(57) **CLAIM**

The ornamental design for a corrugated loop for a hook and loop fastener, as shown and described.

FIG. 1 is a top perspective view of a corrugated loop for a hook and loop fastener;
 FIG. 2 is a top plan view of the corrugated loop shown in FIG. 1;
 FIG. 3 is a bottom plan view of the corrugated loop shown in FIG. 1;
 FIG. 4 is a back view of the corrugated loop shown in FIG. 1;
 FIG. 5 is a front view of the corrugated loop shown in FIG. 1;
 FIG. 6 is a right side view of the corrugated loop shown in FIG. 1;
 FIG. 7 is a left side view of the corrugated loop shown in FIG. 1;
 FIG. 8 is a top perspective view of a second corrugated loop for a hook and loop fastener;
 FIG. 9 is a top plan view of the corrugated loop shown in FIG. 8;
 FIG. 10 is a bottom plan view of the corrugated loop shown in FIG. 8;
 FIG. 11 is a back view of the corrugated loop shown in FIG. 8;
 FIG. 12 is a front view of the corrugated loop shown in FIG. 8;
 FIG. 13 is a right side view of the corrugated loop shown in FIG. 8; and,
 FIG. 14 is a left side view of the corrugated loop shown in FIG. 8.

The borders represented by broken lines indicate the corrugated loop can extend outward from the front, back, left and/or right sides of the figures as shown. The broken lines within the borders illustrate the environmental structure and form no part of the claimed design.

FIGS. 3 and 10 show the bottom plan views of the corrugated loop. Although nothing in the bottom view is being claimed, it should be understood that in some embodiments, the claimed design in FIGS. 2 and 9, respectively, could be visible through the bottom (or underside) of the corrugated loop.
