(57) **CLAIM**

The ornamental design for a display screen or portion thereof with animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen or portion thereof with animated graphical user interface showing a first image in the sequence showing my new design;  
FIG. 2 is a front view of a second image thereof;  
FIG. 3 is a front view of a third image thereof;  
FIG. 4 is a front view of a fourth image thereof;  
FIG. 5 is a front view of a fifth image thereof;  
FIG. 6 is a front view of a sixth image thereof;  
FIG. 7 is a front view of a seventh image thereof;  
FIG. 8 is a front view of an eighth image thereof;  
FIG. 9 is a front view of a ninth image thereof;  
FIG. 10 is a front view of a tenth image thereof;  
FIG. 11 is a front view of an eleventh image thereof;  
FIG. 12 is a front view of a twelfth image thereof;  
FIG. 13 is a front view of a thirteenth image thereof; and,  
FIG. 14 is a front view of a fourteenth image thereof.

The dashed lines in the Figures, including the display screen, show portions of the animated image and display screen which form no part of the claimed design.

The dot dash broken lines in the Figures show an unclaimed boundary and do not form part of the claimed design. They show the relationship between the area within the dot dash broken line, which is not claimed, and the shape of the rest of the Figure, and in particular, the movement of the area about the display screen.

The appearance of the animated image sequentially transitions between the images shown in FIGS. 1-14. The process or period in which one image transitions to another forms no part of the claimed design.
