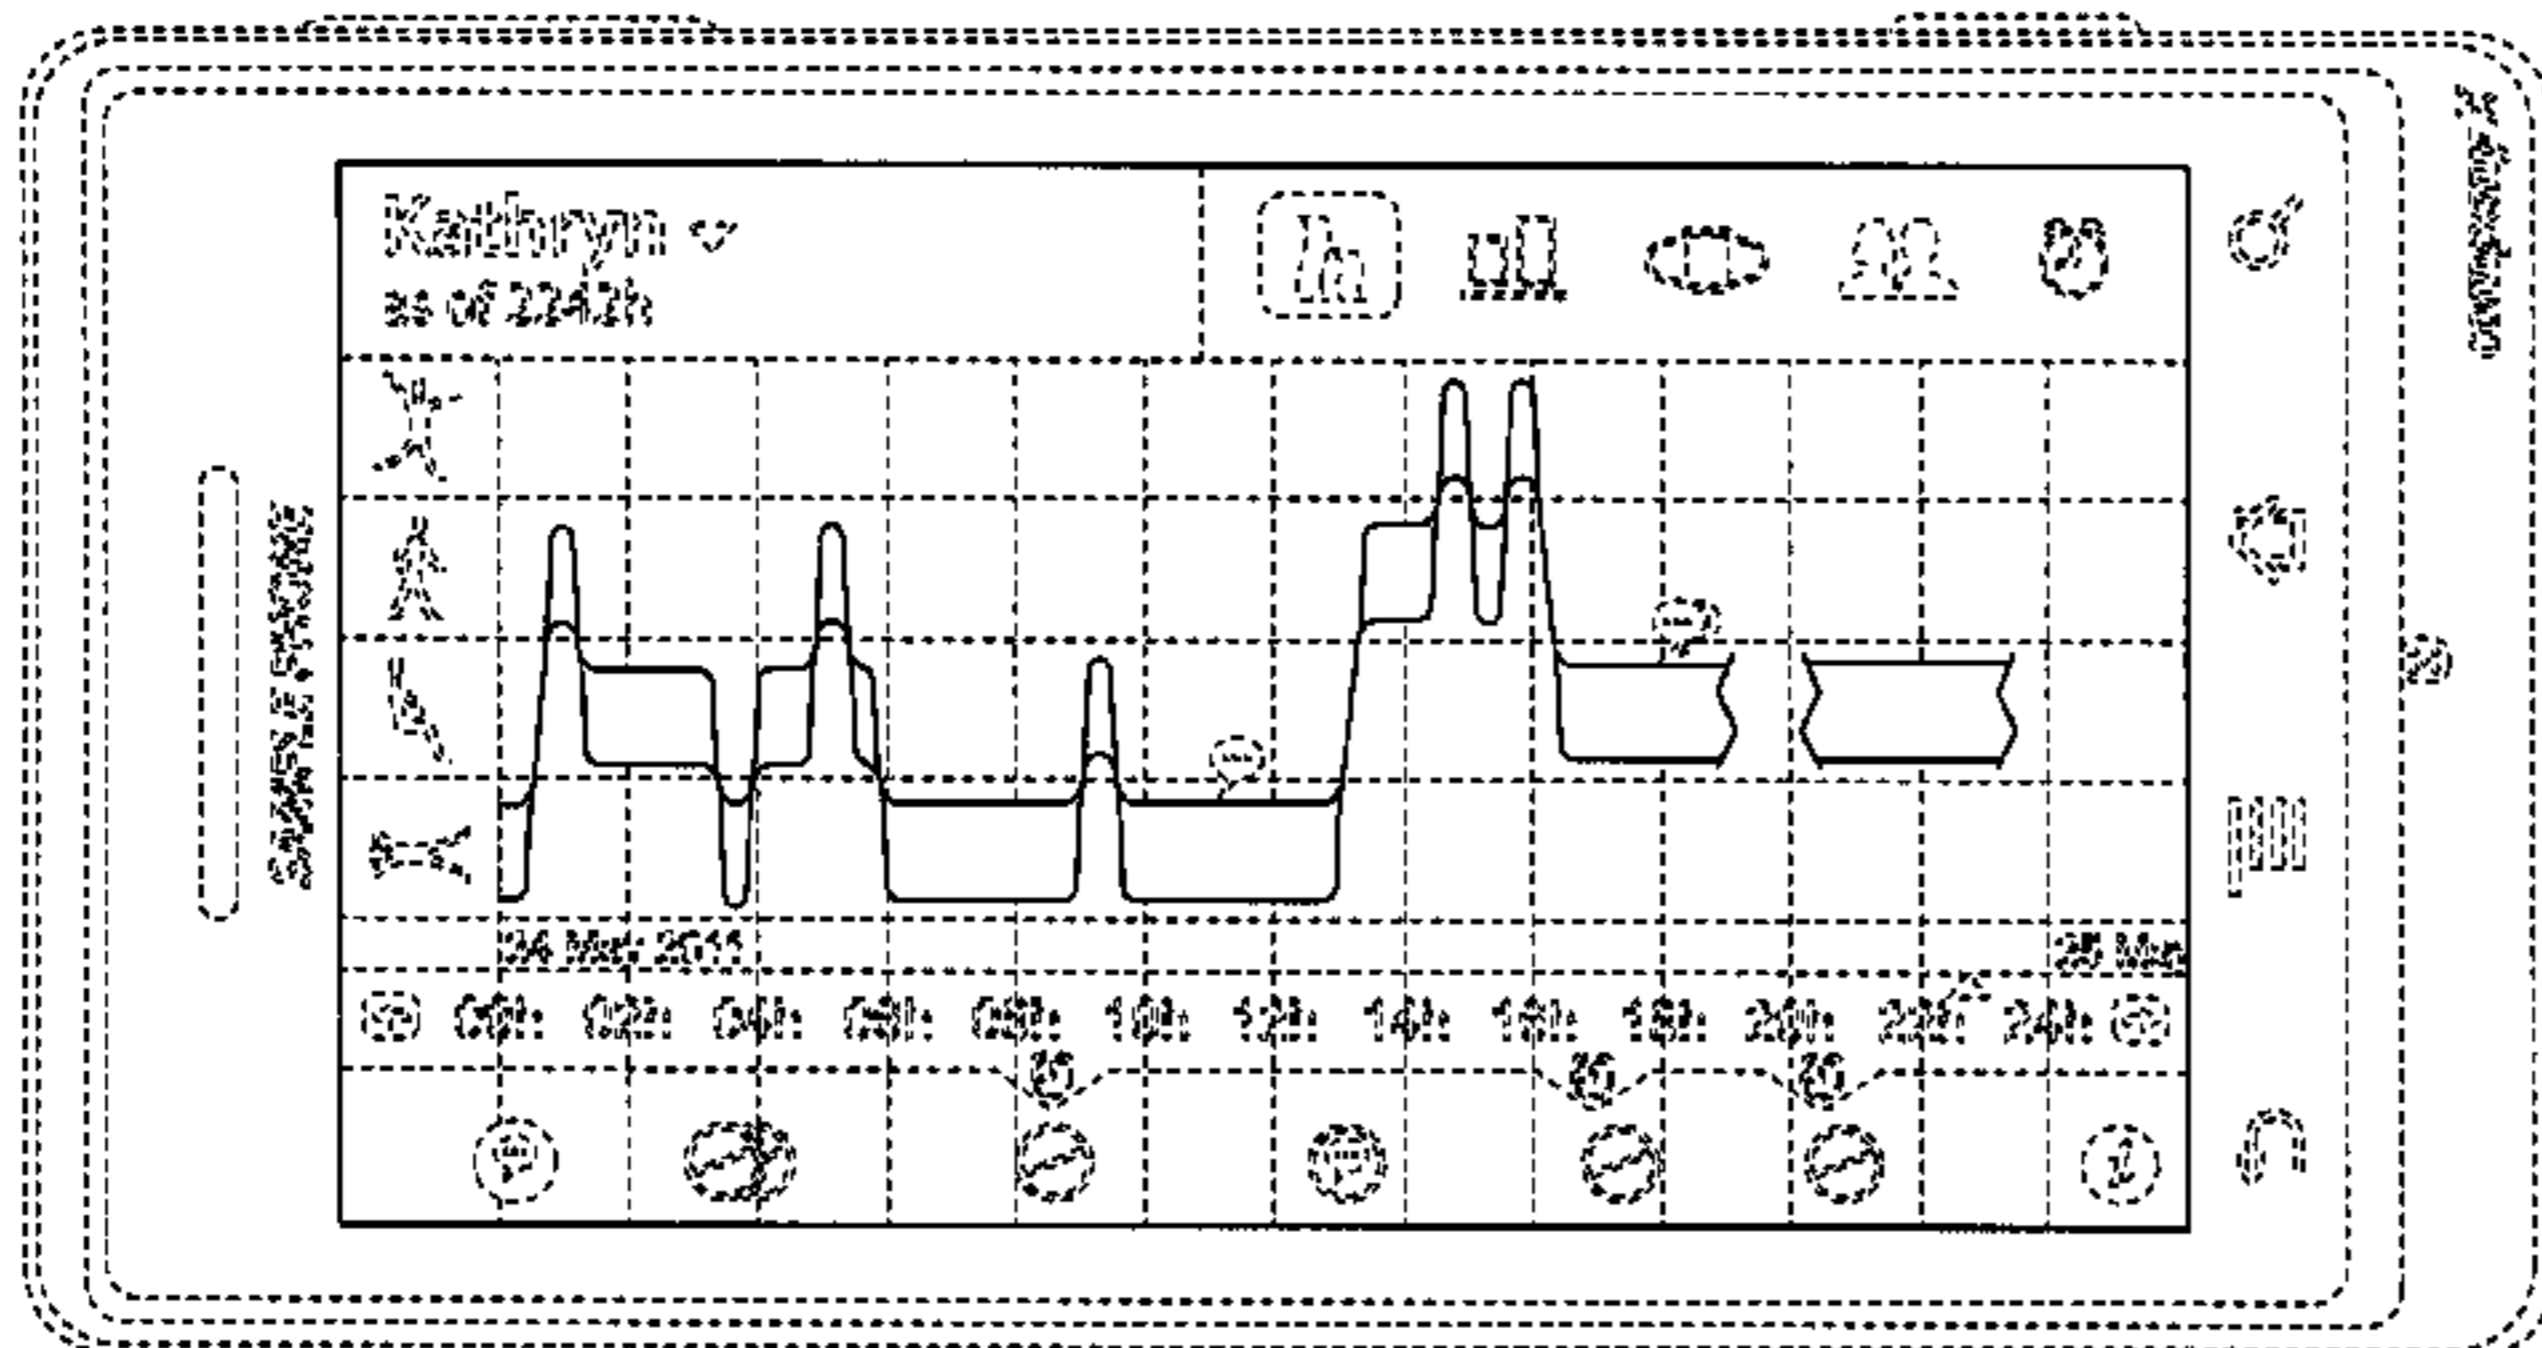

The ornamental design for display screen portion having a graphical user interface for patient monitoring, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen portion having a graphical user interface for patient monitoring, showing the new design as it would appear on a mobile device; and, FIG. 2 is a front view of a display screen portion having a graphical user interface for patient monitoring, showing the new design as it would appear on a desktop device.

The cut lines along the length of the “ribbon”-like feature indicate that no particular length is claimed. The graphical user interface portions shown in broken lines form no part of the claimed design. All other broken lines illustrate environment and form no part of the claimed design.
