(57) **CLAIM**

The ornamental design for an apparatus for authenticating a user to receive wireless network services on a mobile communication device, as shown and described.

**DESCRIPTION**

FIG. 1 is a top front perspective view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

FIG. 2 is a bottom perspective view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

FIG. 3 is a front view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

FIG. 4 is a rear view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

FIG. 5 is a top plan view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

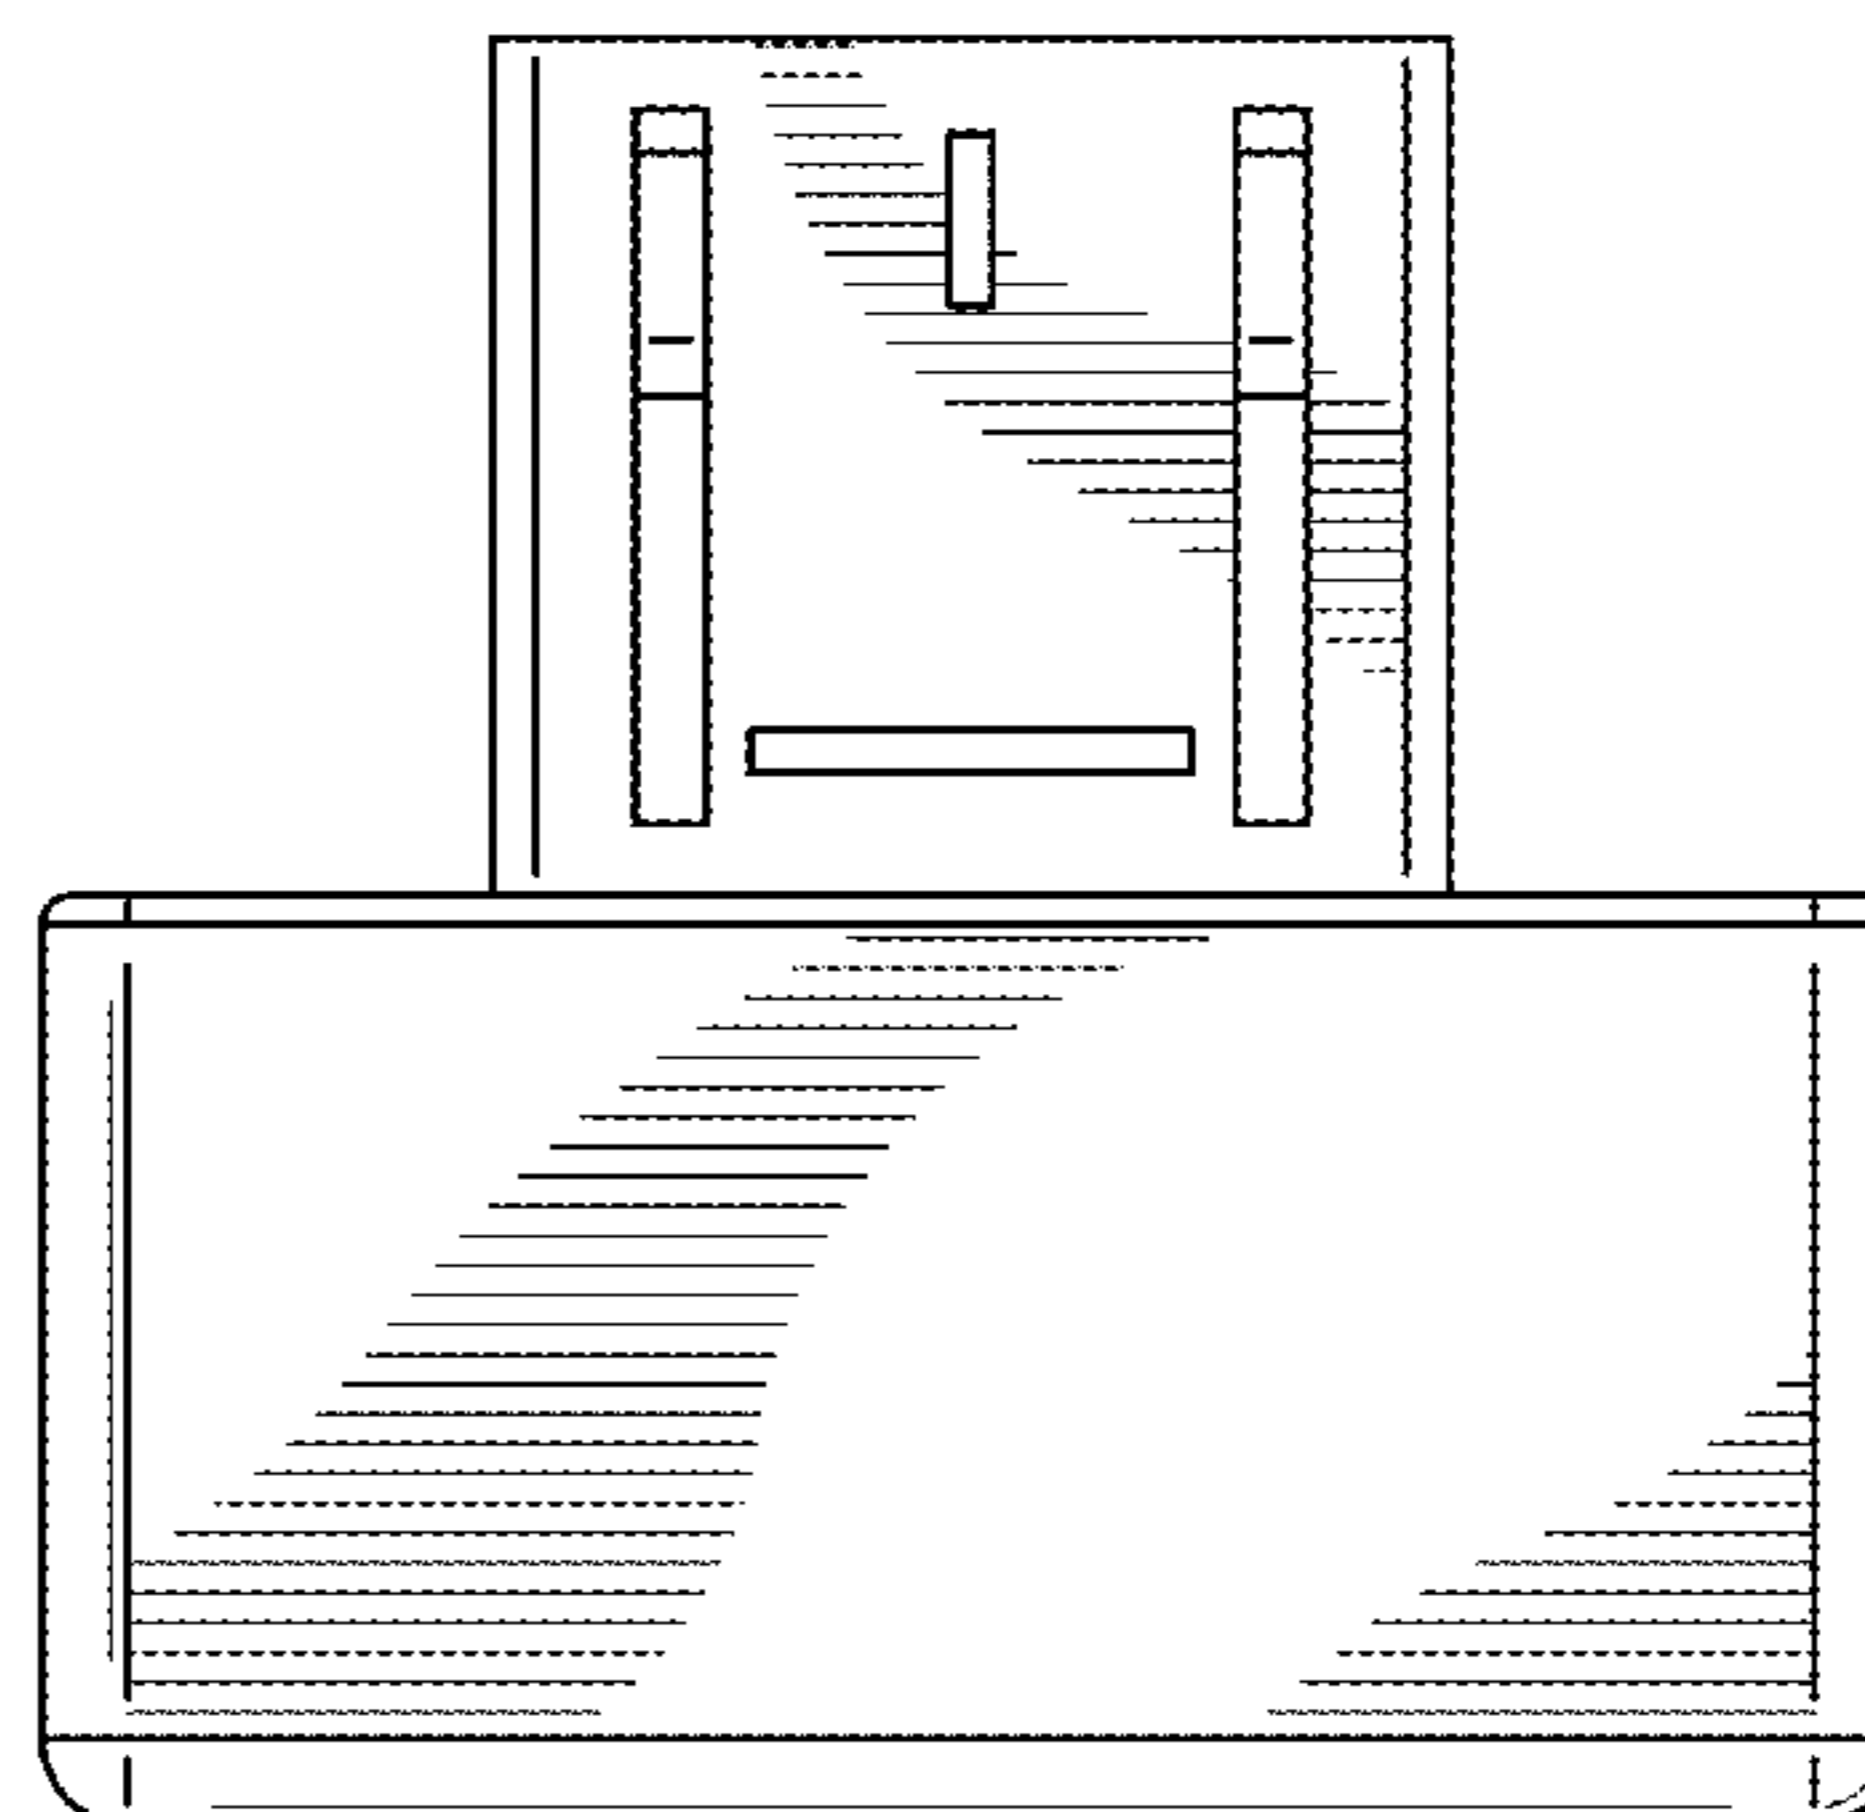

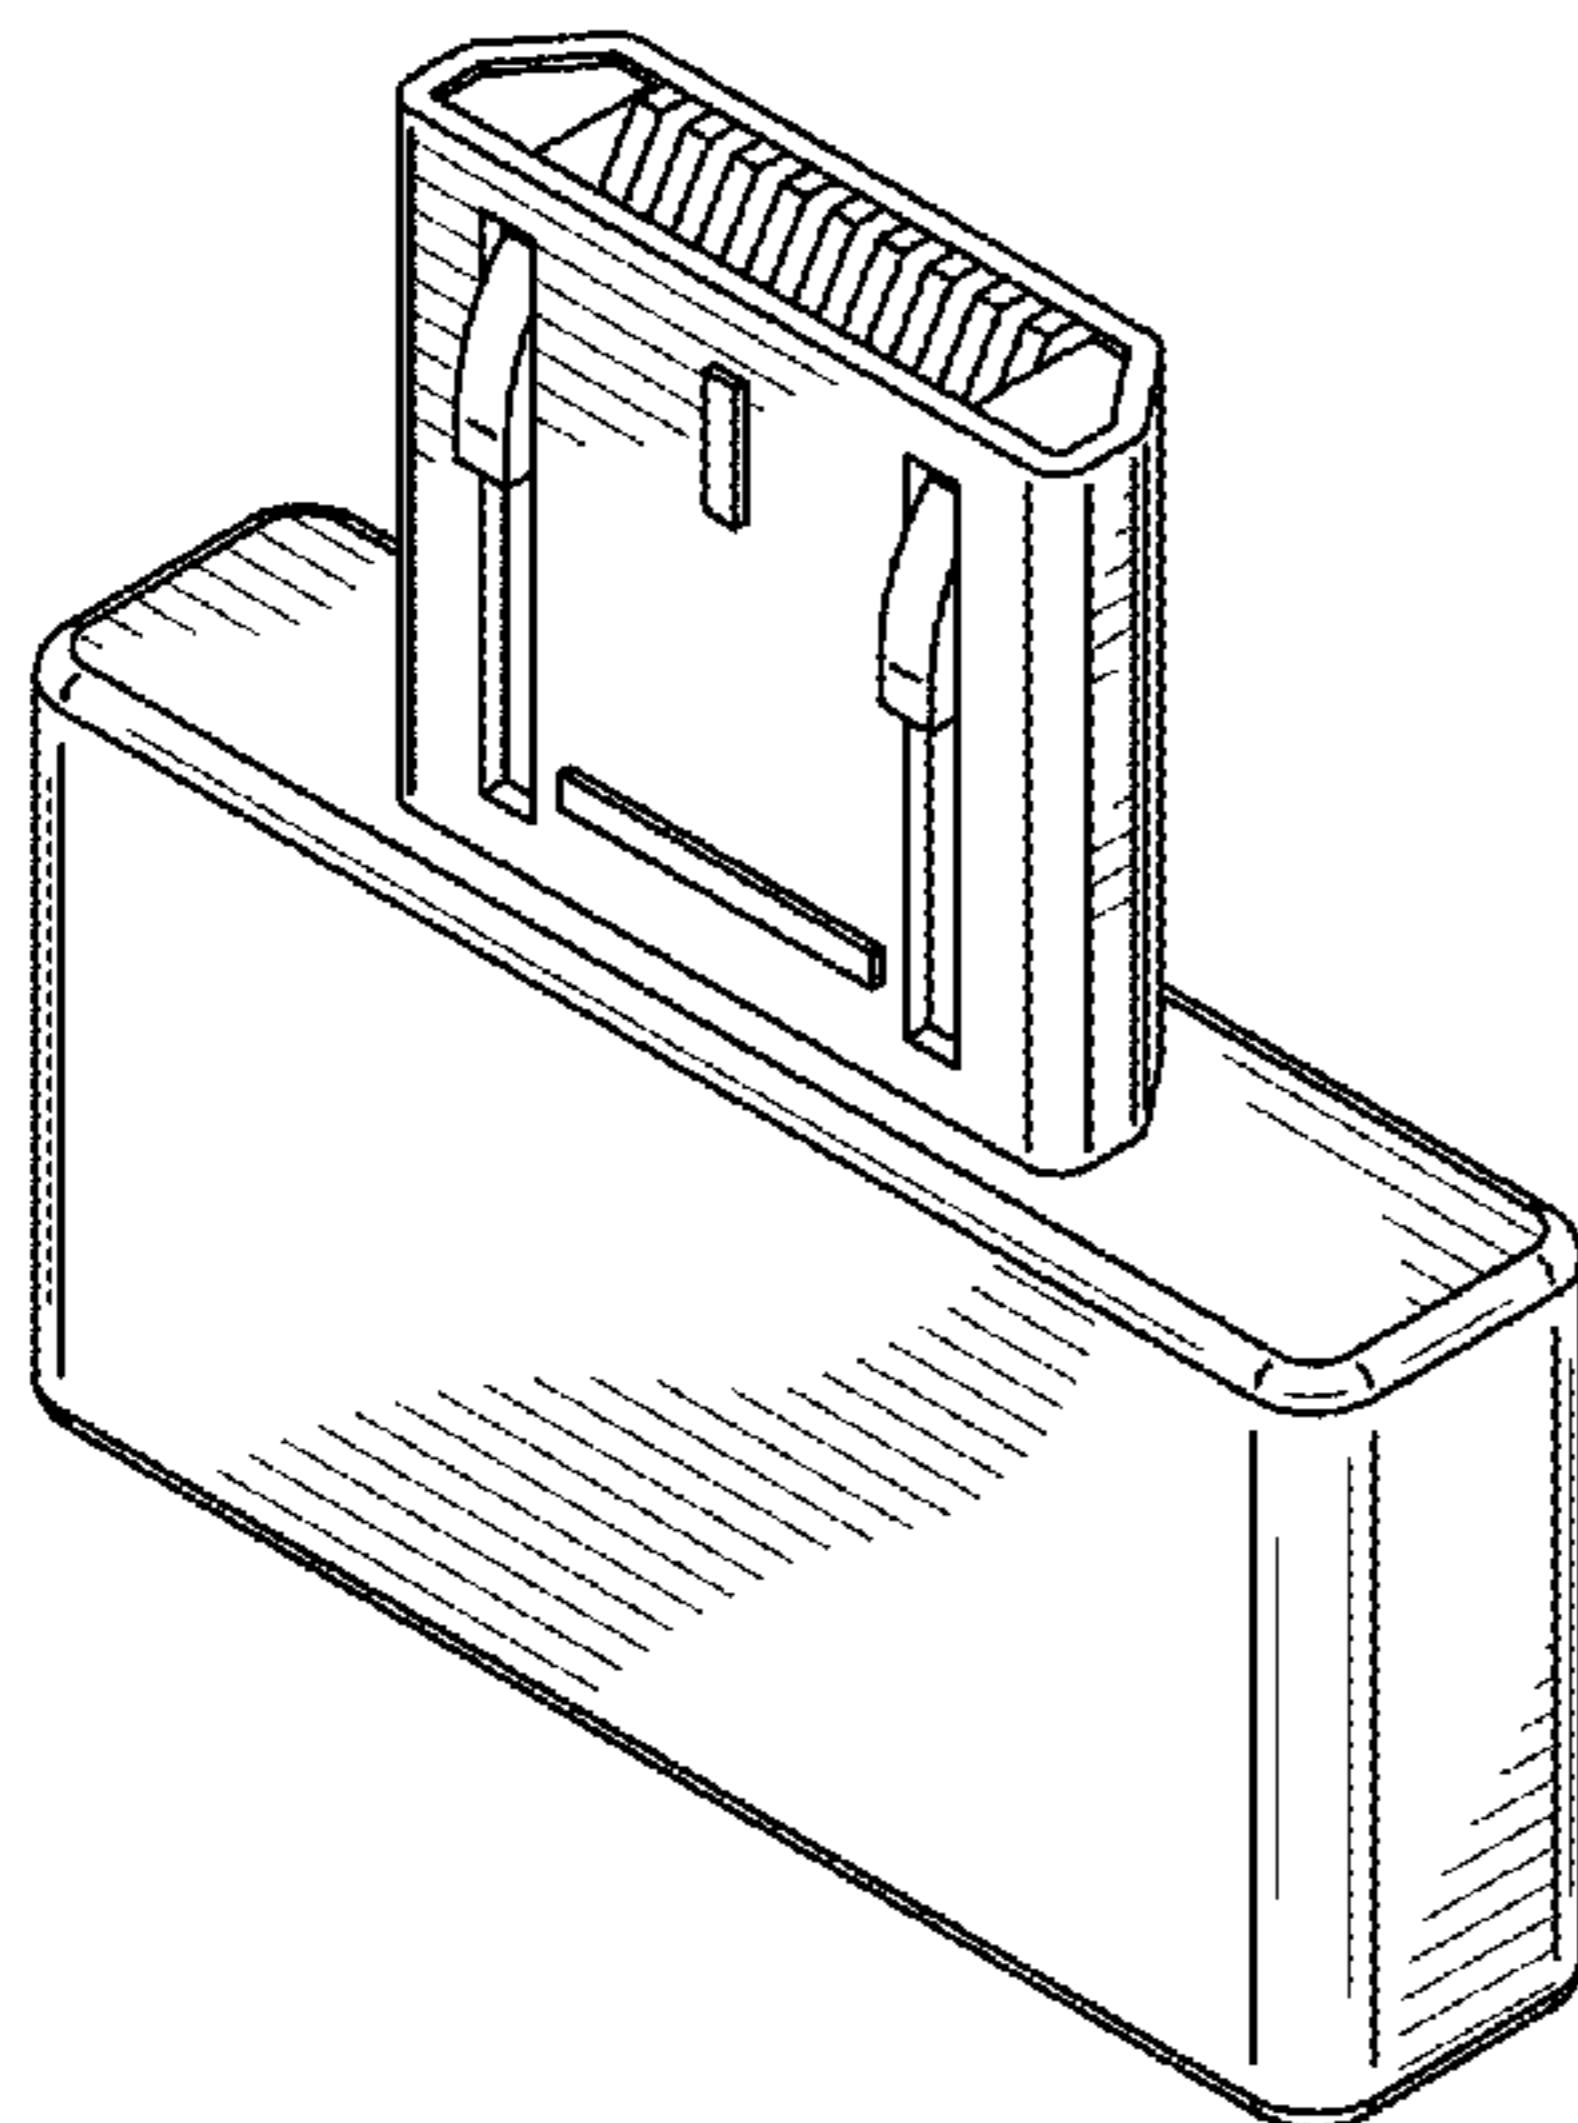

FIG. 6 is a bottom plan view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device.

FIG. 7 is a side view of an apparatus for authenticating a user to receive wireless network services on a mobile communication device; and,

FIG. 8 is a perspective view of the apparatus for authenticating a user to receive wireless network services on a mobile communication device in use.

The broken lines in FIG. 8 showing the apparatus for authenticating a user to receive wireless network services on a mobile communication device are included for purposes of illustrating environment and form no part of the claimed design.
