(57) **CLAIM**

The ornamental design for a cranial drape, as shown and described.

DESCRIPTION

Related U.S. Application Data

(63) Continuation of application No. 12/843,603, filed on Jul. 26, 2010, now Pat. No. 8,424,532.

The FIGURE is a top plan view of a cranial drape showing our new design.

(51) **LOC (9) Cl.** **06-09**

The broken lines illustrate portions of the cranial drape that form no part of the claimed design. The vertical middle section of the drape is denoted in continuous diagonal slides representing an absorbent material different in appearance from the vertical sections to its left and right. The oblique line shading is used to denote claimed portions that appear transparent or translucent. The surface of the drape is substantially flat.
