(57) **CLAIM**

The ornamental design for an operator panel for medical apparatus with graphical user interface comprising a set of images.

DESCRIPTION

FIG. 1 is a front elevation view of a first embodiment of an operator panel for medical apparatus with graphical user interface comprising a set of images showing our new design; FIG. 2 is front elevation view of a second embodiment of an operator panel for medical apparatus with graphical user interface comprising a set of images showing our new design; FIG. 3 is a front elevation view of a third embodiment of an operator panel for medical apparatus with graphical user interface comprising a set of images showing our new design; and, FIG. 4 is a front elevation view of a fourth embodiment of an operator panel for medical apparatus with graphical user interface comprising a set of images showing our new design. The broken lines in the drawings represent portions of the operator panel for medical apparatus with graphical user interface comprising a set of images that form no part of the claim.
