## **CLAIM** (57)

The ornamental design for a lighting apparatus, as shown and described.

## DESCRIPTION

FIG. 1 is a perspective view of the present invention from one side with the pole in an extended position, extending from the base unit, and with the pivotable light unit in a first position; FIG. 2 is a perspective view of the present invention from the same side as in FIG. 1, with the pole in a retracted position, extending from the base unit, and with the pivotable light unit in a second position;

FIG. 3 is a front elevation view of the present invention, with the pole in an extended position, extending from the base unit, and with the pivotable light unit in a third position;

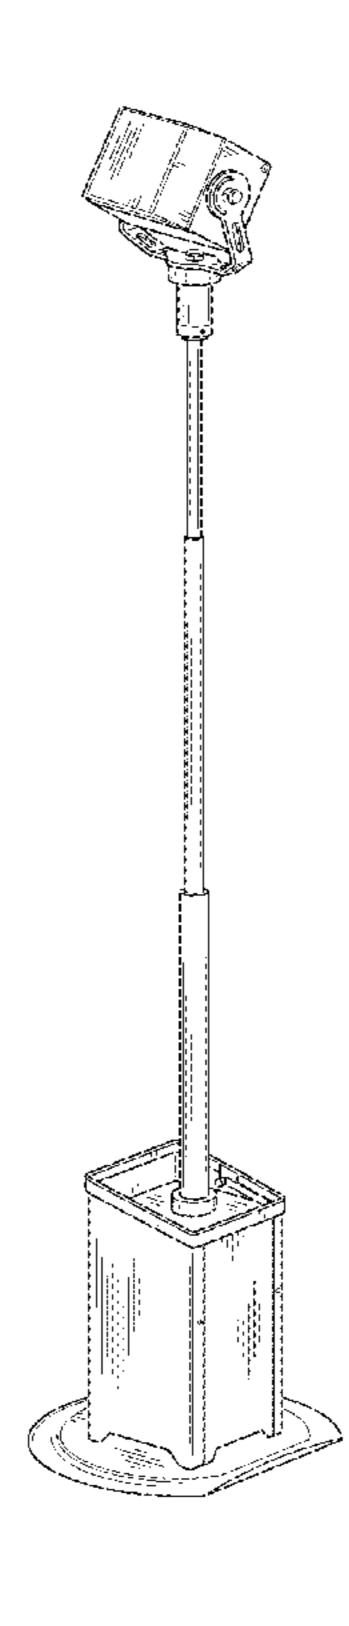

FIG. 4 is a rear elevation view of the present invention, with the pole in an extended position, extending from the base unit, and with the pivotable light unit in a third position;

FIG. 5 is a top plan view of the present invention with the light unit in a fourth position;

FIG. 6 is a right side elevation view of the present invention, with the pole in an extended position, extending from the base unit, and with the pivotable light unit in a fifth position, the left side being a reverse image thereof, of the present invention; and,

FIG. 7 is a rear elevation view of the present invention, with the pole removed, the light unit connected directly to the base unit, and with the pivotable light unit in a sixth position.
