(57) **CLAIM**

The ornamental design for an adult breathing tube holder assembly, and a head section thereof, as shown and described.

DESCRIPTION

FIG. 1 is a first perspective view of an adult breathing tube holder assembly, including a head section thereof;
FIG. 2 is a left side elevational view of the adult breathing tube holder assembly, including the head section thereof, illustrated in FIG. 1;
FIG. 3 is a right side elevational view of the adult breathing tube holder assembly, including the head section thereof, illustrated in FIG. 1;
FIG. 4 is a front elevational view of the adult breathing tube holder assembly, including the head section thereof, illustrated in FIG. 1;
FIG. 5 is a top plan view of the adult breathing tube holder assembly, including the head section thereof, illustrated in FIG. 1;
FIG. 6 a second perspective view of the adult breathing tube holder assembly, including the head section thereof, illustrated in FIG. 1;
FIG. 7 is a first perspective view of the head section of the adult breathing tube holder assembly illustrated in FIGS. 1-6, shown independent of the remainder of the assembly;
FIG. 8 is a left side elevational view of the head section illustrated in FIG. 7;
FIG. 9 is a right side elevational view of the head section illustrated in FIG. 7;
FIG. 10 is a front elevational view of the head section illustrated in FIG. 7;
FIG. 11 is a rear elevational view of the head section illustrated in FIG. 7;
FIG. 12 is a top plan view of the head section illustrated in FIG. 7; and,
FIG. 13 a second perspective view of the head section illustrated in FIG. 7.
