FIG. 1 is a front view of an operation panel for an image forming apparatus, showing the new design; FIG. 2 is a rear view thereof; FIG. 3 is a right-side view thereof; FIG. 4 is a left-side view thereof; FIG. 5 is a top view thereof; FIG. 6 is a bottom view thereof; FIG. 7 is a front, left side and top view thereof; FIG. 8 is a front, right side and top view thereof; and, FIG. 9 is another front, left side and top view thereof, showing the operation panel attached to an image forming apparatus. In operation, the operation panel is attached to an image forming apparatus such as a copying machine, a printer, a facsimile machine, a scanner, a combination of such machines, or the like. A user may use the operation panel to operate each function of the image forming apparatus, such as copying, printing and scanning. The broken line showing of the operation panel is for the purpose of illustrating environmental structure and forms no part of the claimed design. Subject matter shown in broken lines in the drawings forms no part of the claimed design.
