(57) **CLAIM**

The ornamental design for a shoe sanitizer, as shown and described.

DESCRIPTION

FIG. 1 is a isometric view of a shoe sanitizer, in which a UV light bulb is installed, showing the new design.

FIG. 2 is rear isometric view showing the shoe sanitizer design.

FIG. 3 is a top plan view with cross sections provided thereof.

FIG. 4 is a bottom plan view thereof.

FIG. 5 is a left side elevation view thereof.

FIG. 6 is a right side elevation view thereof.

FIG. 7 is a front elevation view thereof.

FIG. 8 is a rear elevation view thereof.

FIG. 9 is a cross-sectional view taken along line 9-9 in FIG. 3; and,

FIG. 10 is a cross-sectional view taken along line 10-10 in FIG. 3.

The broken lines herein are included for illustrative purposes only and form no part of the claimed design.

The present invention relates generally to a new design for an improved apparatus for sanitizing the interior of a shoe. More specifically, the design relates to a device that kills bacteria within the interior of a shoe employing use of a UV light, in an effective pathogen killing range, sanitizing the shoe and subsequently deodorizing the shoe, thus, providing added usefulness of the shoe, as well as a more pleasant experience, for the wearer.
