(57) **CLAIM**

The ornamental design for a hose suspension for pump, as shown and described.

DESCRIPTION

FIG. 1 is an upper right perspective view of my design for hose suspension for pump, with the structure shown in broken

lines being included to show the environment of my design but not being claimed as a part thereof;

FIG. 2 is a front elevation view thereof, with the structure shown in broken lines being included to show the environment of my design but not being claimed as a part thereof;

FIG. 3 is a left side elevation view thereof, with the structure shown in broken lines being included to show the environment of my design but not being claimed as a part thereof;

FIG. 4 is a right side elevation view thereof, with the structure shown in broken lines being included to show the environment of my design but not being claimed as a part thereof;

FIG. 5 is an upper rear perspective view thereof, with the structure shown in broken lines being included to show the environment of my design but not being claimed as a part thereof; no claim is made for the design features of the bottom view thereof;

FIG. 6 is an upper front perspective view thereof, with the structure shown in broken lines being included to show the environment of my design with a hose held by the hose suspension, but not being claimed as part of my design;

FIG. 7 is a front elevation view of my design, with the structure shown in broken lines being included to show the environment of my design with a hose held by the hose suspension, but not being claimed as part of my design;

FIG. 8 is a front elevation view of my design for hose suspension for pump, without environmental information;

FIG. 9 is a left side elevation view thereof;

FIG. 10 is a right side elevation view thereof;

FIG. 11 is a rear elevation view thereof;

FIG. 12 is a top plan view thereof; no claim is made for design features of the bottom view thereof;

FIG. 13 is a front elevation view thereof corresponding with FIG. 8, with the hose shown in broken lines being included to show the relationship between the suspension and a hose held by the suspension during use but not being claimed as part of my design;

FIG. 14 is a left side elevation view thereof corresponding with FIG. 9, with the hose shown in broken lines being included to show the relationship between the suspension and a hose held by the suspension during use but not being claimed as part of my design; and,

FIG. 15 is a top plan view thereof corresponding with FIG. 12, with the hose shown in broken lines being included to show the relationship between the suspension and a hose held by the suspension during use but not being claimed as part of my design.
