(57) **CLAIM**

We claim the ornamental design for the handheld bottle sleeve, as shown and described.

DESCRIPTION

FIGS. 1-7 illustrate a first embodiment of a handheld bottle sleeve, showing our new design.

FIG. 1 is a perspective view of the handheld bottle sleeve.

FIG. 2 is a front view of the handheld bottle sleeve.

FIG. 3 is a left side view of the handheld bottle sleeve.

FIG. 4 is a right side view of the handheld bottle sleeve.

FIG. 5 is a rear view of the handheld bottle sleeve.

FIG. 6 is a top view of the handheld bottle sleeve.

FIG. 7 is a bottom view of the handheld bottle sleeve.

FIGS. 8-14 illustrate a second embodiment of a handheld bottle sleeve.

FIG. 8 is a perspective view of the handheld bottle sleeve.

FIG. 9 is a front view of the handheld bottle sleeve.

FIG. 10 is a left side view of the handheld bottle sleeve.

FIG. 11 is a right side view of the handheld bottle sleeve.

FIG. 12 is a rear view of the handheld bottle sleeve.

FIG. 13 is a top view of the handheld bottle sleeve; and,

FIG. 14 is a bottom view of the handheld bottle sleeve.

Features illustrated in phantom lines are intended to show a preferred environment for the handheld bottle sleeve and form no portion of the claimed invention. As illustrated, an exemplary bottle, bottle cap, zipper, zipper pull, logo tag, and ventilation hole pattern are illustrated in phantom lines and therefore form no part of the claimed invention. A pair of seams formed generally along each of the left and right sides from the top to the bottom of the handheld bottle sleeve is illustrated in phantom, showing a first seam path in the first embodiment and a second seam path in the second embodiment; in each case the seams are possible configurations and form no part of the claimed invention. The handheld bottle sleeve is formed from a flexible material that can expand to accommodate a bottle of different sizes and shapes other than the shape of the particular bottle as illustrated within the handheld bottle sleeve, and therefore the bottle as illustrated depicts a preferred environment for the handheld bottle sleeve.
